Overview & Current Events

Cummins, headquartered in Indiana and founded in 1919, designs, manufactures, distributes and services engines for heavy, medium, and light-duty trucks. The company's products include diesel and natural gas engines, as well as hybrid and electric platforms. Cummins operates five segments: Engines, Distribution, Components, Power Systems, and Accelera, formerly named New Power. Roughly 60% of its business is done in the U.S. and Canada. The company employs about 60,000 people and serves customers in about 190 countries. Cummins generates ~$33 billion in annual revenues.

On July 9th, 2024, Cummins raised its quarterly dividend 8.3% to $1.82, extending the company's dividend growth streak to 19 consecutive years.

On May 5th, 2025, Cummins reported first quarter results for the period ending March 31st, 2025. For the quarter, revenue fell 2.7% to $8.2 billion, but this was $30 million ahead of estimates. Earnings-per-share totaled $5.96 and was $1.11 better than expected.

For the quarter, North America sales declined 1% while international was lower by 5% as gains in China were more than offset by weaker demand in Latin America and Asia Pacific. The Engine segment decreased 5% to $2.8 billion due to lower demand for on-highway in the U.S. and Latin America. Revenue for Components fell 20% to $2.7 billion due to steep declines in North America and international markets, mostly related to a divestiture. Distribution improved 15% to $2.9 billion due to demand for power generation products and better pricing. Power Systems grew 19% to $1.6 billion, as demand for power generation remains high, especially from data center markets. Accelera increased 11% to $103 million as demand remains elevated for eMobility and electrolyzer installations.

The company withdrew its prior guidance for the year given uncertainty in the economy. The company is now projected to earn $21.31 for the year, down from $22.45 previously. We have updated our forecast accordingly.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	$8.92	$8.23	$10.63	$13.15	$14.48	$12.01	$14.61	$15.67	$5.19	$28.37	***$21.31***	***$31.31***
DPS	$3.51	$4.00	$4.21	$4.44	$4.90	$5.28	$5.60	$6.04	$6.50	$7.00	***$7.28***	***$10.70***
Shares[3]	175	168	166	163	152	149	144	142	143	138	***138***	***135***

Looking at the 2015 to 2024 period, Cummins grew earnings-per-share by an average compound rate of 13.7%. The growth rate has deaccelerated somewhat 12.2% over the last five year. We reaffirm our earnings-per-share growth rate of 8% through 2030 as we feel this is a good starting point considering the high base from which EPS starts. 2020 was a difficult one for the company, but Cummins saw a rebound in recent years. Cummins has also benefited from an increase in worldwide emission regulations and fuel efficiency standards. When paired with the company's reliable and superior quality engines, this has afforded the company growth opportunities. This trend is likely to continue, but we

believe there is a tipping point whereby the increase in standards starts to be addressed via alternative technologies, such as batteries.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	14.0	14.1	15.0	11.4	11.0	16.0	14.9	15.5	12.2	12.3	***14.4***	***13.0***
Avg. Yld.	2.8%	3.5%	2.6%	2.9%	3.0%	2.9%	2.6%	2.5%	2.7%	2.0%	***2.4%***	***2.6%***

Shares of Cummins have decreased $57, or 15.7%, since our February 5th, 2025 report. Shares of Cummins have traded with an average price-to-earnings ratio of 13.6 since 2015. We believe that a target P/E of 13 is a reasonable multiple given the company's growth prospects and a fair amount of cyclicality in earnings. Using the current share price and expected earnings-per-share for the year, Cummins trades with a price-to-earnings ratio of 14.4. If shares were to trade at our target multiple by 2030, then valuation would reduce annual returns by 2.0% over this period.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	39%	49%	40%	34%	33%	44%	38%	39%	33%	25%	***34%***	***34%***

During the last recession Cummins posted earnings-per-share of $4.08, $2.47, $5.17, and $9.07 during the 2008 through 2011 stretch. Meanwhile, the dividend kept increasing during this time. We view this a microcosm of the business at large. That is, in lesser economic times earnings are likely to falter, but the company has the ability to recover quickly, and the dividend payout ratio is low enough to keep the payment steady. Cummins maintains a competitive advantage in its strong brand name, stemming from reliability and superior quality. In turn, the company maintains a large share of the heavy-duty engine market. Two main risks stick out: a high reliance on a few customers, namely PACCAR, Daimler, Chrysler, and Navistar, which could turn to manufacturing in-house, and the potential for new technologies to disrupt or require increased investment.

Final Thoughts & Recommendation

Cummins is now projected to return a total of 8.1% annually through 2030, up from our prior estimate of 5.5%. Our projected return consists of an 8% earnings growth rate and a starting yield of 2.4%, offset by a low single-digit headwind from multiple contraction. Cummins' most recent quarter showed a continued mixed business result with power generation products performing well while truck demand was weaker. Shares have declined since our last report largely due to tariff uncertainty. We have lowered our 2030 price target $22 to $407 due to earnings estimates for the year, but we continue to rate shares of Cummins as a hold due to projected returns.
