Overview & Current Events

Curtiss-Wright is an industrial conglomerate founded in 1929. Its focus is engineered aviation and defense products, but it operates in other end markets. The company sells electronics, control systems, sensors, actuators, flight test instrumentation, computer modules, avionics, coolant pumps, motors, landing systems, turbines, generators, etc. The company operates in three segments: Aerospace & Industrial, Defense Electronics, and Naval & Power. Aerospace & Defense markets comprise 68% of sales, while Commercial markets are 32%. Total revenue was \$2,845M in 2023.

Curtiss-Wright reported Q2 FY 2024 results on August 8th, 2024. Companywide revenue increased 11% to \$785M from \$704M, while adjusted diluted earnings per share rose 24% to \$2.67 from \$2.15 on a year-over-year basis. Diluted EPS rose to \$2.58 from \$2.10. The top and bottom lines grew because of growth in all three segments, especially in the aerospace and defense markets, and a rising naval backlog. The Aerospace & Industrial segment revenue grew 3% to \$233M from \$226M in comparable periods on higher commercial aerospace but lower industrial sales. The Defense Electronics segment revenue climbed 16% to \$228M from \$198M on greater aerospace and ground defense sales. The Naval & Power segment revenue increased 15% to \$323M from \$280M on greater naval and aerospace defense and commercial nuclear aftermarket sales.

The firm has \$995M in new orders, an 18% increase. The book-to-bill ratio was 1.3X. The total backlog is \$3.2B, up 13%. The company raised 2024 guidance to 6% to 8% sales growth and adjusted diluted EPS to \$10.40 to \$10.65.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$3.46	\$3.74	\$4.20	\$5.03	\$6.38	\$7.27	\$6.87	\$7.34	\$8.13	\$9.38	\$10.58	\$15.55
DPS	\$0.52	\$0.52	\$0.52	\$0.56	\$0.60	\$0.66	\$0.68	\$0.71	\$0.75	\$0.79	\$0.84	\$1.07
Shares¹	49.1	47.6	45.0	44.8	44.3	43.0	42.0	40.6	38.6	38.5	38.4	37.9

Curtiss-Wrights' revenue has grown in the past decade driven by mainly organic growth and several acquisitions with some minor downturns in a few years. The company usually acquires another a tuck-in business every year in average to enhance its product portfolio. The firm acquired Keronite and Safran Aerosystems Arresting Company in 2022, Pacific Star Communication in 2020, and 901D Holdings and Tactical Communications in 2019. This strategy has proven successful over time, and earnings per share has climbed annually except in 2020 without excessive leverage or a higher share count.

We are expecting revenue and earnings per share to grow at ~8% annually on average because of organic growth, periodic acquisitions, and a lower share count.

The company is returning cash to shareholders by share repurchases and dividends. It has paid a dividend since 1989 and has an 8-year streak of increasing it. The payout ratio is extremely conservative at approximately 8%, leaving significant room for future growth. It also provides investor's confidence about the dividend safety in a cyclical industry. We conservatively estimate an ~5% growth rate per year, which is near the 5-year average.

¹ Share count in millions.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	19.4	17.5	22.6	23.5	15.6	18.9	16.7	18.7	20.4	23.7	28.4	20.0
Avg. Yld.	0.8%	0.8%	0.5%	0.5%	0.6%	0.5%	0.6%	0.5%	0.5%	0.4%	0.3%	0.3%

Curtis-Wright's share price is up substantially for the year based on strong demand and operational execution. We set our fiscal year 2024 earnings estimate near the mid-point of updated guidance and accounting for solid execution. Our fair value multiple is 20X, which is near the 5-year and 10-year averages. Our fair value estimate is now \$212. Our 5-year price target is now \$311.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	15%	14%	12%	11%	9%	9%	10%	10%	9%	8%	8%	7%

Curtiss-Wright's competitive advantage is its long history in the aerospace and defense markets. The firm also has advantages related to defense contracting, which often requires knowledge of acquisition regulations and accounting standards, particularly for large programs. The company develops and manufactures complex and bespoke systems for the DoD requiring a skilled work force with security clearances that is not easily replicated.

The company is not recession resistant. Its defense and naval portfolio are dependent on federal budgets and programs that can be cut. Also, commercial aviation and industrial markets are cyclical and can decline during recessions.

The company makes conservative use of debt. It has \$90M in current long-term debt, \$959.7M of long-term debt that is offset by \$382.6M of cash and equivalents. Interest coverage is about 12.3X, and the leverage ratio is about 1.1X.

Final Thoughts & Recommendation

At present, we are forecasting 1.0% annualized total return over the next five years from a dividend yield of 0.3%, 8% EPS growth, and -6.8% P/E multiple contraction. Curtiss-Wright is performing well because of demand in its Aerospace and Defense markets and operational execution. It is returning cash to shareholders through share repurchases and growing dividends supported by a conservative balance sheet. However, the current share price discounts much of the gains we envision over the next five years. We initiate coverage with a sell rating.
