Overview & Current Events

National Bank of Canada (or simply National Bank) is the sixth-largest bank in Canada behind the Big Five banks with Royal Bank of Canada (RY) and Toronto-Dominion Bank (TD) leading at the top. National Bank's historical roots go as far back as 1859. Since 1993, it has maintained or increased its dividend per share every year in CAD\$. All figures in this report are in U.S. dollars unless otherwise specified.

The bank reported strong results for fiscal Q3 2024 on 08/28/2024, reflecting diversified earnings mix, a solid credit profile, and disciplined execution across its businesses. For the quarter, National Bank reported revenue growth of 20% to C\$3.0 billion and net income growth of 24% to C\$1.0 billion. Earnings per share ("EPS") was C\$2.89, an increase of 24%. The adjusted revenue rose 17% to C\$3.0 billion and adjusted net income climbed 23% to C\$960 million, while the adjusted EPS climbed 23% to C\$2.68. Although provision for credit losses (PCL) was higher, the PCL as a percentage of average loans and acceptances was 0.25%, which was still manageable. For the quarter, National Bank's return on equity ("ROE") of 18.4% improved from 16.1% a year ago. The bank's Common Equity Tier 1 ratio was 13.5% which was the same as a year ago.

On June 11th, National Bank announced plans to acquire Canadian Western Bank (CBWBF) for about C\$5 billion, which would expand its commercial footprint in the provinces of British Columbia, Alberta, and Ontario. Canadian Western Bank has had a history of low write-offs, for example, a 5-year average write-off of 0.14% of average loans.

For the fiscal year to date, National Bank's revenue rose 13% to C\$8.5 billion and net income increased by 13% to C\$2.9 billion. The adjusted revenue rose 10% to C\$8.6 billion, while the adjusted net income climbed 11% to C\$2.8 billion. As a result, adjusted EPS rose 11% to C\$7.82. In light of the latest results, we raised our 2024 EPS estimate to US\$7.66.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$3.93	\$3.51	\$3.26	\$4.23	\$4.51	\$4.81	\$4.68	\$7.04	\$7.09	\$7.10	\$7.66	\$10.25
DPS	\$1.65	\$1.52	\$1.63	\$1.77	\$1.84	\$2.00	\$2.11	\$2.26	\$2.78	\$2.95	\$3.26	\$4.36
Shares¹	329	337	338	340	335	334	336	342	337	338	340	350

From 2014 to 2023, National Bank compounded its EPS by 8.8% in CAD\$. But in US\$, National Bank compounded its EPS by 6.8%. These are above average when compared to its bigger peers. Stellar earnings growth would also lead to above-average dividend growth. In the period, its dividend growth rate was 8.7% in CAD\$ but only 6.7% when translated into US\$.

With about 80% revenue exposure to Canada and 55% revenue exposure to Quebec, the bank's growth rate is tied closely to the economic health of Canada and in particular to Quebec. Quebec is the second most populous province in Canada and contributes about 20% of Canada's GDP. National Bank generates about 19% of revenue from the United States and Cambodia, which help contribute to higher growth long term. To be a bit more conservative, we use a 6% EPS growth rate and 6% dividend growth rate through 2029.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	11.4	10.2	12.7	11.6	10.2	11.3	10.1	11.7	10.4	10.1	11.9	11.0
Avg. Yld.	4.0%	4.2%	3.9%	3.6%	4.0%	3.7%	4.5%	3.3%	3.7%	4.1%	3.6%	3.9%

National Bank traded at an average price-to-earnings ratio of 11.0 from 2013-2022. We think that's a fair target P/E for the long term. Using our 2024 EPS estimate, the bank is fairly valued. We don't think its yield will stray far away from 4% for long.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	42%	43%	50%	42%	41%	42%	45%	32%	39%	42%	43%	43%

National Bank has a dominant position in Quebec. It also benefits from the effective regulation of the Canadian banking system. The World Economic Forum has ranked Canada's banks as among the soundest in the world for the past decade or so, which highlights the fact that Canadian banks — National Bank included — are well capitalized and well managed.

Like all financial institutions, the bank's balance sheet primarily consists of debt, largely in the form of deposits.

Compared to the Big Five Canadian banks, National Bank's payout ratio tends to be a tad more conservative. It should keep paying healthy dividends. We believe a dividend growth rate of about 6% through 2029 is possible. The outlook for the bank doesn't look as rosy in the near term due to a more negative macroeconomic outlook on the North American economy, leading to higher provisions for credit losses. However, the bank has navigated through challenging environments such as COVID-19 and the Great Recession before. It has the ability to navigate future recessions as well.

Final Thoughts & Recommendation

We forecast the resilient National Bank with 7.8% in total returns annually over the next five years, consisting of a yield of 3.6%, 6.0% earnings-per-share growth, and a 1.5% headwind from valuation compression. We continue to rate the stock as a hold.
