Overview & Current Events

Atrium Mortgage Investment Corporation was founded in 2001 and was listed on the Toronto Stock Exchange in 2012. The company was formed as a non-bank lender to fill the void that results from a limited number of financial institutions operating in Canada. AMIVF provides different types of mortgage loans to customers, including residential mortgages, land and development financing, commercial term and bridge financing services, and construction and mezzanine financing. The company's loans range from 300,000 to 30 million CAD and are backed by real estate in major Canadian urban centers.

As of June 30th, 2025, AMIVF had 921.2 million CAD in mortgages outstanding across 326 loans. By total loan amount, most of these mortgages were residential properties (73.2%), with the remainder being commercial (26.8%). Most of the total mortgages outstanding were concentrated in the Greater Toronto Area (88.5%), with the rest in non-GTA Ontario (5.8%) and British Columbia (5.7%). Overall, these mortgages were relatively secure, with 94.8% of the portfolio having a loan-to-value ratio below 75%. That explains the weighted average loan-to-value ratio of 61.3% across the portfolio.

On August 7th, AMIVF shared its financial results for the second quarter ended June 30th, 2025. The company's revenue dropped by 15% year-over-year to 21.2 million CAD in the quarter. Adjusting for unfavorable currency translation, revenue declined by 16.5% over the year-ago period to \$15.2 million during the quarter. Rate cuts from the Bank of Canada led AMIVF's weighted average interest rate to fall to 9.3% for the quarter. The company's diluted EPS grew by 3.8% year-over-year to 0.27 CAD in the quarter. Accounting for currency translation, AMIVF's diluted EPS edged 2.1% higher to \$0.19 during the quarter.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$0.67	\$0.71	\$0.75	\$0.69	\$0.74	\$0.73	\$0.77	\$0.78	\$0.86	\$0.73	\$0.72	\$0.72
DPS	\$0.66	\$0.65	\$0.68	\$0.69	\$0.68	\$0.67	\$0.72	\$0.69	\$0.67	\$0.66	\$0.67	\$0.67
Shares²	26.8	27.1	33.3	36.6	41.5	42.4	42.8	43.3	44.0	47.2	47.6	53.3

Over the past decade, AMIVF's diluted EPS in USD has grown by about 1% annually. Moving forward, we continue to believe the company will have a difficult time growing its diluted EPS. As long-term interest rates fall, refinancing should pick up. That will lead to prepayments quickening and force AMIVF to reinvest the proceeds at lower weighted average interest rates. This can be mostly offset by lower financing costs and greater volumes. That is why we still think that diluted EPS will be approximately flat over the next five years.

¹ In its original Canadian Dollar declaration.

² Share count is in millions.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Avg. P/E	15.3	12.7	13.0	13.7	14.8	13.3	14.4	10.1	9.2	10.4	11.8	11.0
Avg. Yld.	6.5%	7.3%	7.0%	7.3%	6.2%	6.9%	6.5%	8.7%	8.5%	8.7%	7.9%	8.5%

Since 2015, AMIVF's P/E ratio has ranged from as low as the high single digits to as high as the mid-teens.

Over that time, the average P/E ratio was 12.7. Overall, we still think the five-year multiple of approximately 11 is more representative of AMIVF's fair value moving forward. Relative to the current P/E ratio of 11.8, shares remain modestly overvalued.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	99%	92%	91%	100%	92%	92%	94%	88%	78%	90%	93%	93%

AMIVF's most noteworthy competitive advantage is that it focuses on a niche market as a non-bank lender. Its borrowers don't qualify for traditional bank financing for various reasons, which enables higher portfolio yields compared to bank prime rates.

The company's average LTV ratios are also lower than most peers, which typically reduces credit risk and leads to fewer default losses. AMIVF pays dividends each month (in addition to a special dividend once a year). The company hasn't cut the dividend as a publicly traded company. However, it wouldn't have an especially big cushion in a severe and prolonged economic downturn (especially in the Greater Toronto Area) by virtue of its industry. On that note, the payout ratio is set to be in the low-90% range in 2025.

Final Thoughts & Recommendation

AMIVF's 7.9% yield, static diluted EPS, and 1.5% annual valuation multiple downside potential could lead to 5.7% annual total returns through 2030. As a result, we're maintaining our hold rating.

Total Return Breakdown by Year
