Overview & Current Events

Founded in 1887, Southern Missouri Bancorp, Inc. is a community bank with a rich corporate history. The bank holding company is the parent company of Southern Bank. Across more than 60 full-service branch offices and three limited-service branch offices, the Poplar Bluff, Missouri-based bank serves over 50 communities in Missouri, Arkansas, Illinois, and Kansas. As of September 30th, 2024, the company held \$4.7 billion in total assets.

SMBC provides a variety of services to these individual and corporate customers. That includes money market deposit accounts, saving accounts, retirement savings plans, and certificates of deposit. Loan products include residential mortgages, commercial real estate loans, commercial business loans, construction loans, home equity loans, and automobile loans. Additionally, SMBC offers investing and insurance services, debit or credit cards, and online and mobile banking services.

In recent years, the company has leaned into acquisitions to enhance its economies of scale and to realize cost synergies. In the past five years, SMBC has closed several deals and acquired \$1.5 billion in total assets. The most recent acquisition of Citizens Bancshares, Co. (parent company of Citizens Bank & Trust Company) and its nearly \$1 billion in total assets was completed in January 2023.

On October 28th, SMBC reported its financial results for the fiscal first quarter ended September 30th. The company's net interest income increased by 3.6% over the year-ago period to \$36.7 million in the quarter. A 5.9% uptick in the average balance of interest-earning assets was only partially countered by a seven-basis point decrease in the net interest margin to 3.37% during the quarter. SMBC's non-interest income jumped by 22.6% year-over-year to \$7.2 million for the quarter. This was made possible by greater other loan fees, bank card interchange income, and net realized gains on sales of loans. SMBC's diluted EPS declined by 5.2% over the year-ago period to \$1.10 in the fiscal first quarter. This came in \$0.01 below the analyst consensus.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$1.79	\$1.98	\$2.08	\$2.39	\$3.14	\$2.99	\$5.21	\$5.22	\$3.85	\$4.42	\$4.70	\$6.91
DPS	\$0.34	\$0.36	\$0.40	\$0.44	\$0.52	\$0.60	\$0.62	\$0.80	\$0.84	\$0.84	\$0.92	\$1.29
Shares¹	7.4	7.4	8.6	9.0	9.3	9.1	8.9	9.2	11.3	11.3	11.3	14.0

Looking ahead, SMBC has tailwinds on its side. The company's net interest margin improved by 12 basis points sequentially from Q4 2024 to Q1 2025. The net interest margin should continue to improve as the Federal Reserve cuts interest rates further: Organic growth from reinvigorated economic activity in its communities should be a boon to SMBC's diluted EPS. Bolt-on acquisitions are another catalyst for the company. For these reasons, we think diluted EPS can rise by 8% annually through FY 2030 from the \$4.70 diluted EPS analyst consensus for FY 2025.

¹ Share count is in millions.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Avg. P/E	10.6	12.3	15.5	16.3	11.1	7.7	8.7	8.8	10.0	10.2	12.8	11.0
Avg. Yld.	1.8%	1.5%	1.2%	1.1%	1.5%	2.6%	1.4%	1.7%	2.2%	1.9%	1.5%	1.7%

In the last decade, SMBC's P/E ratio has ranged from the high-single-digits to the mid-teens. The stock's average P/E ratio over that time was around 11. Moving forward, we still believe the 10-year average P/E ratio remains a sensible estimate for fair value moving forward. After all, SMBC's forward growth prospects are similar to the growth posted in the past decade. The current P/E ratio of 12.8 is moderately elevated beyond our fair value estimate.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	19%	18%	19%	18%	17%	20%	12%	15%	22%	19%	20%	19%

SMBC's 137-year operating history means that it has very established relationships with its existing customers. Its wide variety of banking products and resulting harmonious customer relationships are also helping to drive organic growth.

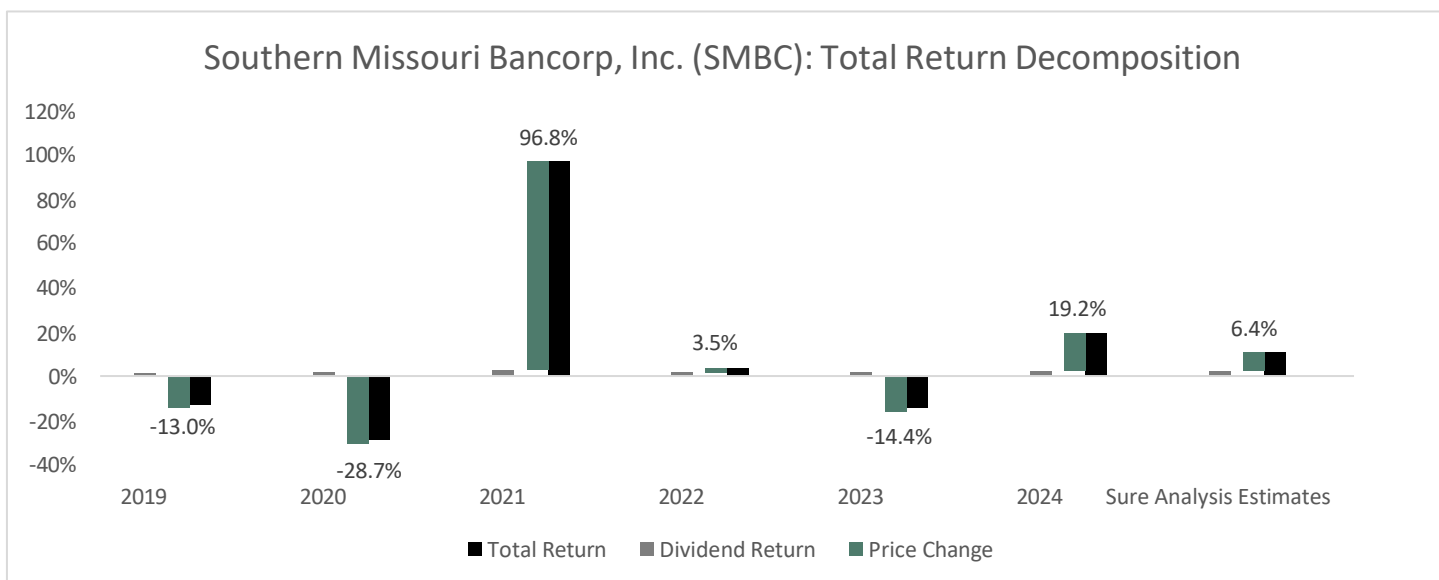

SMBC's diluted EPS has risen in eight out of the last 10 fiscal years. Even in its worst year of the decade (FY 2023), diluted EPS was only reduced by a quarter. Coupled with a dividend payout ratio that has historically been in the teens to 20% range, that makes the dividend relatively secure for a community bank. These elements make up for the the fact that a plurality of SMBC's loans (38.7% as of September 30th, 2024) are in the commercial real estate class.

Lastly, SMBC's asset quality is sound. As of September 30th, the company's nonperforming assets to total assets ratio edged three basis points higher sequentially to 0.26%. That puts SMBC in a position to likely navigate mild to moderate recessionary scenarios without a dividend cut.

Final Thoughts & Recommendation

SMBC's 1.5% dividend yield, 8.0% annual diluted EPS growth prospects, and 3% annual valuation multiple downside could produce 6.4% annual total returns over the next five years. We believe after the rally in recent months, there is no margin of safety left for shares. Thus, we're downgrading to a hold rating.
