Overview & Current Events

Morningstar was founded in 1984 as a way for investors to seek information about hundreds of popular mutual funds that was out of reach prior to the company's Sourcebook product. Since that time, Morningstar has grown tremendously, serving about nine million clients. It produces ~\$2.3 billion in annual revenue and has a market capitalization of about \$14 billion.

Morningstar posted third quarter earnings on October 23rd, 2024, and results were slightly better than expected. Adjusted earnings-per-share came in line with estimates at \$2.00. Revenue, however, soared 11% higher year-on-year to \$569 million, and beat estimates by \$13.5 million.

Organic revenue was up 10.5%, driven by most of the company's segments posting gains. Forex translation was minimal during the third quarter.

Operating expenses were up 1.9% to \$454 million during the quarter. On an adjusted basis, they were up 3.7%, which excludes mergers and acquisitions, divestitures, and other non-operational costs. Compensation costs were up \$16 million, which was primarily attributable to higher bonus costs. Technology and infrastructure costs rose as well, adding \$4 million.

Operating income was 22.9% of revenue on an adjusted basis, up sharply from 17.8% a year ago. Net income was up 56% on a per-share, adjusted basis from the year before. In addition, the non-adjusted number included a \$45 million gain on the sale of the company's commodity and energy data business.

We now see \$7.90 in adjusted earnings-per-share for this year, sharply higher than our prior estimate.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$2.54	\$3.00	\$3.72	\$2.88	\$4.25	\$3.52	\$5.40	\$6.36	\$3.87	\$4.69	\$7.90	\$15.21
DPS	\$0.38	\$0.70	\$0.79	\$0.88	\$0.92	\$1.00	\$1.12	\$1.20	\$1.44	\$1.50	\$1.62	\$2.61
Shares²	44	43	43	43	43	43	43	43	43	43	43	43

Morningstar's earnings-per-share history is very strong considering the wide array of economic conditions that have existed in the past decade. The company saw a small dip in earnings at the height of the crisis in 2009 and there have been a couple of other small blips, but it has managed an average growth rate of more than 10% in the past decade. We see growth as continuing at this pace going forward on the strength of PitchBook, in particular, and are therefore forecasting 14% earnings-per-share growth for the coming years.

We think low-double digit revenue growth and a further margin growth potential make 14% earnings-per-share growth look feasible from 2024's level of earnings. This growth estimate is also dependent on the company's appetite for acquisitions moving forward. Its long-term revenue and earnings growth include many acquisitions over time, so we see this estimate as including some additional M&A that has not occurred yet. Morningstar's position in its niche is well established and we see its future as very bright looking forward. It also continues to experience tremendous success

with its PitchBook and other licensed products, and the significant costs related to recent mergers should not recur in future years, which will also help boost margins. We note that high interest rates globally will likely crimp transaction-based revenue for the foreseeable future, but there are recent signs of this abating.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	28.2	25.8	21.4	28.1	27.2	40.2	29.8	41.1	56.0	61.0	41.9	36.0
Avg. Yld.	1.0%	1.0%	1.1%	1.1%	0.9%	0.8%	0.7%	0.5%	0.7%	0.5%	0.5%	0.5%

Morningstar's average price-to-earnings ratio has been very high in the past decade as its trough value was 21.4, set in 2016. Investors have always been willing to pay a premium for this stock and that is not going to change. Morningstar, and other businesses like it with lucrative subscription models, tend to receive premium valuations due to their high rates of recurring revenue and superior profitability. However, today's price-to-earnings ratio of 41.9 is well in excess of our estimate of fair value, which we see as 36. Earnings estimates have risen since our last update, helping the valuation slightly. The security could experience a modest annual headwind to total returns as the valuation returns to more normalized levels. We see the yield remaining below 1% for the foreseeable future; Morningstar is not a high-income stock and almost certainly won't be for the foreseeable future.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	27%	25%	24%	32%	24%	32%	22%	23%	39%	32%	21%	17%

Morningstar's payout ratio is not likely to be above 30% of earnings anytime soon, barring a major shift in capital allocation strategy, so we see the yield as staying quite low for the foreseeable future. Certainly, management has been more interested in investing for future growth, and that strategy isn't going to change anytime soon. We also see rapidly rising earnings as a way to reduce the payout ratio.

Morningstar's competitive advantage is in its very long operating history in a niche of the investment world it helped create. The company's subscription service, particularly with its PitchBook product, is a key differentiator and we see it powering future growth for many years to come.

Final Thoughts & Recommendation

Overall, we see Morningstar as a stock with a strong moat but also one that is overvalued. We are forecasting 11% total annual returns moving forward, as 14% growth and the 0.5% yield could be partially offset by a 3% valuation headwind. Despite the overvaluation, we continue to see the stock as a buy after Q3 results.
