Overview & Current Events

Apollo Bancorp, through its subsidiary Apollo Trust Company, operates five branches, all located in Pennsylvania. These branches serve communities primarily within the Kiski Valley, northeast of Pittsburgh. The bank's main office is in Apollo, Pennsylvania, with additional branches in North Apollo, Spring Church, Allegheny Township, and North Washington. Apollo Trust focuses on providing personalized banking services, including residential and commercial loans, deposit accounts, and other financial services, primarily to individuals and businesses within its service area. The company has market cap of just \$20.9 million.

On July 16th, 2025, Apollo Bancorp posted its Q2 results for the period ending June 30th, 2025. For the quarter, Apollo reported net income of \$505,000, or \$0.98 per share, compared with net income of \$450,000, or \$0.87 per share, in the prior-year period. The \$55,000 year-over-year increase in earnings was powered by a \$206,000 increase in net interest income, offset by a \$94,000 increase in noninterest expense. For Q2, Apollo posted annualized ROA of 0.95% and annualized ROE of 8.00%. For FY2025, we see EPS of \$4.00.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$2.81	\$2.82	\$3.63	\$2.77	\$4.02	\$3.35	\$3.66	\$3.68	\$3.28	\$3.85	\$4.00	\$4.42
DPS	\$1.89	\$1.93	\$1.97	\$2.01	\$2.05	\$2.09	\$2.13	\$2.17	\$2.21	\$2.25	\$2.28	\$2.52
Shares²	0.5	0.5	0.5	0.5	0.5	0.5	0.5	0.5	0.5	0.5	0.5	0.5

Apollo Bancorp's EPS track record over the past decade reflects somewhat steady, yet slow growth. In 2015 and 2016, the bank experienced stable yet modest EPS growth. This period coincided with a low-interest-rate environment post the 2008 financial crisis, which, while stabilizing the economy, compressed the interest income that banks could earn, impacting net interest margins across the industry. Apollo Bancorp, which focuses on traditional banking services, saw steady loan demand but was limited by these industry-wide conditions.

In 2017, EPS rose to \$3.63, driven by rising interest rates initiated by the Federal Reserve and improving macroeconomic conditions. The higher interest rates boosted the bank's loan interest income, notably improving profitability. However, 2018 witnessed a dip back to \$2.77, reflecting challenges such as higher operating expenses and higher loan provisions due to credit quality concerns, common during a volatile economic cycle.

By 2019, Apollo Bancorp experienced a record EPS of \$4.02. This growth was driven by strong loan demand, particularly in the real estate sector, as Apollo capitalized on economic growth. Loan portfolio expansion and solid underwriting also played critical roles in improving profitability, resulting in better margins and asset quality. Still, the COVID-19 pandemic in 2020 brought a reversal, with EPS dropping to \$3.35. The economic uncertainty caused by the pandemic led to lower loan growth and higher provisions for potential credit losses, reflecting conservative risk management.

Apollo Bancorp (APLO)

Updated July 17th, 2025 by Nikolaos Sismanis

As the economy began recovering in 2021, Apollo Bancorp’s EPS rebounded to \$3.66 and remained stable at \$3.68 in 2022. The recovery was aided by economic stimulus measures and an increase in borrowing activity, alongside rising interest rates, which contributed to higher net interest margins. Moreover, Apollo Bancorp benefited from lower credit losses during this period, supporting its profitability. Strong interest income continued to drive performance in 2023. Looking ahead, we expect EPS growth to remain modest at around 2%, driven by Apollo’s concentrated regional focus and its conservative capital management, which limit significant growth opportunities. Apollo has raised its dividend for 16 consecutive years, with incremental raises of \$0.01 per quarter, or \$0.04 annually, over the past decade. While this steady growth is commendable, it has gradually slowed dividend increases. We expect this trend to continue, projecting 2% annual dividend growth through 2030, aligned with our EPS forecast.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	14.2	11.6	15.9	11.4	12.8	11.5	11.4	15.2	9.6	10.7	10.2	10.0
Avg. Yld.	4.8%	4.7%	4.6%	4.5%	4.9%	5.1%	5.2%	4.4%	6.1%	5.4%	5.6%	5.7%

In recent years, Apollo Bancorp has consistently traded at a price-to-earnings (P/E) ratio in the low teens. Apollo is now trading at a P/E of 10.2 based on our expected EPS for the year. We believe that this multiple fairly values the stock. The dividend yield, at a substantial 5.6%, is above Apollo’s historical average and should provide a solid income stream.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	67%	68%	54%	73%	51%	62%	58%	59%	67%	58%	57%	57%

Apollo Bancorp’s competitive advantage lies in its strong local ties and prudent capital management, which helped the bank, remain resilient during the COVID-19 pandemic. Its strong capital ratios, including a Tier 1 capital ratio of 12.54% and a total capital ratio of 21.36% as of the end of 2024 show its ability to weather economic downturns. These ratios provide a significant buffer against potential losses, reinforcing the bank’s capacity to maintain stability during economic downturns. Still, its highly concentrated regional focus and conservative strategy limit its growth opportunities, making it less competitive against larger institutions operating in broader markets. Note that the stock is highly illiquid, with a few hundred shares being exchanged daily, on average.

Final Thoughts & Recommendation

Apollo Bancorp features a solid dividend growth track record backed by relatively stable earnings resulting from a fairly conservative capital management strategy. Backed by the dividend yield, our soft growth estimates, and an assumption of a relatively stable valuation ahead we see annualized total returns of 6.7% through 2030. We rate the stock as a hold.
