Overview & Current Events

Xerox Corporation traces its lineage back to 1906 when The Haloid Photographic Company began manufacturing photographic paper and equipment. Through a series of mergers and spinoffs, the Xerox we know today was formed. Xerox spun off its business processing unit in 2017 (now called Conduent) and now focuses on design, development, and sales of document management systems. The company produces over \$6 billion in annual revenue and has a market capitalization of \$1 billion.

Xerox reported third quarter earnings on October 29th, 2024, and results were awful, sending the stock spiraling lower. Revenue fell 7.3% year-on-year to \$1.53 billion, missing estimates by \$100 million. Adjusted earnings-per-share came to 25 cents, missing estimates by more than 50%, which had been set at 51 cents. The company's unadjusted earnings included a non-cash after-tax goodwill impairment charge of \$1 billion, or \$8.16 per share, as well as a further \$161 million, or \$1.29 per share, that was related to the establishment of a valuation allowance.

Adjusted operating margin was 5.2% of revenue, up 110 basis points year-over-year. Operating cash flow was down fractionally at \$116 million. Free cash flow also declined fractionally and ended the quarter at \$107 million.

Xerox' results were awful during the quarter, and the company reduced guidance once again for the final quarter of the year. Revenue is now expected to be around 10% lower in constant currency, and adjusted operating margin is expected to be around 5% of revenue. Free cash flow guidance is now for \$450 million to \$500 million. While that's lower, it is still almost *half* of the company's current market cap.

Separately, Xerox announced it is acquiring ITsavvy, a provider of integrated IT products and services. The \$400 million purchase price includes \$180 million in cash, and a secured promissory note that totals \$220 million. Xerox believes the deal will be immediately accretive to adjusted earnings per-share and free cash flow, with an expected close date sometime in the fourth quarter.

We've cut our estimate for this year to \$1.50 in adjusted earnings-per-share.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$3.84	\$3.20	\$2.32	\$3.48	\$3.46	\$3.55	\$1.41	\$1.51	\$1.12	\$1.82	\$1.50	\$1.91
DPS	\$0.98	\$1.09	\$1.25	\$1.00	\$1.00	\$1.00	\$1.00	\$1.00	\$1.00	\$1.00	\$1.00	\$1.00
Shares²	279	253	254	255	230	213	198	159	156	123	115	90

Xerox has had a difficult time growing revenue and profits and we do not see that changing moving forward. Given that the new base of earnings for 2024 is \$1.50 per share, we expect 5% growth moving forward. We see the restructuring program as a net positive for the stock given Xerox continues to see revenue and guidance weakness. In addition, rapidly improving free cash flow should help continue to reduce the float.

After another quarter of weak results and guidance, we're more concerned about the company's outlook. On the plus side, the buyback program should be able to help alleviate some of the burden when it comes to growth, provided free

Xerox Corporation (XRX)

Updated October 30th, 2024, by Josh Arnold

cash flow recovers as planned. We note free cash flow remains decent despite a tough top and bottom line environment.

The dividend is \$1.00 per share today and we do not forecast any increases coming anytime soon. The dividend was cut after the Conduent spinoff in 2017 and given the above, we do not see management taking the risk of a higher dividend, particularly given the yield is currently in excess of 11%.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	13.0	14.3	16.8	8.5	8.0	9.0	15.5	15.1	13.0	10.1	5.7	6.0
Avg. Yld.	2.0%	2.4%	3.2%	3.4%	3.6%	3.1%	4.6%	4.4%	6.8%	5.5%	11.8%	8.7%

Xerox's average price-to-earnings ratio in the past decade has been ~11, but we estimate fair value at 6 times earnings given continued revenue weakness and volatile margins. That is ahead of the 5.7 times earnings the stock trades for today, implying a small tailwind to annual total returns should the valuation normalize over the next five years. We expect the stagnant dividend and higher valuation to produce a yield around 8.7% in the future and note that the 11.8% yield today is extremely high. The guidance for 2024 free cash flow suggests dividend safety concerns are no longer an issue, and in fact, that the company can pay the dividend and deleverage quite easily while buying back shares.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	26%	34%	54%	29%	29%	28%	71%	66%	89%	55%	67%	52%

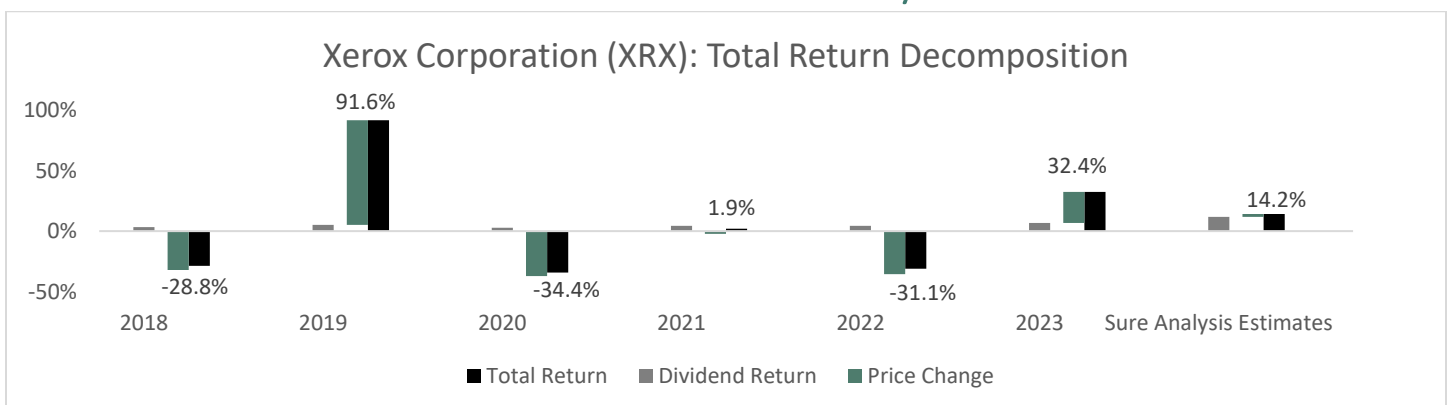

The payout ratio is 67% of earnings now that estimates are lower for 2024. Xerox hasn't said it plans to cut the dividend, and we believe it's sustainable at the current level. We continue to think that Xerox will have a difficult time raising the payout anytime soon given relative earnings weakness, but deleveraging and share repurchases have taken precedence in recent years anyway.

Xerox suffered immensely from the COVID recession, but is showing signs of improvement. Its competitive advantage is in its pure-play focus on document management systems and its very long history in the industry. In addition, it has a highly diversified, global customer base.

Final Thoughts & Recommendation

In total, we forecast Xerox producing 14.2% annual total returns in the coming years, which is higher than our last update. The yield will contribute 11.8%, but growth could be modest, aided by a 1.1% valuation tailwind. The stock is undervalued in our view with a massive yield, but with a still-deteriorating earnings outlook. We're reiterating the stock at a buy rating due to projected returns, but note there is significant uncertainty in the company's outlook.
