Overview & Current Events

Meta Platforms, previously known as Facebook, is multinational technology conglomerate founded by Mark Zuckerberg. The company is known for its social media platforms, including Facebook, Instagram, and WhatsApp, and has also been investing in emerging technologies such as augmented reality (AR) and virtual reality (VR) through its Oculus subsidiary. With nearly 4 billion people logging into at least one of Meta's platforms every month, the company attracts nearly 20% of all global advertising revenue, second only to Alphabet (GOOGL), which commands a substantial 40% market share. Meta Platforms generates nearly \$160 billion in annual revenues, and is headquartered in Menlo Park, California.

On October 30th, 2024, Meta Platforms reported its Q3 results for the period ending June 30th, 2024. For the quarter, the company posted revenues of \$40.6 billion, marking a strong growth of 19% compared to the previous year. Revenue growth was driven by increased user activity, growth in ad impressions, and higher ad pricing.

Specifically, Meta Platforms' Family daily active people (DAP) were 3.29 billion on average at the end of the quarter, an increase of 5% year-over-year. Ad impressions delivered across Meta's Family of Apps increased by 7% year-over-year, while the average price per ad increased by 11% year-over-year.

In the meantime, costs and expenses rose by just 14% to \$23.2 billion. With revenue growth significantly exceeding the growth in costs and expenses, Meta's operating margin expanded from 40% to 38.43%. EPS, thus, surged 37% to \$6.03. Meta also repurchased \$8.86 billion worth of stock during the quarter.

For Q4-2024, Meta expects revenues to be in the range of \$45.0 billion and \$48.0 billion, up 16% at the midpoint. Our updated estimate for the full-year earnings per share stands at \$23.20.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$1.10	\$1.29	\$3.49	\$5.39	\$7.57	\$6.43	\$10.09	\$13.77	\$8.59	\$14.87	\$23.20	\$46.66
DPS	---	---	---	---	--	---	---	---	---	---	\$2.00	\$4.98
Shares²	2.67	2.85	2.93	2.96	2.92	2.88	2.89	2.86	2.70	2.63	2.53	2.25

Meta Platforms has grown its earnings per share at a CAGR of 33.6% over the past decade. The continuous expansion of its global user base, strategic acquisitions like Instagram and WhatsApp, successful monetization through advertising, constant innovation in product development (including features like Facebook Live and Stories), and global outreach have all played pivotal roles as some of the most important factors that have contributed to its revenue growth.

With its operating margin usually exceeding 35%, Meta tends to yield substantial profits. In 2022, a temporary dip occurred due to one-off severance costs from Meta's 13% staff reduction and steep losses in its Realty Labs division. However, with these costs gone and operating expenses down, profits have now charted an upward trajectory.

We believe that a re-acceleration in ad revenue growth combined with disciplined cost management and share repurchases will drive earnings per share growth of 15%.

Meta Platforms Inc. (META)

Updated November 1st, 2024 by Nikolaos Sismanis

Meta announced its inaugural quarterly dividend of \$0.50, or \$2.00 per annum, in Q4-2023. Projecting the future growth rate of dividend hikes is challenging, given the recent initiation. Regardless, our estimates assume a 20% rate, a figure we believe the company can comfortably sustain.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	56.1	65.7	31.8	27.1	22.7	27.1	21.9	22.1	27.0	14.9	24.6	26.0
Avg. Yld.	---	---	---	---	--	---	---	---	---	---	0.4%	0.4%

Meta Platforms initially traded at high multiples post-IPO, driven by optimistic expectations for substantial growth which indeed occurred. However, in recent years, Meta's valuation saw a compression as investors factored in regulatory risks. Last year, Meta's valuation dipped significantly, with investor confidence eroded due to substantial losses in its Realty Labs segment. However, following acceleration in revenue growth, disciplined cost management, and higher focus on shareholder returns, Meta's P/E has now been re-priced upward by Wall Street. Our fair P/E is set at 26, modestly above the 23.9 P/E based on our projected FY2024 earnings. Based on Meta's underlying growth rates, a much higher fair P/E could be more suitable. Still due to Wall Street having mixed feelings on the stock more often than not, we are prudent.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	---	---	---	---	--	---	---	---	---	---	9%	11%

Meta Platforms is a high-quality company featuring a wide moat, impressive margins, and a clean balance sheet. Its social media platforms provide some of the places for advertisers to grow their brands, while its high-margin business model ensures consistent profitability even during challenging times in the advertising industry. Simultaneously, its hefty net cash position of \$21.9 billion provides a wide margin of safety.

Given that Meta is hinged entirely on the dynamics of the advertising industry, its results are susceptible to potential recessions. Its revenues could take a hit if advertisers reduce spending in less favorable market periods. Still, we are confident in the business model due to the reliance of brands on Meta for growth in today's commerce landscape.

Final Thoughts & Recommendation

Meta Platforms is riding on improved investor sentiment these days, with its revenues undergoing a re-acceleration, its margins reaching record levels, and its capital allocation focusing on rewarding shareholders. We once again forecast an annualized total return potential of 16.6% moving forward, backed by earnings growth of 15% and the humble dividend, along with the potential for a soft valuation tailwind.
