Dividend Risk Score:	A	Sector:	Utilities	Rating:	Hold

Overview & Current Events

MGE Energy has grown from a small power station in Wisconsin built in 1902 to a \$3.4 billion market capitalization integrated energy company. The company has paid consecutive dividends for more than 100 years and has raised its payout for the past 49 years. MGE principally operates gas and electric utilities, in addition to transmission and construction businesses.

For the first quarter ended March 31, 2025, MGE Energy, Inc. reported operating revenues of \$218.97 million, a 14.4% increase from \$191.34 million in the same period the previous year. This growth was driven by a 19% rise in gas retail sales and a 3% increase in electric retail sales, attributed to more typical weather conditions compared to the milder first quarter of 2024. Net income rose to \$41.6 million, or \$1.14 per share, up from \$33.8 million, or \$0.93 per share, in the prior year, reflecting a 23% increase in earnings. The company's investments in renewable energy, notably the operational Darien Solar Project, contributed to the improved financial performance by providing cost-effective, carbon-free energy solutions.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$2.06	\$2.18	\$2.20	\$2.43	\$2.50	\$2.60	\$2.92	\$3.07	\$3.25	\$3.33	\$3.62	\$4.75
DPS	\$1.16	\$1.21	\$1.26	\$1.35	\$1.39	\$1.44	\$1.52	\$1.63	\$1.67	\$1.76	\$1.80	\$2.50
Shares³	34.7	34.7	34.7	34.7	34.7	36.2	36.2	36.2	36.2	36.5	36.5	37.0

Earnings-per-share have grown consistently over the past decade, though they did encounter a brief bump in the road in 2015. Recent results have been strong, and we believe that between its two sustainable growth catalysts of customer acquisition and renewable asset growth, the company should be able to achieve mid-single-digit earnings-per-share growth going forward. Investors would do well to consider that weather can contribute positively but can easily swing results in the other direction. We see mid-single-digit growth for the dividend as well as MGE is comfortable with where the payout ratio is today. MGE is on par with other utilities in terms of dividend growth in the mid-single digits.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	20.3	24.9	22.9	26.7	31.6	27.4	24.9	22.5	20.9	24.0	25.6	17.5
Avg. Yld.	2.8%	2.2%	2.5%	2.1%	1.8%	2.0%	2.1%	2.4%	2.5%	2.2%	1.9%	3.0%

MGE's price-to-earnings multiple has moved significantly higher in the past half-decade to the mid-20s to low 30s and has since fallen back into the 20s. It sits at 25.6 times earnings today, and as a result, we believe MGE is still overvalued. The lack of strong earnings growth it has exhibited and a lack of catalysts for it to pick up in the coming years means that

MGE Energy (MGEE)

Updated May 18th, 2025 by Samuel Smith

the current multiple seems unsustainable. Thus, we are forecasting a headwind to annual total returns in the coming years from multiple contraction.

The dividend yield also tells us the stock is overvalued as it is still at the lower end of its range over the past decade. We think the combination of continued payout growth and a stock price that should come down over time will produce a higher, more normalized 3% yield against the current 1.9% yield. The current valuation multiple for MGE has not only made the stock expensive, but it has made the dividend less attractive as well.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	56%	56%	57%	56%	56%	55%	52%	53%	51%	53%	50%	53%

MGE’s quality metrics have been roughly flat over the past decade, as it does not go after growth via acquisition, and its business has not really changed. Gross margins have drifted up over time but appear to have plateaued. MGE’s interest coverage is outstanding for a utility, and we forecast this will improve slightly over time as earnings grow and MGE keeps its debt at manageable levels. The payout ratio should remain around 50% as dividend growth will likely lag earnings growth, but the two should be very close.

Overall, MGE is conservatively financed and run basically the same way year after year, meaning changes in the quality metrics will likely be few and far between. MGE’s main competitive advantage is its virtual monopoly in its service area. Like many other utilities, MGE has a small but profitable service area where it is continuing to grow its customer base. That helped it hold up well in the Great Recession as earnings-per-share dipped slightly but then recovered quickly.

Final Thoughts & Recommendation

MGE appears overvalued right now. We are forecasting total annualized returns for the next five years to be 0.3% as multiple contraction will offset the dividend and earnings-per-share growth. MGE has failed to grow its earnings faster than a mid-single-digit rate for a while now and appears poised to continue growing at a mediocre rate moving forward. However, the valuation is pricing in a bit more growth than that. MGE therefore is rated a Hold right now.
