Overview & Current Events

Canadian Utilities is a \$5.76 billion company with approximately 5,000 employees. ATCO owns 53% of Canadian Utilities. Based in Alberta, Canadian Utilities is a diversified global energy infrastructure corporation delivering solutions in Electricity, Pipelines & Liquid, and Retail Energy. The company prides itself on having Canada's longest consecutive years of dividend increases, with a 53-year streak. Unless otherwise noted, US dollars are used in this research report.

On July 30th, 2025, Canadian Utilities announced its Q2 results for the period ending June 30th, 2025. Adjusted earnings were \$88.3 million (\$0.33 per share), up \$2.9 million (\$0.02 per share) year-over-year. The growth in adjusted earnings was primarily driven by growth in the rate base and stronger seasonal spreads in natural gas storage services in ATCO Energy Systems and ATCO EnPower. This was partially offset by a lower return on equity (ROE), the completion of ECM funding recorded in the prior year, and lower compensation related to turbine availability guarantees at the Forty Mile wind facility. GAAP EPS for the quarter was \$0.25.

Additionally, Canadian Utilities continued advancing major infrastructure projects, including the Yellowhead Mainline Project in Natural Gas Transmission and the Central East Transfer Out Project in Electricity Transmission. The company also invested \$279.8 million in capital expenditures in Q2, with the majority allocated to regulated utilities within ATCO Energy Systems and ATCO Australia. We still expect earnings per share of \$1.73 for FY2025.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$0.81	\$1.54	\$1.32	\$1.53	\$2.50	\$1.04	\$0.96	\$1.53	\$1.76	\$1.03	\$1.73	\$2.10
DPS	\$0.85	\$0.97	\$1.14	\$1.15	\$1.30	\$1.37	\$1.39	\$1.31	\$1.35	\$1.26	\$1.33	\$1.50
Shares²	265	267	269	272	273	273	270	269	270	271	272	275

By benefiting from a stable business model, Canadian Utilities can slowly, but progressively, grow its earnings. The company consistently invests in new projects and benefits from the base rate increases, which grow at around 3% to 4% annually. In 2021, management had filed an application with the Alberta Utilities Commission to postpone Canadian Utilities' electricity and natural gas distribution rate increases.

The company received almost all deferred revenues by the end of 2022. Combining the company's growth projects and the possibility of modest margin improvements, we retain our projected growth rate at 4%. Our DPS CAGR estimate remains at 2.5%. The company will likely improve its payout ratio before its new projects start producing enough cash flows to re-accelerate dividend growth.

U.S. investors have enjoyed a lesser growth in their dividends than the Canadian ones over the past decade due to the depreciation of \$CAD to \$USD. Regardless, the stock's impressive 10-year dividend CAGR of 9.6% is more than enough to compensate for the FX fluctuations, progressively growing investors' income.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	19.3	20.9	18.3	18.2	15.0	22.9	16.5	17.9	14.3	23.0	16.2	15.0
Avg. Yld.	3.4%	3.6%	3.5%	4.6%	4.8%	4.8%	4.8%	4.8%	5.4%	5.3%	4.8%	4.8%

Canadian Utilities' shares currently yield an attractive 4.8%, a notable high for this legendary dividend payer. This above-average yield can be attributed to the above-average interest rates these days, prompting investors to value YieldCos at higher yields. The stock's current P/E ratio of 16.2 is notably below its historical average of about 19. However, again, we believe that the multiple compression is well-justified given that interest rates remain elevated. Investors demand higher tangible returns in the face of higher risk-free returns from T-bills.

Safety, Quality, Competitive Advantage, & Recession Resiliency

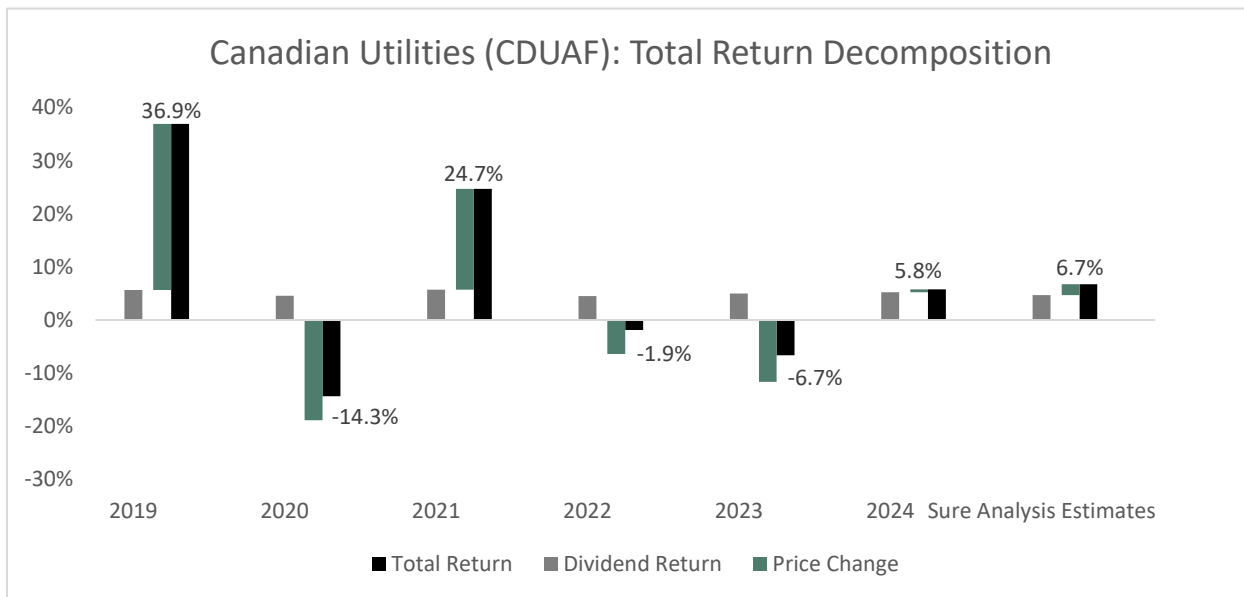

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	105%	63%	86%	75%	52%	132%	145%	86%	77%	122%	77%	71%

The company's competitive advantage lies in the moat regulated utilities are surrounded by. With no easy entry in the sector, regulated utilities enjoy an oligopolistic market with little competition threat. The company's resiliency has been proven for decade after decade. Despite multiple recessions and uncertain environments over the half a century, the company has withstood every one of them while raising its dividend. While Canadian Utilities' payout ratio were under pressure during 2020 (though dividends were in reality covered from its operating cash flows if we are to exclude depreciation and amortization,) by 2030 we expect it to have returned to more comfortable levels, of around 71% of its net income.

Final Thoughts & Recommendation

We believe that Canadian Utilities is an excellent hold for income-oriented investors who seek stable and predictable returns. The above-average dividend yield is quite attractive, and we believe that Canadian Utilities offers low volatility and a stable investment case during a time of high uncertainty. However, the valuation is likely to remain muted in the current interest-rates environment. We project annualized returns of 6.7%, driven by the 4.8% dividend yield, modest EPS growth expectations, and a soft valuation headwind. Shares earn a hold rating.
