Overview & Current Events

Albany International is a leading developer and manufacturer of engineered components. It uses advanced materials processing and automation capabilities and operates in two segments: Machine Clothing and Engineered Composites. The former involves the production of consumable belts that are essential for the manufacture of all grades of paper products. The latter involves the production of advanced materials-based engineered components for demanding aerospace applications. The solutions of the company render aircraft lighter and improve the fuel efficiency of engines. Albany International operates 30 facilities in 13 countries. It was founded in 1895, it is headquartered in Rochester, New Hampshire, and trades with a market capitalization of $1.8 billion.

On July 30th, 2025, Albany International reported financial results for the second quarter of fiscal 2025. Revenue decreased -6% over the prior year's quarter due to a -6.5% decrease of sales in Machine Clothing and a -5.7% decrease in sales in Engineered Composites. Gross profit decreased -13% and gross margin shrank by 260 basis points, mostly due to changes in the expected profitability of long-term contracts. Adjusted earnings-per-share declined -36%, from $0.89 to $0.57, and missed the analysts' consensus by $0.16. The company has beaten the analysts' estimates in 19 of the last 23 quarters. Management reiterated its guidance for annual revenue of $1.165-$1.265 billion, implying a -1% decrease at the mid-point, and adjusted earnings-per-share of $3.00-$3.40. We still expect earnings-per-share of $3.25 this year.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	$1.79	$1.64	$1.03	$2.57	$4.10	$3.05	$3.65	$3.89	$4.06	$3.18	***$3.25***	***$4.35***
DPS	$0.67	$0.68	$0.68	$0.69	$0.73	$0.77	$0.81	$0.88	$1.01	$1.05	***$1.08***	***$1.38***
Shares[2]	32.1	32.2	32.2	32.3	32.3	32.4	32.5	31.3	31.3	31.4	***31.4***	***31.5***

As shown in the above table, Albany International has exhibited a volatile performance record. On the bright side, if it meets our earnings-per-share forecast in 2025, it will have grown its earnings-per-share at a 6.1% average annual rate over the last decade. Even better, the company still has ample room for future growth thanks to some major growth drivers. Its Machine Clothing segment is likely to greatly benefit from the secular growth in the global demand for paper packaging amid the sustained boom in e-commerce. Its segment of Engineered Composites is likely to benefit from the recovery in the production rates of aircraft 737 MAX of Boeing and A320Neo of Airbus.

Albany International invests roughly 10% of its gross profit in R&D every year to create innovative solutions for its customers. Thanks to its innovations, it has steadily enhanced its EBITDA margin, from 25% in 2014 to 35%. It also pursues growth via acquisitions, such as the takeover of Heimbach for €153 million in late 2023, which enhanced the geographic footprint of the company in Europe and Asia and created material synergies. We expect similar acquisitions in the future. Overall, we expect Albany International to grow its earnings-per-share by 6.0% per year on average over the next five years. The company may exceed our expectations but we prefer to have a margin of safety given the volatile performance record of the industrial manufacturer.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	20.5	24.6	50.7	26.1	19.1	19.1	22.7	22.4	22.7	27.0	***19.1***	***20.0***
Avg. Yld.	1.8%	1.7%	1.3%	1.0%	0.9%	1.3%	1.0%	1.0%	1.1%	1.2%	***1.7%***	***1.6%***

Excluding 2017, in which depressed earnings caused an abnormally high price-to-earnings ratio, Albany International has traded at an average price-to-earnings ratio of 22.7 over the last decade and 22.8 over the last five years. Given the cyclicality of this business, we assume a fair earnings multiple of 20.0. The stock is now trading at a price-to-earnings ratio of 19.1. If it trades at our assumed fair valuation level in five years, it will enjoy a 0.9% annualized valuation gain.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	37%	41%	66%	27%	18%	25%	22%	23%	25%	33%	***33%***	***32%***

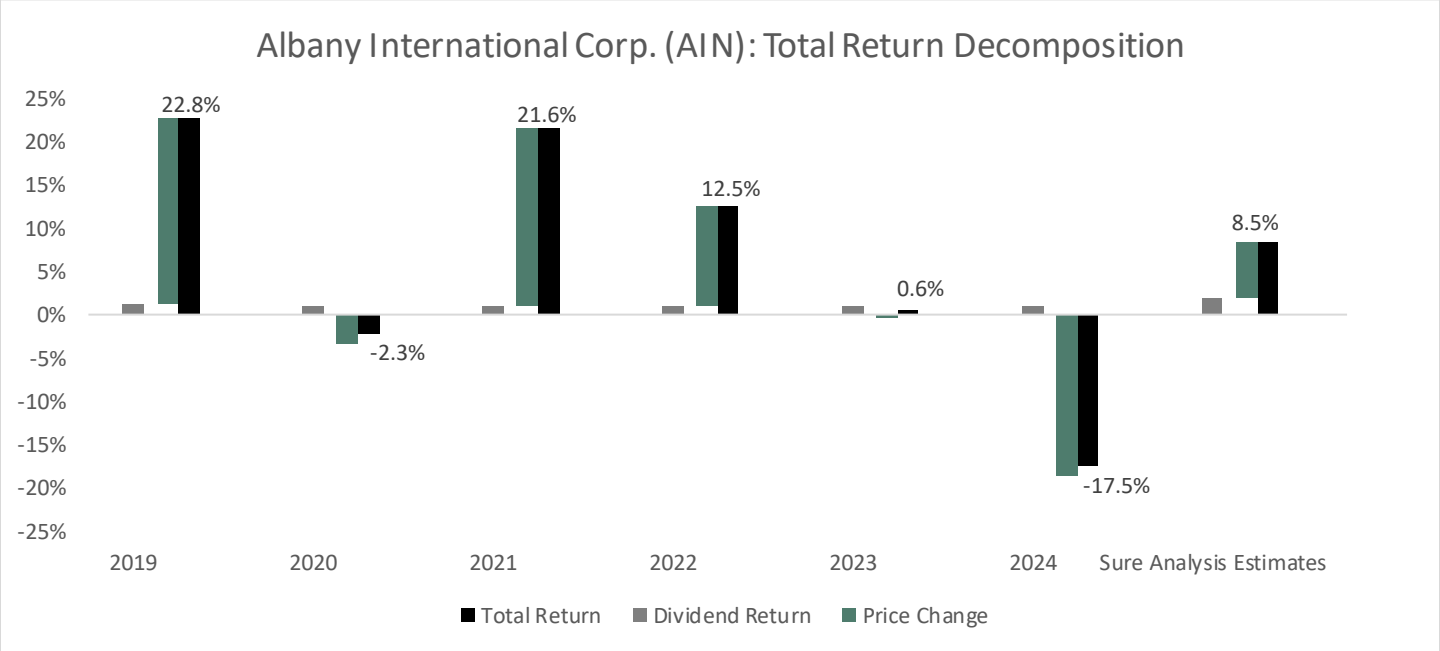

Albany International has raised its dividend for 7 consecutive years. Thanks to its healthy payout ratio of 33% and its promising growth prospects, the company can continue raising its dividend for many more years. On the other hand, the stock is offering a dividend yield of only 1.7% and hence it is not suitable for income-oriented investors.

On the bright side, Albany International has a rock-solid balance sheet. Management has repeatedly stated that it pursues a leverage ratio (Net Debt to EBITDA) below 3.0x but this metric is much better now (1.5x). The company also has a strong interest coverage ratio of 7.7 and net debt of $338 million, which is only 19% of the market cap. The rock-solid balance sheet is a testament to the strength of the business model and the quality of management. Nevertheless, investors should be aware of the cyclicality of this business and its sensitivity to recessions, mostly due to its exposure to the airline industry.

Final Thoughts & Recommendation

Albany International has dramatically underperformed the S&P 500 over the last 12 months (-31% vs. +15%) but it has not become too cheaply valued. It could offer an 8.5% total annual return over the next five years thanks to 6% growth of earnings, a 1.7% dividend and a 0.9% valuation tailwind. The stock receives a hold rating.
