Overview & Current Events

Unilever is one of the largest consumer goods companies in the world, producing and marketing ~400 brands in nearly 200 countries. Well-known brands include Ben & Jerry's, Q-tips, Vaseline, Axe, Dove, Hellmann's, Knorr and many more. Its products are used by more than 3 billion people every day. It has a market capitalization of \$150 billion.

On January 15th, 2022, GlaxoSmithKline (GSK) announced that it rejected an offer from Unilever to acquire its consumer healthcare business for \$68 billion. Due to the size of the acquisition and the rich valuation of the takeover target, the stock of Unilever plunged -17% on that day. However, Unilever later stated that it will not pursue any major acquisitions.

On January 23rd, 2022, activist hedge fund Trian announced that it bought a material stake in Unilever. Trian bought a stake in Procter & Gamble (PG) a few years ago, when the company had stalled. The fund pursued a major restructuring and the stock of Procter & Gamble has nearly doubled since then. We view this news as positive for the future growth of Unilever. The stock jumped 8% on the day of the announcement of the stake of Trian.

In late July, Unilever reported (7/25/24) sales for the first half of fiscal 2024. The company grew its underlying sales 4.1% over the prior year thanks to 1.5% price hikes and 2.6% volume growth. The 30 most powerful brands grew their sales 5.7% and thus comprised about 75% of total sales. The strong brands of the company have enabled it to raise prices aggressively without a significant effect on volumes. While volumes improved vs. the last several quarters, growth of total sales moderated due to modest price hikes. Management obviously realized that it could not keep raising prices at a fast pace any longer. Unilever reiterated its guidance for sales growth of 3%-5% in 2024 and a modest improvement in operating margin, in line with its long-term guidance. It is also in the early stages of its previously announced restructuring program that aims to reinvigorate growth of its most powerful brands and reduce costs.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$2.17	\$1.88	\$1.92	\$2.59	\$2.79	\$2.86	\$2.88	\$3.00	\$2.76	\$2.80	\$2.90	\$3.70
DPS	\$1.51	\$1.32	\$1.40	\$1.55	\$1.78	\$1.81	\$1.85	\$2.03	\$1.80	\$1.85	\$1.91	\$2.27
Shares¹	2883	2855	2854	2814	2652	2628	2627	2592	2553	2528	2500	2400

Unilever has stated that it will pursue growth aggressively in some emerging markets in Asia, such as India, China, Vietnam, Bangladesh, Pakistan and Myanmar. These markets are characterized by rapidly growing populations and an emerging middle class and thus they are very promising.

Unilever has grown its earnings-per-share at a 2.9% average annual rate in the last decade. Due to the currency challenges in Latin America, the pandemic and high cost inflation, growth has decelerated in the last five years. However, we view these headwinds as temporary and expect the company to return to its multi-year growth trajectory this year. Management has provided guidance for 3%-5% adjusted annual revenue growth in the long run. As the company will also boost earnings-per-share via expansion of the operating margin and share repurchases, we are forecasting 5.0% growth over the next five years.

¹ In millions.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	19.6	22.9	23.1	20.3	19.6	20.6	19.8	18.8	17.1	18.1	20.7	18.0
Avg. Yld.	3.5%	3.1%	3.1%	2.9%	3.3%	3.1%	3.2%	3.6%	3.8%	3.7%	3.2%	3.4%

Unilever has rallied 24% this year and thus it is now trading at a price-to-earnings ratio of 20.7, which is slightly higher than its 10-year average of 20.0. If the stock trades at our assumed fair price-to-earnings ratio of 18.0 in 2029, it will incur a -2.7% annualized drag in returns. As we have noted in previous reports, investors should not expect to find Unilever at a much cheaper valuation, as it almost always trades at a premium thanks to its strong brands and its resilience to recessions.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	69.6%	70.2%	72.9%	59.8%	63.8%	63.3%	64.2%	67.7%	65.2%	66.1%	65.9%	61.3%

Unilever has a significant competitive advantage, namely the strength of its brands. The company generates ~80% of its sales from the #1 or #2 position in its markets. Thanks to the strength of its brands and its great execution in its growth initiatives, Unilever has always enjoyed strong and reliable free cash flows and has proven much more resilient to recessions than the vast majority of stocks. As a result, Unilever has been able to raise its dividend for 42 consecutive years. Note that this dividend history reflects the company's dividend payments *in Euros*. U.S. investors may experience year-to-year fluctuations in passive income due to foreign exchange fluctuations.

Final Thoughts & Recommendation

Unilever has rallied 24% this year and hence it has become less attractive. It could offer a 5.2% average annual return over the next five years thanks to 5.0% earnings-per-share growth and its 3.2% dividend, partly offset by a -2.7% valuation drag. While this stock almost always trades with a premium valuation, we view its current valuation as somewhat unattractive.
