Overview & Current Events

Principal Financial Group is a financial corporation that operates several businesses including insurance, primarily life insurance, and investment management, retirement solutions and asset management. Principal Financial Group was founded in 1879, and is headquartered in Des Moines, IA.

Principal Financial Group reported its second quarter earnings results on July 25. Principal Financial Group saw its assets under management increase to \$699 billion, which does not include additional assets that are solely under administration. AuM increased year-over-year due to the equity market performance. Principal Financial's successful management of the assets of its customers continued, as 80% of AuM outperformed their peer average over the last five years, which should help attract new client money for Principal Financial in the long term. The company saw its Retirement and Income Solutions business experience a 10% revenue increase on a year-over-year basis.

Principal Financial Group generated earnings-per-share of \$1.63 during the second quarter, which missed the consensus estimate by \$0.22. Earnings-per-share were up 7% compared to the previous year's quarter on an adjusted basis. During 2021, profits rose to a new record level, but 2022 and 2023 were slightly weaker years, as profits pulled back at a low single digit rate. It is expected that 2024 will be a new record year for the company, as Principal Financial Group expects its earnings-per-share to grow by around 15% this year.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$4.41	\$4.26	\$4.55	\$5.04	\$5.53	\$5.58	\$4.94	\$6.77	\$6.66	\$6.55	\$7.50	\$9.57
DPS	\$1.28	\$1.50	\$1.61	\$1.87	\$2.13	\$2.18	\$2.24	\$2.44	\$2.56	\$2.68	\$2.88	\$3.85
Shares¹	299	298	288	289	285	281	277	269	249	241	235	210

Principal Financial Group recorded a highly compelling average annual earnings-per-share growth rate of 12% between 2008 and 2019. Growth was a bit uneven, though, as there were some years where the company's profits declined.

The company's asset management business, where Principal Global Investors and Retirement & Income Solutions are the main components, has benefitted from solid assets under management (AuM) growth in the past. A rising number of new customers also helps drive AuM, in addition to market appreciation in normal times. Net inflows and market appreciation allowed Principal Global Investors to report AuM growth during each of the last couple of quarters, except for Q1 of 2020, which was impacted by the coronavirus-caused equity market downturn. The company's asset management business is attractive for investors, as Principal's actively-managed funds, ETFs, and other vehicles performed better than the median of their asset class in most cases in the past. As Principal has produced above-average returns for its customers, new customers are attracted to letting Principal manage their wealth, which serves as a competitive advantage versus other asset management companies with a weaker track record. With its insurance business, Principal Financial Group has been able to grow its premiums and fees in the past, and a growing float that can be invested should result in rising investment income over the next couple of years. Principal Financial Group has also boosted its earnings-per-share growth by repurchasing shares in the past and plans to do the same going forward.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	11.2	11.9	10.1	12.8	8.0	10.0	9.7	10.6	12.6	12.1	10.0	11.0
Avg. Yld.	2.6%	3.0%	3.5%	2.9%	4.9%	3.9%	4.7%	3.4%	3.0%	3.4%	3.8%	3.7%

Principal Financial Group trades at around 10 times 2024's earnings-per-share estimate right now, which is on the lower end compared to how the company's shares were valued over the last decade. We believe that this is slightly below fair value and that Principal Financial Group's shares have some upside potential. The dividend yield of 3.8% provides solid income for investors.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	29.0%	35.2%	35.4%	37.1%	38.5%	39.1%	45.3%	36.0%	38.4%	40.9%	38.4%	40.3%

Principal Financial Group has grown its dividend considerably over the last decade, which was partially possible due to earnings-per-share growth, but which was also due to an increase in the company's dividend payout ratio. The dividend payout ratio remains below 40%, which makes us believe that the dividend is quite safe.

The strong performance and ratings of Principal Financial Group's actively managed funds, ETFs, and other products is a competitive advantage, as this increases the likelihood of customers choosing Principal to manage their assets. Principal Financial Group's stock was extremely volatile during the last financial crisis, but its actual underlying performance was not impacted much. Operating earnings declined by just 10% from 2007 to 2008 and started to rise again in 2009. This compares very favorably to the much weaker performance of many other financial companies during that time.

Final Thoughts & Recommendation

Principal Financial Group has generated compelling earnings-per-share growth and dividend growth throughout the last decade. Relative to its peers from the financial industry, Principal Financial Group has been reasonably resilient to recessions and market downturns, although the company is not immune to such macro problems. Based on current estimates, the total return outlook over the coming years is compelling, which is why we rate Principal Financial Group a buy at the current share price.
