Overview & Current Events

Air Products & Chemicals is one of the world's largest producers and distributors of atmospheric and process gases, serving other businesses in the industrial, technology, energy, and materials sectors. Air Products & Chemicals operates through three main business units: Industrial Gases – Americas, Industrial Gases – EMEA, and Industrial Gases – Asia. Its 43-year streak of consecutive dividend increases qualifies it to be a member of the Dividend Aristocrats Index. The company is headquartered in Allentown, Pennsylvania.

Air Products & Chemicals reported its financial results for the third quarter of fiscal 2025 in August. The company generated revenues of \$3.02 billion during the quarter, which was up 1.0% year-over-year, beating the analyst consensus estimate by \$30 million. Air Products & Chemicals' growth rate was better than during the previous quarter, when the company reported a revenue decline of 1%. The company saw its operating margin decline in the Americas and in Europe, although margins improved in Air Products & Chemicals' Asia business, where operating margins expanded by 150 base points, which is why operating income, overall, was flat.

Air Products & Chemicals was able to generate adjusted earnings-per-share of \$3.09 during the fiscal third quarter, which was down 3% compared to the previous year's period. Following a record year in 2024, Air Products & Chemicals is guiding for weaker profits in fiscal 2025, with earnings-per-share seen at \$11.90 to \$12.10. The guidance implies an earnings-per-share decline of around 3% this year.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$6.57	\$7.55	\$6.31	\$7.45	\$8.21	\$8.38	\$9.03	\$10.14	\$11.51	\$12.43	\$12.00	\$16.06
DPS	\$3.20	\$3.39	\$3.71	\$4.40	\$4.64	\$5.36	\$5.68	\$6.36	\$6.87	\$7.08	\$7.16	\$8.71
Shares³	215	217	218	221	221	222	223	223	223	223	223	225

Between 2015 and 2024, Air Products & Chemicals generated earnings-per-share growth of 7% annually, which is a very solid growth rate. Growth was a bit uneven over that time frame, but the trend has been clearly positive. The dividend has been increased every year of the last decade and a lot longer than that as well.

Air Products & Chemicals' growth over the coming years will be driven by international expansion, as the company's Gases Asia business continues to grow at a very solid rate, although its American business remains the largest segment for now. Air Products & Chemicals keeps investing in new assets, both in existing markets and by entering new markets. Investments in NEOM will drive its green energy exposure and expand its presence in Saudi Arabia, while Air Products & Chemicals is also expanding its hydrogen footprint in several markets, investing heavily in recent years and for the foreseeable future in this industry in order to benefit from the expected market growth in the coming years and decades. These investments, coupled with margin growth initiatives, should lead to meaningful earnings-per-share growth for the company over the coming years, we believe.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	21.7	18.6	22.6	21.8	27.0	35.0	28.3	23.0	24.9	24.0	24.3	21.0
Avg. Yld.	2.2%	2.4%	2.6%	2.6%	2.1%	1.8%	2.3%	2.7%	2.4%	2.4%	2.5%	2.6%

Air Products & Chemicals has never traded at an especially low valuation, but there were wide movements in its valuation nevertheless. Based on current estimates, shares are trading for around 24 times this year's net profits right now, which is why we believe that shares are overvalued right here. The multiple compression that we expect will negatively impact the stock's total returns in the coming years.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	49%	45%	59%	59%	57%	64%	63%	63%	60%	57%	60%	54%

Air Products & Chemicals will pay out more than half of its net profits in the form of dividends this year. This is not an ultra-low payout ratio, but the dividend looks easily sustainable at the current level. The company's reasonable payout ratio also means that it should be able to raise its dividend regularly in the future, as it has done for decades.

Air Products & Chemicals' most compelling competitive advantage is its industry expertise. The company also benefits from high switching costs -- it is difficult to find a competitor that offers the full range of identical services in a particular geographic region. Air Products & Chemicals operates a relatively recession-resistant business. Earnings-per-share declined by just ~20% in 2009, during the Great Recession, for example.

Final Thoughts & Recommendation

Air Products & Chemicals is an attractive company at first sight. It holds a multi-decade streak of consecutive dividend increases, operates with a strong globalized business model, and has a good position in the growing gases industry. Earnings-per-share growth has been appealing in recent years, but the dividend growth rate has slowed down due to Air Products & Chemicals' large investments that soak up a lot of cash. We estimate that Air Products & Chemicals will generate reasonable but not strong total returns, which is why Air Products & Chemicals earns a hold rating today.
