Overview & Current Events

Kinder Morgan, Inc., in its current form, conducted its initial public offering on 2/10/11. Today, the company is among the largest energy companies in the U.S. It is engaged in storage and transportation of oil and gas, and other products. It owns an interest in or operates approximately 83,000 miles of pipelines and 144 terminals. Its pipelines transport natural gas, refined petroleum products, crude oil, carbon dioxide (CO2) and more. Kinder Morgan's transportation assets operate like a toll road, whereby the company receives a fee for its services, which generally avoids commodity price risk. Approximately 90% of Kinder Morgan's cash flow is fee-based.

On July 17, 2024, Kinder Morgan, Inc. (NYSE: KMI) reported its financial results for the second quarter of 2024. The company's earnings per share (EPS) stood at \$0.25, consistent with the same quarter in 2023, but slightly missing analyst estimates by a small margin. The company generated revenue of \$3.57 billion, which was a 2.03% year-over-year increase but fell short of expectations by \$520.35 million. In addition to its financial performance, Kinder Morgan's board of directors approved a cash dividend of \$0.2875 per share for the second quarter, which represents an annualized dividend of \$1.15 per share. This dividend marks a 2% increase over the second quarter of 2023 and will be payable on August 15, 2024, to stockholders of record as of July 31, 2024. Kinder Morgan reported second-quarter earnings per share of \$0.26 and distributable cash flow (DCF) per share of \$0.49, the latter representing a 2% increase compared to the second quarter of the previous year. The company achieved a net income attributable to KMI of \$575 million, slightly down from \$586 million in the same period last year, while the DCF for the quarter increased to \$1.1 billion from \$1.076 billion in Q2 2023. Richard D. Kinder, Executive Chairman of Kinder Morgan, highlighted the company's strong operational and financial performance, with a focus on internally funding high-quality capital projects. The company generated \$1.7 billion in cash flow from operations and \$1.1 billion in free cash flow (FCF) after capital expenditures. Kinder also welcomed Amy Chronis to her first KMI board meeting, emphasizing her financial acumen and knowledge of the energy industry.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
DCFPS³	\$2.00	\$2.14	\$2.02	\$2.00	\$2.12	\$2.19	\$2.02	\$2.40	\$2.22	\$2.10	\$2.25	\$2.55
DPS	\$1.70	\$1.93	\$0.50	\$0.50	\$0.72	\$1.00	\$1.05	\$1.07	\$1.10	\$1.13	\$1.15	\$1.29
Shares⁴	2125	2229	2230	2217	2216	2200	2200	2267	2248	2219	2220	2200

Kinder Morgan's biggest growth catalysts for the future are new pipeline and terminals projects. Natural gas is a compelling growth catalyst and continued to drive growth in the first half of this year. Natural gas is rapidly replacing coal, which gives Kinder Morgan a major advantage. Unfortunately for them, new pipeline projects face severe political headwinds for the foreseeable future so growth for the company will likely slow significantly.

Kinder Morgan, Inc. (KMI)

Updated August 21st, 2024 by Samuel Smith

The company plans to continue investing in growth projects in 2024 and they expect to fully fund it with internally generated cash flow without the need to access capital markets. For 2024, we expect Kinder Morgan to generate DCF per share of approximately \$2.25. We expect the company's DCF per share to increase steadily over the next half decade due to continued incremental growth projects and share repurchases.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg P/DCF	21.2	7	10.3	9	8.8	9	4.9	7.3	7.9	8.0	9.3	8.5
Avg. Yld.	4.0%	12.9%	2.4%	2.8%	3.9%	5.1%	10.6%	6.1%	6.3%	6.6%	5.5%	6.0%

Since Kinder Morgan, Inc. became a publicly traded stock its valuation has fluctuated wildly. During the heyday of the oil and gas industry of 2011-2014, Kinder Morgan held a very high valuation, but when the oil and gas markets entered a downturn and Kinder Morgan cut its dividend, the stock valuation dramatically contracted. If energy prices remain elevated for an extended period of time, Kinder Morgan stock could return to its 10-year average valuation.

However, a more conservative view values KMI at a price-to-DCF ratio of 8.5 given the relatively low growth rate and elevated interest rate environment. This is a reasonable estimate of fair value now that Kinder Morgan is on more solid financial ground and has returned to dividend growth. As a result, we view the stock as being fairly valued right now.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	85.0%	90.2%	24.8%	25.0%	34.0%	45.7%	52.0%	44.6%	49.5%	53.8%	51.1%	50.6%

Kinder Morgan operates in the cyclical energy sector, but its business model still enables it to generate fairly stable cash flows. Kinder Morgan has a fairly low interest coverage ratio, and its elevated level of debt prompted the company's dividend cut in 2016. The good news is the new dividend payout level seems to be secure, and the company utilized the savings from the dividend reduction to pay down debt and improve its balance sheet. Kinder Morgan has been deleveraging and the company received a credit rating upgrade from Standard & Poor's and Moody's.

Kinder Morgan has significant network and economies of scale competitive advantages as one of the largest energy companies in the U.S. and the largest natural gas transporter, moving approximately 40% of the natural gas used in the U.S. It is also the largest independent transporter of petroleum products and carbon dioxide, and the largest independent terminals operator.

Final Thoughts & Recommendation

Kinder Morgan is coming off a multi-year turnaround. The company took on too much debt, which forced it to cut its dividend when capital markets closed off during the oil and gas industry downturn of 2014-2016. Now that the company is back on track, the stock is once again somewhat attractive for value and income. The combination of the 5.5% dividend yield and expected steady per share distributable cash flow growth could result in annualized total returns of 5.8% per year through 2029, which earns Kinder Morgan a Hold recommendation at current prices.
