Overview & Current Events

Morgan Stanley is a financial holding company that provides various financial products and services to corporations, governments, financial institutions, and individuals worldwide. The company operates through Institutional Securities, Wealth Management, and Investment Management segments, including offering capital raising and financial advisory services, underwriting of debt, equity, and other securities, as well as advice on mergers and acquisitions. Morgan Stanley is headquartered in New York, New York.

On June 28th, Morgan Stanley increased its dividend by 8.8% to a quarterly rate of \$0.925.

On July 16th, 2024, Morgan Stanley reported its Q2 results for the period ending June 30th, 2024. Results continued to improve, with the capital markets environment seeing positive momentum lately. Specifically, due to more favorable market conditions, the investment banking segment's revenues rose 50% over Q2-2023. Fixed Income net revenues recorded a noteworthy 16% increase compared to a year ago as well, driven by higher results in credit.

Earnings-per-share for the quarter landed at \$1.82, up 47% compared to the previous year. This metric was boosted by stock buybacks, with management continuing to execute its share repurchase program. They bought back \$0.8 billion worth of stock during the quarter, leading to the company's share count declining by 2% year-over-year. We now expect earnings-per-share of \$6.96 for fiscal 2024.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$1.64	\$2.97	\$2.98	\$3.14	\$4.81	\$5.26	\$6.46	\$8.03	\$6.15	\$5.18	\$6.96	\$10.23
DPS	\$0.40	\$0.60	\$0.75	\$0.95	\$1.15	\$1.35	\$1.40	\$2.10	\$2.95	\$3.25	\$3.70	\$5.44
Shares¹	1,924	1,909	1,849	1,780	1,708	1,617	1,810	1,772	1,675	1,627	1,619	1,400

Coming out of the Great Financials Crisis, Morgan Stanley's profitability surged. Earnings growth has lagged in 2022 and 2023. This was due a tough macroeconomic landscape that persisted at the time. Interest rates continue to remain high to this date. However, with inflation easing and rates likely to see cuts this year, financial deal making has already risen, driving EPS growth for the company this year.

In general, though, Morgan Stanley earnings continue to benefit from the acquisitions of E-Trade and Eaton Vance that took place back in 2021. The company's cash flow is now more stable, thanks to a shift in its revenue stream. Instead of relying on interest rates and market activity, the acquisitions allowed Morgan Stanley to generate steady management fees from E-Trade and Eaton Vance's recurring customer charges. Additionally, the focus on buybacks has contributed to the boost in EPS and shareholder value creation, with the company retiring about 15% of its shares since 2014, despite a 14% increase in share count to fund the acquisitions.

To generously reward shareholders, Morgan Stanley's board has approved notable dividend increases in recent years. A notable 100% surge took place in 2021 and subsequent hikes of 10.7%, 9.7%, and 8.8% in 2022, 2023, and 2024, along with strong buybacks, showcases their intent for maintaining robust shareholder returns.

¹ Share count is in millions.

Morgan Stanley (MS)

Updated July 17th, 2024 by Nikolaos Sismanis

Backed by favorable growth catalysts, including ongoing buybacks and improving conditions in the capital markets, we have set both our EPS and DPS growth expectations at 8%.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	21.1	11.4	11.3	15.9	9.7	8.5	12	11.2	13.8	16.2	15.3	14.0
Avg. Yld.	1.2%	1.8%	2.2%	1.9%	2.5%	3.0%	2.4%	1.8%	3.5%	3.9%	3.5%	3.8%

Morgan Stanley's valuation has hovered at quite reasonable levels throughout the decade. Shares are currently trading at 15.3 times our expected FY2024 earnings, which we believe slightly overvalues the business. The 3.5% yield is at the high-end of the stock's historical range. However, with interest rates remaining elevated, investors ought to require a higher risk premium from equities, even with expected cuts on the way.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	24%	20%	25%	30%	24%	26%	22%	26%	48%	63%	53%	53%

Morgan Stanley's current dividend should be quite safe. The company was previously forced to cut its dividend during the Great Financial Crisis. However, as its revenues have been transitioning continuously to the asset management side, we believe that the bank's performance should be able to come out solid in a potential future recession.

Morgan Stanley's resiliency was proven during the pandemic, with the banks producing excellent financials and executing confident, huge acquisitions. Its competitive advantage lies in its sheer size, currently being the second-biggest wealth management U.S. firm only behind Bank of America.

Interest rates remaining elevated and the fact that Morgan Stanley operates in a massively competitive industry with consistently declining expense rates (e.g., near-zero fee ETFs) are two risks to keep in mind.

Final Thoughts & Recommendation

Morgan Stanley's results have started to improve following a gradually more favorable capital markets landscape. We expect annualized returns of 9.6% from the investment banking giant through 2029, stemming from our forecasted growth and the 3.5% yield, offset by the possibility of a modest valuation headwinds. We continue to rate MS as a buy.
