Overview & Current Events

Mueller Water Products is a leading manufacturer and marketer of products and services used to transmit, distribute, and measure water in North America. Mueller's products and services are used by municipalities and the residential and non-residential construction industries. The majority of its revenues (>90%) are derived from spending on water and wastewater infrastructure upgrades, repairs, and replacements, typically associated with the construction of new residential communities. Management estimates it has one of the largest installed bases of Iron Gate valves and fire hydrants in the United States. The company generates around \$1.3 billion in annual sales and is based in Atlanta, Georgia. Mueller's fiscal year ends every September 30th.

On May 5th, 2025, Mueller Water reported its fiscal Q2 results for the period ending March 31st, 2025. Revenues came in at \$364.3 million, which was a year-over-year increase of 3.1%. The Water Management Solutions segment posted sales of \$148.1 million that were up 0.3% year-over-year. This increase was primarily due to higher volumes of repair products as well as higher pricing across most product lines. The Water Flow Solutions segment posted sales of \$216.2 million, up 5.1% compared to last year. This increase was primarily due to higher volumes of iron gate and specialty valves as well as higher pricing across most product lines. Due to higher sales and improved margins, EPS came in at \$0.33 compared to \$0.28 last year.

For fiscal 2025, the company expects sales growth between 5.7% and 6.5% compared to fiscal 2024. The company also expects its full-year adjusted EBITDA to be between \$310 million and \$315 million. The company expects free cash flow as a percentage of adjusted net income to be more than 80% this year as well. Based on these estimates, we forecast EPS of \$1.23 for fiscal 2025.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$0.19	\$0.40	\$0.77	\$0.67	\$0.40	\$0.45	\$0.44	\$0.49	\$0.55	\$0.74	\$1.23	\$1.57
DPS	\$0.08	\$0.10	\$0.15	\$0.19	\$0.20	\$0.21	\$0.22	\$0.23	\$0.24	\$0.26	\$0.27	\$0.33
Shares¹	160.5	161.3	160.1	158.2	157.8	157.8	158.4	158.0	156.8	156.9	157.5	152.0

Despite Mueller's revenues modestly growing over the past few years, they are still near the same levels they were a decade ago. The company has sustained a positive bottom line since 2015, but growth has lagged. The industry in which Mueller operates is very mature, with little to no expansion prospects. Hence apart from acquisitions, the company has few growth avenues. Further, the currently accelerated inflation could hurt the company if it isn't able to match higher costs with adequate price increases. Still, powered by growing revenues, we estimate EPS growth of 5% in the medium-term.

Mueller has never cut its dividend since its IPO. It has grown annually over the past 10 years, though at a humble rate since over the last five years. We expect DPS growth of around 4% going forward, considering Mueller's limited

¹ Share count is in millions.

profitability growth catalysts ahead. Continuous buybacks could contribute to EPS growth, but only \$10 million worth of stock was bought in both fiscal 2023 and fiscal 2024.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	48.5	29.7	15.6	17.2	26.2	22.5	48.0	25.1	22.8	21.3	21.3	18.0
Avg. Yld.	0.9%	0.8%	1.3%	1.7%	1.9%	2.0%	1.5%	1.9%	1.9%	1.6%	1.0%	1.2%

Over the past decade, Mueller's valuation multiple has fluctuated based on profitability expectations. Currently, shares trade at 21.9 times our expected FY2025 EPS, despite limited growth prospects. We believe a fair valuation would be 18 times EPS. This is especially justified in a high-interest rate environment, as the company's thin growth prospects do not warrant a premium. The historical stock premium is attributed to water-related investments attracting investor interest for their mature and mission-critical business models. We believe the stock's yield will likely remain soft overall as well.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	42%	25%	19%	28%	50%	47%	50%	47%	44%	35%	22%	21%

We consider the stock's dividend relatively safe even as the payout ratio has moved higher over the past few years. The company is a market leader in water and wastewater infrastructure upgrades that see relatively stable annual demand. Water utility companies must modernize their facilities every a certain time period; hence robust demand should remain. The company claims that while the valve and hydrant products industry is competitive, it is a mature one and many end users are slow to transition to brands other than their historically preferred brand. Hence sales should not fluctuate wildly. Sales should remain relatively stable under a recession as well, as was the case during the Great Financial Crisis. However, the company still has little to no competitive advantages and is subject to limited growth catalysts ahead. On the positive side, Mueller's total debt position has been declining consistently, from \$1.3 billion in 2006 to \$450.0 million as of the latest quarter. The company also has no outstanding debt maturities prior to June 2029, which should allow for flexible capital allocation in the medium-term.

Final Thoughts & Recommendation

Mueller Water Products possesses certain attractive qualities, such as robust revenues, an improving balance sheet, and a healthy dividend payout ratio. Still, we believe the stock lacks prospects to deliver meaningful returns in the coming years. This is due to the possibility of valuation headwinds largely offsetting gains from growth in Mueller's financials. In any case, we rate the stock as a hold due to its decent dividend growth history.
