Overview & Current Events

Omega Flex, Inc. (OFLX) is based in Exton, Pennsylvania and manufactures and sells flexible metal hoses and accessories for residential, commercial, and industrial applications across North America and internationally. Its products include flexible gas piping, medical tubing, and containment piping, marketed under brands like TracPipe, CounterStrike, and MediTrac. Serving industries such as construction, manufacturing, and healthcare, the company distributes its products through representatives, distributors, wholesalers, and direct sales. Founded in 1975 as Tofle America, Inc., it adopted its current name in 1996.

On April 30, 2025, Omega Flex, Inc. reported its financial results for the first quarter ended March 31, 2025. The company posted net sales of $23.33 million, a 7.5% decrease from $25.22 million in the same period of 2024, primarily due to lower sales unit volumes attributed to suppressed market conditions and a decline in housing starts. Net income declined by 15.4% to $3.57 million, or $0.35 per diluted share, compared to $4.22 million, or $0.42 per share, in the first quarter of the previous year. Despite the downturn, Omega Flex maintained a strong gross profit margin of 60.3%, slightly improving from 59.9% in the prior year, reflecting effective cost control measures. Operating profit decreased by nearly 20% to $4.05 million, down from $5.06 million, impacted by the reduced sales volume.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	$1.44	$1.32	$1.49	$1.64	$1.40	$1.64	$2.17	$1.92	$1.71	$1.51	***$1.60***	***$2.30***
DPS	$0.00	$0.00	$0.66	$0.94	$1.08	$1.12	$1.18	$1.26	$1.31	$1.36	***$1.36***	***$1.55***
Shares	10.1	10.1	10.1	10.1	10.1	10.1	10.1	10.1	10.1	10.1	***10.1***	***10.1***

We expect OmegaFlex to grow its earnings per share at a 7.5% CAGR over the next half-decade. The main drivers will be continued product innovation and diversification as it develops new products to replace traditional rigid piping systems, cutting costs and improving operating efficiencies, and increasing its total addressable market. That said, the company faces risks to its growth initiatives as it is susceptible to supply chain disruptions, significant market competition, and broader macroeconomic conditions.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	8.6	10.2	9.8	9.6	12.0	9.4	8.1	9.7	11.4	13.8	***18.9***	***18.0***
Avg. Yld.	0.0%	0.0%	4.5%	6.0%	6.4%	7.3%	6.7%	6.7%	6.7%	6.5%	***4.5%***	***3.7%***

OmegaFlex is currently trading at a P/E ratio of 18.9, significantly above its 10-year historical average of 11.1-12.0. This suggests the stock is priced at a premium, likely due to strong earnings growth or investor optimism. The dividend yield of 4.5% is lower than past levels, indicating that price appreciation has outpaced dividend growth. Looking forward, if earnings remain strong, the P/E multiple could stabilize between 18-22, but a slowdown in growth may cause it to

contract toward 15-18. Over the next five years, a reasonable valuation range would be 15-20, depending on economic conditions and earnings performance.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	0%	0%	44%	57%	77%	68%	54%	66%	77%	90%	***85%***	***67%***

OmegaFlex benefits from a strong competitive advantage due to its leadership in flexible gas piping systems, offering innovative and regulatory-compliant solutions for residential, commercial, and industrial applications. The company has built a solid reputation through proprietary products, long-term customer relationships, and steady demand driven by safety regulations. During the Great Recession, OmegaFlex remained relatively stable due to the essential nature of its products, though it faced some construction-related slowdowns. The company also navigated the COVID-19 downturn well, benefiting from the housing boom and infrastructure spending. Its niche market positioning ensures resilience, but industry slowdowns could still impact demand. OmegaFlex maintains a strong balance sheet with minimal debt, ensuring financial flexibility and reducing interest rate risk. The company generates steady cash flow, allowing it to fund operations, dividends, and reinvestments without relying on excessive leverage. This capital-light model provides stability, making it well-positioned to withstand economic downturns. With strong liquidity and interest coverage, OmegaFlex has the ability to invest in growth initiatives while maintaining shareholder returns. While its financial position remains solid, future expansion will depend on maintaining earnings momentum. The company's low debt profile mitigates financial risk, making it a relatively safe investment despite its high valuation. OmegaFlex's payout ratio has increased significantly, reaching 90% in 2024 compared to 44-57% in prior years. This suggests that most of its earnings are being distributed to shareholders rather than reinvested for growth. While a high payout ratio supports dividend stability in the short term, it limits the potential for future increases unless earnings continue rising. If profitability weakens, the company may need to adjust payouts to preserve capital. With earnings growth, the payout ratio could moderate to 70-80%, maintaining dividend stability.

Final Thoughts & Recommendation

Between OFLX's 4.5% dividend yield, expected 7.5% EPS CAGR over the next 5 years, and expected -1% valuation multiple CAGR over that same period, we expect a 10% total return CAGR over the next half-decade, making it a Hold.
