Overview & Current Events

Founded in 1887, Southern Missouri Bancorp, Inc. is a community bank with a rich corporate history. The bank holding company is the parent company of Southern Bank. Across more than 60 full-service branch offices and three limited-service branch offices, the Poplar Bluff, Missouri-based bank serves over 50 communities in Missouri, Arkansas, Illinois, and Kansas. As of June 30th, 2025, the company held \$5 billion in total assets.

SMBC provides a variety of services to these individual and corporate customers. That includes money market deposit accounts, savings accounts, retirement savings plans, and certificates of deposit. Loan products include residential mortgages, commercial real estate loans, commercial business loans, construction loans, home equity loans, and automobile loans. Additionally, SMBC offers investing and insurance services, debit or credit cards, and online and mobile banking services.

In recent years, the company has leaned into acquisitions to enhance its economies of scale and to realize cost synergies. In the past five years, SMBC has closed several deals and acquired \$1.5 billion in total assets. Its most recent acquisition, Citizens Bancshares, Co. (parent company of Citizens Bank & Trust Company) and its nearly \$1 billion in total assets, was completed in January 2023.

On July 23rd, SMBC reported its earnings for the fiscal fourth quarter ended June 30th, 2025. The company's net interest income jumped by 14.9% year-over-year to \$40.3 million during the quarter. This was made possible by a 21 basis point expansion in the net interest margin to 3.46% and a 6.5% increase in loans outstanding to \$4.1 billion in the quarter. SMBC's non-interest income decreased by 6.3% over the year-ago period to \$7.3 million for the quarter. That was due to a change in the accounting for the realization of tax credits during the quarter. SMBC's diluted EPS surged 16.8% year-over-year to \$1.39 in the quarter. This topped the analyst consensus for the quarter by \$0.14. On the same day, SMBC also announced an 8.7% boost in its quarterly dividend per share to \$0.25, marking its second consecutive year of dividend growth.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$1.98	\$2.08	\$2.39	\$3.14	\$2.99	\$5.21	\$5.22	\$3.85	\$4.41	\$5.18	\$5.60	\$7.85
DPS	\$0.36	\$0.40	\$0.44	\$0.52	\$0.60	\$0.62	\$0.80	\$0.84	\$0.84	\$0.92	\$1.00	\$1.47
Shares¹	7.4	8.6	9.0	9.3	9.1	8.9	9.2	11.3	11.3	11.3	11.3	14.0

Looking ahead, SMBC has positive momentum on its side. The company's net interest margin was up seven basis points sequentially. As the Federal Reserve announces cuts to the federal funds rate later this year and into next year, we believe that SMBC's net interest margin can improve further. Bolt-on acquisitions are an additional tailwind for the company. As a result, we believe that diluted EPS can rise by 7% annually through FY 2031 from the \$5.60 diluted EPS analyst consensus for FY 2026.

¹ Share count is in millions.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Avg. P/E	12.3	15.5	16.3	11.1	7.7	8.7	8.8	10.0	10.2	10.6	10.1	11.0
Avg. Yld.	1.5%	1.2%	1.1%	1.5%	2.6%	1.4%	1.7%	2.2%	1.9%	1.7%	1.8%	1.7%

Since FY 2016, SMBC's P/E ratio has varied from as little as the high single digits to as much as the mid-teens. The stock's average P/E ratio over that time was just above 11. Looking ahead, we still think that a valuation multiple of 11 remains sensible for SMBC. After all, the company's forward growth prospects are comparable to the growth posted in the past decade. The current P/E ratio of 10.1 is slightly below our fair value P/E ratio, which could make shares buyable here.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	18%	19%	18%	17%	20%	12%	15%	22%	19%	18%	18%	19%

SMBC's 138-year operating history means that it has very established relationships with its existing customers. Its wide variety of banking products and resulting harmonious customer relationships are also helping to drive organic growth. SMBC's diluted EPS has risen in eight out of the last 10 fiscal years. Even in its worst year of the decade (FY 2023), diluted EPS was only reduced by a quarter. Coupled with a dividend payout ratio that has historically been in the teens to 20% range, that makes the dividend relatively secure for a community bank. These elements make up for the fact that a plurality of SMBC's loans (32.5% as of June 30th, 2025) are in the commercial real estate class.

Lastly, SMBC's asset quality is sound. As of June 30th, the company's nonperforming assets to total assets ratio was 0.47%. That puts SMBC in a good position to navigate mild to moderate recessionary scenarios without a dividend cut.

Final Thoughts & Recommendation

SMBC's 1.8% dividend yield, 7.0% annual diluted EPS growth prospects, and 1.8% annual valuation multiple expansion could deliver 10.5% annual total returns over the next five years. This is why we're maintaining our Buy rating.
