## Overview & Current Events

“Quality Communications” was started in the living room of Dr. Irwin Jacobs in 1985. The company’s first product and service was a satellite used by long-haul trucking companies that could locate and message drivers. Qualcomm, as it is known today, develops and sells integrated circuits for use in voice and data communications. The chip maker receives royalty payments for its patents used in devices that are on 3G, 4G, and 5G networks. Qualcomm has a current market capitalization of \$153 billion and has annual sales of ~\$43 billion.

On April 9<sup>th</sup>, 2025, Qualcomm increased its quarterly dividend 4.7% to \$0.89, marking the company’s 23<sup>rd</sup> consecutive year of dividend growth.

On April 30<sup>th</sup>, 2025, Qualcomm announced results for the second quarter of fiscal year 2025 for the period ending March 30<sup>th</sup>, 2025. For the quarter, revenue grew 16.9% to \$10.98 billion, which was \$330 million above estimates. Adjusted earnings-per-share of \$2.85 compared very favorably to \$2.44 in the previous year and was \$0.04 better than expected.

For the quarter, revenues for Qualcomm CDMA Technologies, or QCT, grew 18% to \$9.47 billion. Handset sales increased 12% to \$6.93 billion, Internet of Things grew 27% to \$1.58 billion, and Automotive sales improved 59% to \$959 million. Qualcomm Technology Licensing, or QTL, was unchanged at \$1.32 billion. Qualcomm repurchased 11 million shares during the quarter at an average price of ~\$155. Qualcomm has ~\$13 billion, or 8.5% of its market capitalization, remaining on its purchase reauthorization.

Qualcomm is projected to earn \$11.77 per share in fiscal year 2025, up from \$11.49 and \$11.15 previously. This would represent growth of 15.2% from the prior year. We have updated our forecast accordingly.

## Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
<b>EPS</b>	\$4.66	\$4.44	\$4.28	\$3.69	\$3.59	\$4.19	\$8.54	\$12.53	\$8.43	\$10.22	<b>\$11.77</b>	<b>\$17.29</b>
<b>DPS</b>	\$1.80	\$2.02	\$2.20	\$2.43	\$2.48	\$2.60	\$2.72	\$2.86	\$3.10	\$3.30	<b>\$3.56</b>	<b>\$5.23</b>
<b>Shares<sup>1</sup></b>	1524	1476	1474	1470	1470	1130	1114	1113	1125	1129	<b>1115</b>	<b>1075</b>

Qualcomm’s earnings-per-share declined almost 16% during the 2007 to 2009 recession. The company has grown earnings-per-share at a rate of 9.1% per year over the last decade, but that growth rate accelerates to nearly 23% for the last five years. Agreements with major handset providers, a lower share count, leadership in 5G, and AI should allow the company to grow in the coming years. We reaffirm our earnings-per-share growth rate of 8% through fiscal year 2030 as this is more in-line with the long-term average growth rate. Applying the expected growth rate to our guidance for fiscal 2025, Qualcomm could earn \$17.29 by fiscal year 2030.

## Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	14.5	12.1	13.7	16.6	18.6	21.0	15.1	9.7	12.8	16.6	11.8	16.0
Avg. Yld.	2.7%	3.8%	3.8%	3.9%	3.8%	2.9%	2.1%	2.4%	2.9%	1.9%	2.6%	1.9%

Shares of Qualcomm have declined \$28, or 16.8%, since our February 6<sup>th</sup>, 2025 report. Based off the earnings forecast for fiscal 2025, the stock trades with a price-to-earnings ratio of 11.8. Qualcomm's stock had an average price-to-earnings ratio of 15.1 for the last decade, but we feel that 16 times earnings is an appropriate valuation target given recent results and tailwinds from 5G. If the stock were to revert to our P/E target by fiscal 2030, multiple expansion could add 6.3% to annual returns over this period.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	39%	46%	51%	67%	69%	62%	32%	23%	37%	32%	30%	30%

Qualcomm earnings declined during the last recession and would likely do so in the event of the next one. While handheld devices have become a necessity amongst consumers, the company would likely see a decline in earnings-per-share due to their high costs. The components that Qualcomm produces are considered to be the best available, so phone makers will likely continue using the company's products in future iterations of their devices. This is especially true as 5G becomes adopted and the handset cycle upgrades continue to occur.

## Final Thoughts & Recommendation

After second quarter results, Qualcomm is projected to return 16.6% annually through fiscal 2030, up from 11.8% previously. Our expected return stems from an 8% earnings growth rate, a starting yield of 2.6%, and a mid-single-digit tailwind from multiple expansion. Qualcomm has now produced five consecutive quarters of handset growth, a positive considering this product category's importance to the company. We have raised our five-year price target \$7 to \$277 due to earnings estimates for the fiscal year and we continue to view shares of Qualcomm as a buy due to projected returns and a strong dividend risk score.
