Overview & Current Events

Otter Tail Corporation goes back to 1907 with its electric utility, which was founded in Fergus Falls, MN. The company eventually expanded into metal fabrication and plastics manufacturing and today, it generates over \$1 billion in annual revenue split between utility, manufacturing and plastics operations. Otter Tail has a \$3.6 billion market capitalization.

Otter Tail Corporation (OTTR) reported solid financial results for the second quarter ending June 30, 2024, with a 6% increase in diluted earnings per share to \$2.07 compared to the same quarter in 2023. Although the company experienced a revenue shortfall, reporting \$342.34 million, which was \$25.36 million below expectations, it raised its 2024 earnings guidance midpoint by 8% to \$6.92 per share, representing a return on equity of 18.7%. Additionally, the Minnesota Public Utilities Commission approved Otter Tail's Integrated Resource Plan, paving the way for the addition of solar, wind, and battery storage capacities by 2029. President and CEO Chuck MacFarlane expressed satisfaction with the quarterly performance, especially amid changing market conditions. The Plastics segment demonstrated strong growth with a 9% increase in earnings, driven by higher sales volumes and robust end-market demand, although this was partially offset by lower sales prices. The Manufacturing segment saw a 15% increase in earnings, primarily due to improved margins at BTD Manufacturing, despite a decline in sales volumes. However, the Electric segment's earnings decreased by 6%, largely due to unfavorable weather conditions affecting sales. The approval of the Integrated Resource Plan allows Otter Tail Power to enhance its renewable energy portfolio while designating part of the Coyote Station for emergency use, ensuring both reliability and emissions reduction. Despite strong performance in the Manufacturing segment, Otter Tail anticipates softer market conditions in the latter half of 2024, and is taking steps to manage costs in response to potential challenges. The Plastics segment continues to outperform expectations, with strong customer demand and slower-than-anticipated declines in PVC pipe sales prices. Otter Tail declared a quarterly common stock dividend of \$0.4675 per share, payable on September 10, 2024. For the first half of 2024, the company generated \$223.5 million in operating cash flows, an increase from \$184.5 million in 2023, largely driven by the Plastics segment's increased earnings. Investing activities included \$175.5 million in capital expenditures, focusing on the Electric segment and manufacturing facility expansions. Financing activities saw the issuance of \$120 million in long-term debt and the repayment of short-term borrowings, resulting in total available liquidity of \$548.7 million.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$1.55	\$1.56	\$1.60	\$1.86	\$2.06	\$2.15	\$2.34	\$4.23	\$6.78	\$7.00	\$5.00	\$4.25
DPS	\$1.21	\$1.23	\$1.25	\$1.28	\$1.34	\$1.40	\$1.48	\$1.56	\$1.65	\$1.75	\$1.87	\$2.40
Shares³	37.4	38.0	39.4	39.6	39.7	40.2	41.5	41.6	41.6	41.7	41.8	42

Otter Tail's earnings-per-share history has been fairly strong in the last decade, as earnings bottomed in 2010 and have grown every year since. We see earnings per share declining at a 3.2% annualized pace going forward after a strong

Otter Tail Corporation (OTTR)

Updated August 20th, 2024 by Samuel Smith

jump up in earnings from 2020 to the present level. The company’s manufacturing and plastics businesses have benefited from higher order rates as well as a lower income tax rate, while seeing gross margins tick higher over time. The higher operating expenses seen in prior quarters are uncharacteristic for Otter Tail, so we don’t see any long-term impairment just yet. We see all of these factors as continuing until further notice and as a result, earnings should decline steadily in the coming years. Otter Tail’s full rate case in South Dakota is still pending, but the company has a favorable relationship with its regulators, so we are optimistic that Otter Tail will continue to receive the rate increases it needs to grow revenue.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	18.8	18.2	20.2	22.1	22.2	24.2	17.4	17.5	8.1	13.4	17.5	15.0
Avg. Yld.	4.1%	4.2%	4.3%	3.9%	3.1%	2.9%	2.7%	3.6%	2.5%	2.8%	2.1%	3.8%

The stock’s price-to-earnings multiple has moved significantly lower in recent years after being artificially inflated due to low earnings-per-share from 2008 to 2011. However, today’s multiple of 17.5 is below its recent historical norm of 20 and above our fair value estimate of 15, and as such, we see the stock as overvalued. We think shares will return to a multiple of roughly 15 over time, producing a headwind to total returns moving forward.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	78%	79%	78%	69%	65%	65%	63%	37%	24%	25%	37%	56%

Otter Tail’s payout ratio is generally around two-thirds of earnings and we don’t expect that will change longer-term. However, bumper earnings this year has the payout ratio much lower temporarily. The company continues to boost its payout at roughly the same rate as earnings, so the dividend is quite safe and should continue to move higher over time. Otter Tail’s competitive advantage of having a diversified business model is also its disadvantage during recessions. The non-utility businesses are providing strong growth today but during the last recession, earnings fell much more than expected for a pure utility. That will likely happen next time there is a downturn, so investors should keep this in mind.

Final Thoughts & Recommendation

We see Otter Tail as a stock that offers -3.1% annualized total return potential moving forward along with a safe 2.1% dividend yield that will grow slowly but steadily over time. As a result, it looks like an unattractive investment at the moment, making it a Sell.
