On October 24th, 2024, Eagle Bancorp Montana announced its financial results for the third quarter of fiscal year 2024, ending September 30th, 2024. For this quarter, the company reported net income of \$1.7 million, consistent with Q2 2024, though lower than the \$2.0 million reported for Q3 2023. Reported earnings per diluted share for the quarter were \$0.22, unchanged from Q2 2024, but down from \$0.26 in the same quarter last year.

The stability in quarterly earnings reflects Eagle Bancorp's effective cost management and focus on asset growth. Total loans increased by 6.8% year-over-year to \$1.52 billion, driven by demand across residential mortgage, commercial real estate, and agriculture loans. Deposits totaled \$1.62 billion, stable from the prior quarter, marking a 2.6% increase year-over-year—a positive indicator for the bank's liquidity and support for loan growth.

Net interest income was steady at \$15.6 million, with support from consistent loan yields. The company's net interest margin (NIM) remained at 3.41%, unchanged from Q2 2024, despite the impact of elevated interest rates.

For Q3 2024, Eagle Bancorp's return on average assets (ROA) was 0.33%, with a return on average equity (ROE) of 4.30%, and the core efficiency ratio held at 85.22%, underscoring efficient expense control.

Credit quality remains robust, with net loan charge-offs totaling \$2,000, and non-accrual loans at 0.34% of gross loans. The allowance for credit losses represented 330.8% of nonperforming loans, reflecting continued prudent credit management. Management anticipates a stable outlook for deposit rates over the coming quarters, supported by a more stable interest rate environment, and expects further improvement in the cost of funds, which should positively impact profitability.
