Overview & Current Events

Carlisle Companies is a diversified company that is active in a wide array of niche markets. The segments in which the company produces and sells products include construction materials (roofing, waterproofing, etc.), interconnecting technologies (wires, cables, etc.), fluid technologies, and brake & friction. Carlisle Companies was founded in 1917.

Carlisle Companies reported its third quarter earnings results on October 24. The company reported revenues of \$1.3 billion for the quarter, which was up 6% compared to the revenues that Carlisle Companies generated during the previous year's quarter. Carlisle's revenues were lower than the analyst consensus estimate. Carlisle's revenue performance was also somewhat weaker than during the previous quarter, when the year-over-year growth rate was in the low double-digits. A weaker housing market was a bit of a headwind during the period.

Carlisle Companies generated earnings-per-share of \$5.78 during the third quarter, missing the consensus analyst estimate slightly, by \$0.04. Carlisle Companies' earnings-per-share were up a nice 24% from the previous year's level, as margin improvements and higher revenues made profits rise substantially. Carlisle's cost-saving measures were a positive factor, and share repurchases also had a positive impact on the company's earnings-per-share growth rate during the period. In 2023, earnings-per-share totaled \$16.60, down from the record result in 2022, but still way above every year except for 2022. For the current year, a double-digit earnings-per-share increase is expected, with profits likely coming in around the peak level seen two years ago.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$3.83	\$4.82	\$5.86	\$5.53	\$6.04	\$8.21	\$6.41	\$8.89	\$20.01	\$16.60	\$20.20	\$27.03
DPS	\$0.94	\$1.10	\$1.30	\$1.44	\$1.54	\$1.80	\$2.05	\$2.16	\$3.00	\$3.40	\$4.00	\$5.48
Shares¹	65	64	64	62	59	57	54	53	52	49	47	40

From 2014 to 2023, Carlisle recorded an average annual earnings-per-share growth rate of 18%, which is a very strong result. Before that, Carlisle had also delivered compelling business growth, and the company managed to remain resilient during past crisis, including the Great Recession, when profits dipped only slightly.

Despite its small size, Carlisle is a company that is highly active when it comes to M&A. Carlisle has been divesting lower-growth business units from time to time in order to focus on its higher-growth markets. Optimizing the portfolio via tuck-in acquisitions to bolster these segments further is an opportune move that should be beneficial for Carlisle's growth in the future, too. Without any acquisitions Carlisle would not have been able to grow this quickly, but its organic sales growth has historically been solid as well. Thanks to a strong balance sheet and low leverage levels, Carlisle can engage in M&A easily and will most likely continue to do so in the coming years.

Carlisle returns a lot of cash to its owners via share repurchases, which is beneficial for its earnings-per-share growth. Buybacks will remain an important earnings-per-share growth driver in the future, we believe. Since Carlisle is now a substantially larger company than a decade ago, its relative growth rate will be lower compared to the past, however.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	21.6	19.6	17.2	18.7	16.7	19.7	24.3	27.7	11.8	18.8	21.0	18.0
Avg. Yld.	1.1%	1.2%	1.3%	1.4%	1.5%	1.1%	1.3%	0.9%	1.3%	1.1%	0.9%	1.1%

Carlisle Companies trades at 21 times this year's expected earnings-per-share right now. This is ahead of our fair value estimate, even though Carlisle has been more expensive at times over the last decade. Shareholders get a rather small dividend yield from Carlisle at current prices.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	24.5%	22.8%	22.2%	26.0%	25.5%	21.9%	32.0%	24.3%	15.0%	20.5%	19.8%	20.3%

Carlisle Companies has grown its dividend every year for more than four decades, and the dividend growth rate has been attractive over the last couple of years. The company nevertheless has a relatively low dividend payout ratio, as earnings-per-share growth has been quite strong as well during that time frame. The dividend looks safe, as Carlisle Companies was able to easily cover its dividend payments during every year in the past.

As an industrial company, demand for Carlisle's products can be somewhat cyclical, but the company still managed to remain highly profitable during the Great Recession, when profits dropped by just ten percent from 2008 to 2010. Carlisle is active in niche markets where it has a strong market position, despite its rather small size. The company's approach of growing its presence organically as well as via acquisitions allows for improving scale as the company gets bigger, which brings benefits such as operating leverage and more efficient purchasing.

Final Thoughts & Recommendation

Carlisle Companies is a small industrial company that combines many positives, including a strong earnings and dividend growth track record, a solid long-term growth outlook, and some resilience to economic downturns. Carlisle's approach of consolidating its industry through M&A will likely deliver meaningful growth going forward. Following a profit decline in 2023, Carlisle should be able to recover nicely this year. Carlisle's shares trade ahead of fair value right now, which hurts the total return outlook, which is why we rate shares a hold at current prices.
