Overview & Current Events

Duke Energy began operations in 1904 by providing power to a South Carolina cotton mill. Since that time, it has grown both organically and through mergers to become one of the largest providers of energy in the US. Today, it produces billions of dollars in annual revenue and trades with a market capitalization of \$92.1 billion.

On February 13, 2025, Duke Energy Corporation reported its financial results for the fourth quarter and full year of 2024. The company achieved adjusted earnings per share (EPS) of \$5.90 for the year, aligning with its guidance range. This performance was driven by growth primarily from rate cases and riders across different jurisdictions, partially offset by the impacts from Hurricanes Helene and Milton. Looking ahead, Duke Energy announced a 2025 EPS guidance range of \$6.17 to \$6.42, with a midpoint of \$6.30, reflecting confidence in its strategic initiatives and market position. The company also disclosed an extension in equity funding to \$6.5 billion over the next five years to support its \$83 billion capital investment plan, aiming for a 7.7% earnings-based growth annually through 2029.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$4.54	\$4.69	\$4.57	\$4.72	\$5.06	\$5.12	\$5.24	\$5.27	\$5.56	\$5.90	\$6.32	\$8.35
DPS	\$3.24	\$3.36	\$3.49	\$3.60	\$3.71	\$3.82	\$3.90	\$4.02	\$4.10	\$4.14	\$4.18	\$5.40
Shares¹	688.4	699.6	700.1	727	733.3	768.7	769.4	770.1	771	777	777	795

Duke's earnings-per-share have increased at an annual rate of 4% over the last decade, and we expect to see Duke continuing to generate 5.7% annualized earnings-per-share growth over the next half decade from the high base for 2025. The key determiners of Duke's value proposition to investors will be how well they can execute on their ambitious \$37 billion growth CapEx plan, and if they can continue to garner favorable regulatory rulings in their operating regions. While they continue to achieve reasonable regulatory rulings, there are no guarantees this will continue. We therefore take a cautious and conservative outlook on growth, projecting Duke achieving the low end of its guidance.

That being said, customer growth should continue as a low-single-digit tailwind for the foreseeable future, providing Duke with ever-higher base demand for its services. Of course, the weather can have a significant impact positively or negatively in any particular year, but overall, a low-single-digit tailwind from customer growth is very likely. In addition, rate increases should help boost revenue and earnings, as we've seen with Duke's recent rate increases in North Carolina and Kentucky. Duke, like any other power provider, must ask for rate increases from local authorities so they are certainly not assured. However, state regulators have been amicable to rate increase requests from Duke and should continue to be moving forward. One offsetting factor in earnings-per-share growth is that Duke likes to issue common stock for general corporate purposes, leading to a higher share count over time. Its share count has risen from 424 million in 2008 to 777 million today. Share issuances are irregularly timed and sized so the exact impact is difficult to predict, but this is a long-term habit for Duke and must be accounted for in estimates. The dividend continues to rise at a low-single-digit pace, slightly under that of earnings-per-share growth. We expect this will continue, keeping Duke firmly in the income stock category.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	17.4	17.9	18.2	21.3	19.9	18.6	19.1	19.4	18.5	19.0	18.4	15.0
Avg. Yld.	4.1%	4.0%	4.2%	3.6%	3.7%	4.0%	3.9%	3.9%	4.0%	3.7%	3.6%	4.3%

Duke's valuation has remained mostly steady throughout the past decade, with the exception of the period immediately following the Great Recession. Duke's price-to-earnings ratio has been in the high teens and low 20s over the past decade, but given current headwinds, we are reducing the fair value to 15 times earnings. Today's price-to-earnings ratio of 18.4 is above our reduced fair value estimate, and we therefore see a headwind to annual total returns from a contracting multiple over time.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	71%	72%	76%	76%	73%	75%	74%	76%	74%	70%	66%	65%

Duke's quality metrics have been largely stable throughout the past decade and we do not expect that will change. We expect margins to be flat moving forward – albeit at very high levels – and for its balance sheet leverage and interest coverage to remain steady. Management has a stated plan to reduce leverage moving forward as it plans to boost cash flow against the amount of debt it takes on, so we are not concerned. The payout ratio is relatively high, but the dividend is well-covered, and should be for the foreseeable future. Duke's competitive advantage is its near monopoly in the areas it serves, which is not dissimilar to other regulated utilities. In addition, recession performance should be excellent as it grew earnings-per-share rather rapidly during the Great Recession, making this a truly defensive stock with a high yield and decent growth prospects.

Final Thoughts & Recommendation

We expect Duke to generate 5.2% annualized total returns over the next half-decade from its 3.6% current yield and 5.7% expected earnings-per-share growth, partially offset by a headwind from multiple contraction. As a result, we rate it a Hold.
