Overview & Current Events

Founded in 1887, Southern Missouri Bancorp, Inc. is a community bank with a rich corporate history. The bank holding company is the parent company of Southern Bank. Across more than 60 full-service branch offices and three limited-service branch offices, the Poplar Bluff, Missouri-based bank serves over 50 communities in Missouri, Arkansas, Illinois, and Kansas. As of March 31st, 2025, the company held \$5 billion in total assets.

SMBC provides a variety of services to these individual and corporate customers. That includes money market deposit accounts, saving accounts, retirement savings plans, and certificates of deposit. Loan products include residential mortgages, commercial real estate loans, commercial business loans, construction loans, home equity loans, and automobile loans. Additionally, SMBC offers investing and insurance services, debit or credit cards, and online and mobile banking services.

In recent years, the company has leaned into acquisitions to enhance its economies of scale and to realize cost synergies. In the past five years, SMBC has closed several deals and acquired \$1.5 billion in total assets. Its most recent acquisition, Citizens Bancshares, Co. (parent company of Citizens Bank & Trust Company) and its nearly \$1 billion in total assets, was completed in January 2023.

On April 21st, SMBC released its fiscal third quarter earnings report for the period ended March 31st, 2025. The company's net interest income surged 14.4% over the year-ago period to \$5 million in the quarter. A 24-basis point expansion in the net interest margin to 3.39% and a 6.2% uptick in the average balance of interest-earning assets were each to credit for this net interest income growth during the quarter. What's more, SMBC's non-interest income rose by 19.4% year-over-year to \$6.7 million for the quarter. That was largely due to the recognized losses on the sale of AFS securities in the year-ago period and a small gain recognized in Q3 2025. The company's diluted EPS soared 40.4% year-over-year to \$1.39 in the quarter. That topped the analyst consensus during the quarter by \$0.10.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$1.79	\$1.98	\$2.08	\$2.39	\$3.14	\$2.99	\$5.21	\$5.22	\$3.85	\$4.41	\$5.03	\$7.39
DPS	\$0.34	\$0.36	\$0.40	\$0.44	\$0.52	\$0.60	\$0.62	\$0.80	\$0.84	\$0.84	\$0.92	\$1.29
Shares¹	7.4	7.4	8.6	9.0	9.3	9.1	8.9	9.2	11.3	11.3	11.3	14.0

Looking ahead, SMBC has catalysts on its side. The company's net interest margin was up three basis points sequentially. We continue to believe that the net interest margin will improve as the Federal Reserve's most recent interest rate cuts are fully absorbed into the economy. Bolt-on acquisitions are another catalyst for the company. As a result, we continue to think that diluted EPS can rise by 8% annually through FY 2030 from the \$5.03 diluted EPS analyst consensus for FY 2025.

¹ Share count is in millions.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Avg. P/E	10.6	12.3	15.5	16.3	11.1	7.7	8.7	8.8	10.0	10.2	10.3	11.0
Avg. Yld.	1.8%	1.5%	1.2%	1.1%	1.5%	2.6%	1.4%	1.7%	2.2%	1.9%	1.8%	1.6%

Over the last 10 years, SMBC's P/E ratio has ranged from as low as the high-single-digits to as high as the mid-teens. The stock's average P/E ratio over that time was just above 11. Looking ahead, we maintain our argument that a valuation multiple of 11 remains reasonable for SMBC. After all, the company's forward growth prospects are comparable to the growth posted in the past decade. The current P/E ratio of 10.3 is slightly below our fair value P/E ratio, which offers a small margin of safety.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	19%	18%	19%	18%	17%	20%	12%	15%	22%	19%	18%	17%

SMBC's 138-year operating history means that it has very established relationships with its existing customers. Its wide variety of banking products and resulting harmonious customer relationships are also helping to drive organic growth.

SMBC's diluted EPS has risen in eight out of the last 10 fiscal years. Even in its worst year of the decade (FY 2023), diluted EPS was only reduced by a quarter. Coupled with a dividend payout ratio that has historically been in the teens to 20% range, that makes the dividend relatively secure for a community bank. These elements make up for the the fact that a plurality of SMBC's loans (33.2% as of March 31st, 2025) are in the commercial real estate class.

Lastly, SMBC's asset quality is sound. As of March 31st, the company's nonperforming assets to total assets ratio was 0.48%. That puts SMBC in a position to likely navigate mild to moderate recessionary scenarios without a dividend cut.

Final Thoughts & Recommendation

SMBC's 1.8% dividend yield, 8.0% annual diluted EPS growth prospects, and 1.3% annual valuation multiple upside could generate 10.9% annual total returns over the next five years. As a result, we're upgrading shares back to a buy rating for the first time since we initiated coverage last August.

Total Return Breakdown by Year

Disclosure: This analyst has no position in the security discussed in this research report, and no plans to initiate one in the next 72 hours.
