Overview & Current Events

Costco's humble beginning in a converted airplane hangar has given way to a powerhouse in an industry it helped create. Today, Costco is a diversified warehouse retailer that operates more than 870 warehouses that collectively generate about \$255 billion in annual sales. Costco's leadership in this industry has rewarded shareholders handsomely over the years as it sports a \$375 billion market capitalization.

Costco posted third quarter earnings on May 30th, 2024, and results were very strong once again, as the company continues to blow past estimates on a regular basis. Earnings-per-share beat expectations by a dime at \$3.78, and revenue was up more than 9% year-over-year to \$58.5 billion, beating estimates by over half a billion dollars. Net sales were positively impacted by less than 1% by the shift in the fiscal calendar as a result of a 53rd week in fiscal 2023 that is not repeating this year.

Comparable sales rose 6% in the US, 7.4% in Canada, and 8.5% in Other International. Total comparable sales were up 6.5%, much of which was driven by a 20.7% gain in e-commerce comparables sales. The company ended the quarter with 878 warehouses and plans to add 25 to 30 stores annually.

Management addressed the membership fee and said it was still trying to determine the right time to boost the fee, which has been the same for several years.

We now see \$16.15 in earnings-per-share for this year, up slightly from our prior estimate. We also note the stock has risen tremendously once again, so it's quite expensive against a modest earnings guidance increase.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$4.65	\$5.27	\$5.33	\$5.82	\$7.09	\$8.26	\$9.02	\$10.97	\$13.14	\$14.16	\$16.15	\$24.85
DPS	\$1.33	\$1.51	\$1.70	\$1.90	\$2.14	\$2.44	\$2.70	\$2.98	\$3.38	\$3.84	\$4.64	\$7.47
Shares²	438	438	438	437	442	443	444	444	444	443	443	443

We see Costco's forecasted growth as straightforward; sales growth will continue to make up most of its predicted growth. Its model does not allow for much in the way of expanding profit margins because its retail pricing is intended to be as low as possible for consumers. We are forecasting 9% earnings-per-share growth annually in the coming years as strong sales numbers help drive incremental gains in operating margins.

The vast majority of Costco's operating margin dollars come from its membership fees, which continue to grow at strong rates, but are a very small fraction of total revenue. This is 100% margin revenue and fuels higher comparable sales, as well as more members and more people in the stores buying. The company does not buy back stock in any sort of meaningful quantity, so that is not a source of earnings growth. Steadily higher comparable sales should be enough to keep earnings growing at our forecast rate of 9% annually. Given Costco's outstanding track record of growing sales, we aren't ready to cut our growth estimate meaningfully as the company thrived during the pandemic and continues to do so. Comparable sales gains were strong in Q3 results. Given Costco's profits are due almost entirely to membership

revenue, that is the key thing to watch. We note it's been seven years since the company's last membership price hike, which would almost certainly cause a big rally in the stock when announced.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	25.1	26.7	29.0	27.6	28.1	27.8	33.9	34.2	40.4	34.7	52.4	34.0
Avg. Yld.	1.1%	1.1%	1.1%	1.2%	1.1%	1.0%	0.9%	0.8%	0.6%	0.7%	0.5%	0.9%

Costco's price-to-earnings multiple has been elevated for some time as investors have applied a premium to the stock due to the company's excellent performance. Costco shares are now extremely expensive again, trading for an unprecedented 52.4 times earnings. That's a long way ahead of our estimate of fair value at 34 times earnings, so we see a huge headwind to returns from the valuation.

We see the yield as remaining under 1% given the valuation and rising dividend payment. We don't believe Costco will be a high-income stock anytime in the foreseeable future, but its payout growth should be robust. We note the \$10 per share special dividend paid in December of 2020, as well as the \$15 special dividend declared for January 2024.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	28%	28%	32%	33%	30%	30%	30%	27%	26%	27%	29%	30%

Costco's payout ratio is quite low at 29% for this year, and we believe it will remain near or under 30% going forward. The company has the ability to boost the dividend at a much higher rate but has thus far chosen not to. Regardless, Costco's dividend is ultra-safe, but of course, the yield is unattractive.

Costco's competitive advantage is in its leadership position in a category it created and as Sam's Club closes stores, that position should strengthen. It is not immune from a recession, but damage during the Great Recession was slight. Costco thrived during the worst of the pandemic recession and appears to have come out stronger than it entered.

Final Thoughts & Recommendation

Costco is a high growth stock that is trading ahead of our estimate of fair value. We forecast 0.7% total annual returns over the next five years, as the company's impressive growth rate of 9% drives returns, with the 0.5% yield and large valuation headwind offsetting each other. Shares offer weak prospective returns, and we're moving from hold to sell.
