Overview & Current Events

State Street Corporation is a Boston based financial services company which traces its roots back to 1792. It trades under the ticker STT and has raised its dividend for 15 consecutive years. State Street is one of the largest asset management firms in the world, with \$4.4 trillion of assets under management and \$44 trillion of assets under custody and administration. The company trades with a market capitalization of \$23.8 billion.

In September of 2021, State Street announced the acquisition of Brown Brothers Harriman Investor Services for \$3.5 billion but the two companies agreed to cancel the deal on November 30th, 2022 due to regulatory hurdles.

In mid-July, State Street reported (7/16/24) financial results for the second quarter of fiscal 2024. Net interest income grew 6% thanks to higher investment yields and fee revenues grew 2% over last year's quarter. Moreover, assets under custody or administration and assets under management grew 12% and 16%, respectively, thanks to higher quarter-end market levels and cash inflows. Earnings-per-share dipped -1%, from \$2.17 to \$2.15, mostly due to higher operating costs, but exceeded the analysts' consensus by \$0.12. State Street has exceeded the analysts' estimates in 21 of the last 22 quarters. Thanks to its positive performance and outlook, State Street just announced a 10% dividend raise and thus it has raised its dividend by 10% for four consecutive years. Moreover, it has announced a share repurchase program of \$5.0 billion with no expiration date, enough to reduce its share count by 21%. However, the bank also issues a significant amount of new shares. We still expect earnings-per-share of \$7.60 this year.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$4.53	\$4.77	\$5.40	\$5.67	\$6.89	\$6.00	\$6.78	\$7.52	\$7.41	\$7.66	\$7.60	\$8.81
DPS	\$1.16	\$1.32	\$1.44	\$1.60	\$1.78	\$1.98	\$2.08	\$2.18	\$2.40	\$2.66	\$3.04	\$3.92
Shares²	432	414	396	380	376	374	357	358	364	310	290	250

State Street has grown its earnings-per-share at a 6.0% average annual rate over the last decade. Going forward, we see the ability for continued growth thanks to the organic growth of equity flows and acquisitions. We consider this a defensive, low-risk stock, which is appropriate for those looking for stable dividend income that can grow faster than inflation in the upcoming years.

In the past few years, State Street has benefitted from new equity inflows as well as a market rally. The bank's asset management business, State Street Global Advisors, also benefitted from stock market gains and flows into ETFs. The firm will rely on the growth of flows into the equity market as well as acquisitions. Management claims to need about \$1.5 trillion in new assets under custody annually to stick to growth targets.

State Street has announced the repurchase of \$5.0 billion of shares, with no expiration date. This amount represents 21% of the current share count. Organic earnings growth has been about 2.4% per year, while the share count has contracted by -3.6% per year over the last decade. Due to a somewhat high comparison base formed by almost record earnings-per-share this year, we expect 3% average annual growth of earnings-per-share over the next five years.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	15.4	16.6	12.9	14.7	14.1	11.2	10.4	11.3	10.3	9.7	11.2	12.5
Avg. Yld.	1.6%	1.8%	2.2%	1.8%	2.0%	3.1%	3.2%	2.6%	3.1%	3.6%	3.6%	3.6%

State Street is currently trading at price-to-earnings ratio of 11.2, which is lower than its 10-year average of 12.7. The cheap valuation has resulted primarily from the effect of high interest rates on the present value of future earnings and a high cost of deposits. We view these headwinds as temporary and assume a fair price-to-earnings ratio of 12.5 for this stock. If the stock trades at its fair valuation level in five years, it will enjoy a 2.2% annualized valuation tailwind.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	26%	28%	27%	28%	26%	33%	31%	29%	32%	34%	40%	44%

State Street has a conservative payout ratio of 40%, with stable earnings and a solid track record. It is one of the market leaders in its industry of asset management and asset servicing. It also benefits from its economies of scale, which pose a formidable barrier to new entrants. However, competition with names like Vanguard, BlackRock, and Bank of New York Mellon, all of which are lowering fees to attract investor funds, limits the growth potential within this space. A recessionary environment may lower profits but it is unlikely to endanger the dividend or the firm.

Final Thoughts & Recommendation

The stock of State Street has rallied 28% in the last 12 months and thus it has become somewhat less attractive. We remain confident in the long-term prospects of the company. State Street could offer an 8.5% average annual return over the next five years thanks to 3.0% earnings-per-share growth, a 3.6% starting dividend yield and the potential for a 2.2% annualized valuation tailwind. While the stock remains attractive, we lower our rating from “buy” to “hold”.
