Overview & Current Events

Xcel Energy's roots go back more than a century to three predecessor companies: Northern States Power, Southwestern Public Service Company, and Public Service Company of Colorado. In 1997, Public Service Company of Colorado and Southwestern Public Service Company merged to become New Century Energies, and then in 2000 the company merged with Northern States Power to form Xcel Energy. The company operates in eight Western and Midwestern states in the U.S. Its revenue is obtained mostly through two broad segments: regulated electric utilities (80% of total revenue last year) and regulated natural gas utilities. Xcel Energy is an industry leader in delivering renewable energy and in reducing carbon emissions. It currently has a market capitalization of \$34 billion.

On February 21st, 2024, Xcel announced a \$0.5475 quarterly dividend, marking a 5.3% raise year-over-year.

In early August, Xcel reported (8/1/2024) financial results for the second quarter of fiscal 2024. Operating earnings-per-share grew 4% over the prior year's quarter, from \$0.52 to \$0.54, thanks to rate hikes and warmer than normal weather, which more than offset the effect of higher interest expense and depreciation. Xcel reiterated its positive guidance for 2024, expecting earnings-per-share of \$3.50-\$3.60. At the mid-point, this guidance implies 6% growth, in line with the historical growth of the utility.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$2.03	\$2.10	\$2.21	\$2.30	\$2.47	\$2.64	\$2.79	\$2.96	\$3.17	\$3.35	\$3.57	\$4.78
DPS	\$1.20	\$1.28	\$1.36	\$1.44	\$1.52	\$1.62	\$1.72	\$1.83	\$1.95	\$2.08	\$2.19	\$2.93
Shares¹	506	508	507	508	514	525	528	540	547	554	560	580

Xcel Energy's earnings-per-share have risen relatively consistently throughout the last decade, with an average growth rate of 5.7% per year. The last time Xcel had negative growth was in 2004-2005 when it saw a -5.5% decline in earnings-per-share. During the last financial crisis (2008-2009), Xcel was still able to grow its bottom line, despite a contracting economy. Given the guidance for this year, it appears that Xcel is poised to continue growing consistently.

Xcel is focused on converting to renewable energy sources to supply power to customers and aims to be the industry's leading renewable energy provider. It has received regulatory approval in Colorado and the Upper Midwest to "dramatically increase the renewable energy available to our customers while retiring all coal-fired plants." In addition, Xcel is taking advantage of energy tax provisions in the Inflation Reduction Act. We expect growth from renewable energy sales and replacement of aging infrastructure to drive an average annual growth rate of 6.0% until 2029.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029

Xcel Energy Inc. (XEL)

Updated August 26th, 2024, by Aristofanis Papadatos

During the past decade, Xcel Energy has traded hands with an average P/E ratio of 19.9. We believe that a fair earnings multiple for this stock is 18.0, taking into consideration the high quality of the company, but average growth prospects. The stock is currently trading at a P/E ratio of 16.8. If it trades at our assumed fair valuation level in five years, it will enjoy a 1.4% annualized valuation gain.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	59%	61%	62%	63%	62%	61%	62%	62%	62%	62%	61%	61%

Xcel Energy's dividend appears safe. Dividend payouts have been steadily growing since 2003. The company has raised its dividend by 5.3% this year. As a regulated utility, Xcel has revenue that is protected by local regulators and thus it enjoys reliable and fairly predictable earnings. The company has also been able to keep its payout ratio relatively close to 60% over the past decade, which is where we expect it to remain going forward.

To properly execute its high capital expenditure plans the company will need a favorable regulatory, political, and public environment. The investments that Xcel Energy is making in renewable energy are in line with the trends of regulations; the company has been trying to be an industry leader in reducing carbon emissions, which should give them an upper hand with regulatory, political, and public support.

Final Thoughts & Recommendation

The stock of Xcel has gained 7% since our last research report, in May, primarily thanks to expectations for lower interest rates going forward. High interest rates greatly reduce the present value of future earnings and thus they exert pressure on the valuation of stocks. In addition, they render the yields of utilities less attractive, as investors can find decent yields elsewhere. We view this headwind as temporary. Xcel has put together a very stable operating history, with consistent growth of earnings and dividends over the years. Despite its recent rally, the stock can still offer a 10.6% average annual total return over the next five years, stemming from 6% growth, a 3.7% starting yield and a 1.4% valuation tailwind. It thus maintains its buy rating.
