Overview & Current Events

Ferrari was founded in 1947 and is headquartered in Italy. The company began trading as a public company in 2015, following a spinoff from Fiat Chrysler. Today, the company manufactures luxury sports cars under a variety of models. Its cars are generally high performance, with a number of V-8 and V-12 models among its best sellers. Ferrari's luxury vehicles cater to the very top of the consumer automotive market. In 2020, shipments fell more than 10% to 9,119 units, with about half of that in Europe, Middle East, and Africa, and a third coming from the Americas. Shipments for 2023 rebounded to a new record of more than 11,000. Ferrari generates more than \$7 billion in annual revenue.

On February 22nd, 2024, Ferrari raised its annual dividend 30.3% to \$2.60, which follows the company's 35.8% increase last year. Ferrari has now raised its dividend three consecutive years.

On May 7th, 2024, Ferrari reported first quarter earnings results for the period ending March 31st, 2024. All figures reported in USD. For the quarter, revenue increased 8.3% to \$1.7 billion, which topped estimates by \$37 million. Earnings-per-share of \$2.10 compared very favorably to earnings-per-share of \$1.78 in the prior year and was \$0.10 more than expected. For the quarter, units shipped totaled 3,560, which represented a 0.2% year-over-year decline. Shipments increased 39 units for the EMA and 35 units for the Americas. Mainland China, Hong Kong, and Taiwan shipments fell 79 units while the rest of Asia was lower by 2 units. Internal combustion engine models accounted for 54% of units shipped during the quarter with hybrid models contributing the remainder.

We project that Ferrari will earn \$8.35 in 2024, down slightly from \$8.38 previously. This would be an 11.8% increase from last year. We have updated our forecast accordingly.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	---	\$1.66	\$2.22	\$3.38	\$3.89	\$4.12	\$3.33	\$5.25	\$5.28	\$7.47	\$8.35	\$13.45
DPS	---	---	\$0.46	\$0.64	\$0.88	\$1.16	\$1.23	\$1.04	\$1.47	\$2.00	\$2.60	\$4.19
Shares³	---	189	189	189	189	186	185	185	183	182	180	180

Ferrari became a publicly-traded company in 2015, when it was spun-off from its former parent company Fiat Chrysler. The company has posted strong growth as a public company. As long as the global economy remains strong, Ferrari's sales and earnings should continue to grow. Of course, this growth trajectory would be called into question in tougher times. Given the name brand, growth in all markets, and recent results, we now estimate that Ferrari can grow earnings by a rate of 10% annually through 2029. This is a premium to other car manufacturers' expected growth rates, but below the company's five-year earnings CAGR of 12.6%. Ferrari will also be investing in new products to generate growth. For example, Ferrari recently released its first SUV model, called the Purosangue, which is Italian for thoroughbred. It is a hybrid based on a new platform that Ferrari will be using for many of its next-generation models going forward. The company has four hybrid engine models in its portfolio.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	---	29.7	20.7	26.9	31.6	36.5	68.9	49.3	40.6	45.3	50.2	38.0
Avg. Yld.	---	0.0%	1.0%	0.7%	0.7%	0.8%	0.8%	0.4%	0.7%	0.6%	0.6%	0.8%

Much like Ferrari's sports cars, the current share price continues to trade a premium to the stock's historical average. While we do believe that some sort of upward revision is warranted as a result of the strong brand name and growth prospects, the current valuation still appears lofty. Shares of Ferrari have increased \$30, or 7.7%, since our February 2nd, 2024 report. Using earnings-per-share estimates for 2024, the stock trades with a P/E above 50. Ferrari's business was greatly impacted by COVID-19, but has more than recovered since. Ferrari has typically had an average P/E in the high 20s to low 40s since becoming a publicly traded company. We are reaffirming our 2029 target P/E of 38 to bring it more in-line with the stock's long-term average valuation. If shares revert to our 2029 target P/E by this time then valuation would be a 5.4% headwind to total annual returns.

The current dividend payout is prudent – pegged at 25% to 40% of past year's profits and paid once a year - but unexciting due to the elevated valuation. That said, the last two dividend increase were very strong.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	---	---	21%	19%	23%	28%	37%	20%	28%	27%	31%	31%

Ferrari's lasting competitive advantage is its brand. In some ways, the more expensive its vehicles, the more inaccessible they are to the average person, the more appealing the ultra-luxury automobiles become. Interestingly, substantially increased production is unlikely to be a long-term growth driver as this would devalue the exclusivity of the brand. The company currently generates healthy profit margins, as Ferrari does not have to battle it out in the exceptionally competitive middle-market segment. That said, the next recession could be concerning if luxury vehicle purchases were to decline significantly (as we expect they would).

Final Thoughts & Recommendation

After first quarter results, Ferrari is expected to produce an annual return of 4.8% through 2029, down from our prior estimate of 6.2%. Our projection stems from 10.0% annual earnings growth and a starting yield of 0.6% that are partially offset by a valuation headwind. Shipments were down slightly from the prior year, but Ferrari is expected to produce high rates of growth in 2024. That said, Ferrari's valuation continues to leave a lot to be desired. We have lowered our five-year price target \$2 to \$511 due to EPS estimates, but we continue to rate shares of Ferrari as a hold due to projected returns.
