Over the past decade, Inter Parfums has grown earnings-per-share at 23.2% annually since 2015 and by 33.6% annually over the past five years. Based on management's 2025 guidance, we expect Inter Parfums to deliver \$5.35 of earnings-per-share. In addition, we forecast that earnings-per-share will grow at about 5% per year over the next five years, guiding our 2030 earnings-per-share estimate of \$6.83.

Over the past 10 years, dividends have grown by 21.5% annually, and over the past five years, dividend payments have increased by 57.5% annually, due mainly to payments doubling from 2021 to 2022. Management have also announced a 7% increase in 2025 to \$3.20 per share. Over the next five years, we expect dividend growth to slow to about 5% per year, growing slightly slower than earnings-per-share. With the jump in payments from 2021 to 2022, the company is expected to pay around 60% of its 2025 earnings as dividends, a considerable increase from the 36% payout ratio in 2021. Therefore, we expect dividends to grow slower because the business now pays out a large chunk of its earnings to investors.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	23.1	31.8	29.5	27.6	28.6	31.8	36.7	41.5	27.6	25.7	26.2	30.0
Avg. Yld.	2.1%	2.3%	2.0%	1.6%	1.7%	2.1%	2.9%	3.1%	2.9%	2.9%	2.1%	2.0%

Over the past decade, the stock has averaged a P/E ratio of 30.4, and over the past five years, the average P/E is 32.7. Over the intermediate term, we expect the stock to average a P/E of 30, which means that shares are overvalued at the current multiple. We have set a fair value price of \$160 and we estimate a five-year price target of \$197. Today, the stock offers a 2.1% dividend yield, which could be low for investors prioritizing income. However, investors might find the stock attractive for its high dividend growth and strong brand presence as a leader in the fragrance market.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	53%	56%	54%	53%	61%	27%	36%	53%	53%	59%	60%	60%

In the future, we expect Interparfums to continue to have a ~60% payout ratio. Although we project that the dividend will continue to grow, it's important to note that in 2020, the business cut its dividend because earnings fell. With the stock sporting a payout ratio of nearly 60%, investors run the risk that the dividend may be cut in the future if earnings fall once more. Fortunately, Inter Parfums has a solid balance sheet, with current assets exceeding total liabilities. The business also has \$125 million in cash and cash equivalents, which is more than the company will pay out in dividends for the fiscal year 2025. In addition to a strong balance sheet, the business has a competitive advantage with exclusive licensing to sell products worldwide under top brands.

Final Thoughts & Recommendation

Inter Parfums is a business that has exclusive licensing to sell perfume under top fashion brands worldwide. We rate the stock as a buy at today's price because its total return prospects are 9.8% annually over the next five years. This is due to earnings-per-share growth estimates of 5%, the 2.1% dividend yield, and a 2.8% valuation tailwind. Investors might be interested in IPAR for its exclusive licensing, market-leading position in the fragrance industry, and total return potential.
