Overview & Current Events

Bank of America, headquartered in Charlotte, NC, provides traditional banking services, as well as non-banking financial services to customers all over the world. Its operations include Consumer Banking, Wealth & Investment Management and Global Banking & Markets. Bank of America was founded in 1904, trades with a market capitalization of \$350 billion, and should produce about \$108 billion in revenue this year, making it one of the largest financial companies in the world on both measures.

Bank of America posted second quarter earnings on July 16th, 2025, and results were mixed. Earnings-per-share came to 89 cents, which was three cents ahead of estimates. Earnings were down from 90 cents in Q1, but higher from 83 cents in last year's Q2. Revenue was up 4.2% year-over-year to \$26.46 billion, but missed estimates by \$270 million.

Net interest income was up for the fourth consecutive quarter, reflecting eight consecutive quarters of deposit growth and year-over-year loan growth of 7%. NII was \$14.8 billion, slightly missing estimates, but up from \$14.6 billion in Q1, and \$13.9 billion a year ago. Noninterest income was \$11.8 billion, down from \$12.9 billion in Q1 and higher from \$11.7 billion a year ago.

Provisions for credit losses rose to \$1.59 billion from Q1's \$1.48 billion, and last year's \$1.51 billion in Q2. Noninterest expense was \$17.2 billion, down from \$17.8 billion in Q1, but higher from \$16.3 billion a year ago.

We now see \$3.65 in earnings-per-share for this year after Q2 earnings, up slightly from prior.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$1.31	\$1.50	\$1.83	\$2.54	\$2.75	\$1.87	\$3.57	\$3.19	\$3.08	\$3.21	\$3.65	\$6.72
DPS	\$0.20	\$0.25	\$0.39	\$0.54	\$0.66	\$0.72	\$0.78	\$0.86	\$0.92	\$1.00	\$1.04	\$1.53
Shares²	10,380	10,053	10,287	9,669	8,840	8,650	8,078	7,997	7,896	7,611	7,500	7,100

The damage from the financial crisis to Bank of America's earnings and dividend was massive. The company lost huge sums of money during the crisis, but since 2011, has produced an annual profit each year. Earnings growth has been robust but 2020 was certainly a setback. With the rebound in 2021 from relatively low levels, we see growth at 13% annually in the coming years from this year's \$3.65 per share.

Bank of America remains highly focused on reducing spending where possible, and it has finally begun building its loan book. The company has almost one trillion dollars of deposits it has not lent out, and the bank is still lending cautiously despite relatively high interest rates. The bank has aggressively bought back shares in the past, which will help boost earnings-per-share. We encourage investors to keep an eye on credit quality in the coming quarters, as well as management's willingness to lend out its massive hoard of deposits.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	12.6	10.3	13.5	8.7	10.7	14.1	11.3	10.4	10.9	13.7	12.9	12.5
Avg. Yld.	1.2%	1.6%	1.6%	2.3%	2.2%	2.7%	1.9%	2.6%	2.7%	2.3%	2.2%	1.8%

With a solid growth outlook and a healthy balance sheet, we believe Bank of America's valuation could settle on a low double-digits earnings multiple, in line with its peers. Shares go for 12.9 times earnings today, ahead of our fair value estimate of 12.5 times earnings. We forecast a modest headwind to total returns as a result. We see the yield potentially declining slightly over time as the valuation could improve to meet fair value.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	15%	17%	21%	21%	24%	39%	26%	27%	30%	31%	28%	23%

Bank of America started to raise its dividend payout ratio several years ago, but the company still only pays out less than a third of its profits in the form of dividends. The dividend in its current state is still very safe, even if earnings were to decline precipitously.

Bank of America competes with the largest banks in the U.S. It has advantages of scale given its massive branch footprint, its digital presence, and its balance sheet that puts it among the largest banks in the world. During the last financial crisis, Bank of America was hit hard, but major financial crises such as the one in 2009 are not common occurrences. During a normal recession, Bank of America should perform better than its 2007-2009 history would suggest. The impacts from the 2020 recession are a thing of the past, and the bank is moving forward with growth plans.

Final Thoughts & Recommendation

Bank of America is in a strong position, as its long-term earnings power is intact, its dividend is seeing a strong growth rate, and its balance sheet looks extremely healthy. Shares are slightly overvalued now, and the total return outlook of 14% annually has us at a hold rating. We see returns accruing from 13% earnings growth, the 2.2% yield, and a fractional headwind from the valuation.
