Overview & Current Events

Edison International is a renewable energy company that is active in energy generation and distribution. Edison International also operates an energy services and a technologies business. The company was founded in 1987 and is headquartered in Rosemead, CA. Edison International has a market capitalization of \$20 billion.

On July 31, 2025, Edison International reported its financial results for the second quarter of 2025. Edison International reported second-quarter 2025 net income of \$343 million, or \$0.89 per share, down from \$439 million, or \$1.14 per share, in the prior year. Core earnings were \$374 million, or \$0.97 per share, compared to \$475 million, or \$1.23 per share, last year. Southern California Edison (SCE) saw a year-over-year decrease in core earnings per share, driven by higher operations and maintenance expenses and regulatory impacts. Edison International Parent and Other reported an increased core loss per share, primarily due to higher interest expenses.

Since January 1, 2025, without a 2025 GRC decision, SCE recognizes revenue based on the 2024 authorized revenue requirement, adjusted for the 2025 CPUC-authorized ROE. CEO Pedro J. Pizarro highlighted ongoing discussions to enhance California's AB 1054 regulatory framework, expressing confidence in legislative actions to strengthen wildfire policies. He emphasized the January wildfires' importance, noting SCE's investments in innovative solutions to reduce wildfire risks and enhance infrastructure resiliency. The company reaffirmed its 2025 earnings guidance, with basic EPS ranging from \$8.22 to \$8.62 and core EPS from \$5.94 to \$6.34, incorporating \$2.28 per share in non-core items for the first six months.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$4.15	\$3.92	\$4.50	\$4.15	\$4.70	\$4.52	\$4.59	\$4.59	\$4.76	\$4.93	\$6.06	\$7.30
DPS	\$1.73	\$1.98	\$2.23	\$2.43	\$2.48	\$2.58	\$2.69	\$2.84	\$2.95	\$3.17	\$3.31	\$4.15
Shares³	325.8	325.8	325.8	325.8	362.6	379.3	380.7	382.6	384.5	385.0	384.8	410.0

Edison International remained highly profitable during the last financial crisis, as the company's earnings-per-share declined by just 12% between 2008 and 2009 and started to rise again during 2010. Edison International is thus not impacted by the strength of the economy to a significant degree. On the other hand, Edison has failed to generate strong growth since The Great Recession. Edison International's regulated utility business is a slow grower, which is typical for utilities, but the business generates very stable cash flows. Its non-regulated segments, such as renewable energy production via methods ranging from biomass to wind energy, have the potential to grow at a somewhat higher rate. Due to being non-regulated, this business can be more cyclical than the regulated utility operations. Edison has put a focus on renewable energy when it comes to energy production over the last decade. Among other moves, Edison has also sold coal power plants and shut down a nuclear power plant. This was, at least partially, based on heavy regulation in California, where Edison operates, as California no longer allows utilities to generate electric power from coal. We

Edison International (EIX)

Updated July 31st, 2025 by Samuel Smith

expect that Edison International will be able to grow its earnings-per-share at a 3.8% annualized rate going forward, relatively in line with the growth that the company has generated in the past. Edison International has grown its dividend annually through much of the past two decades, with growth accelerating more recently.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	13.0	14.8	17.9	17.2	13.7	15.3	14.2	14.2	13.0	13.3	8.6	11.0
Avg. Yld.	3.2%	3.4%	2.8%	3.4%	3.9%	3.7%	4.1%	4.4%	4.8%	4.8%	6.4%	5.2%

Edison International trades at 8.6 times this year’s expected net profits, which we view as undervalued. While our fair value estimate of 11 times earnings is well below the average over the past half-decade, given the current high interest rate environment as well as some of the aforementioned unique challenges facing utilities in California, we think this is reasonable. As a result, we expect the dividend yield to move back near its historical levels.

Safety, Quality, Competitive Advantage, & Recession Resiliency

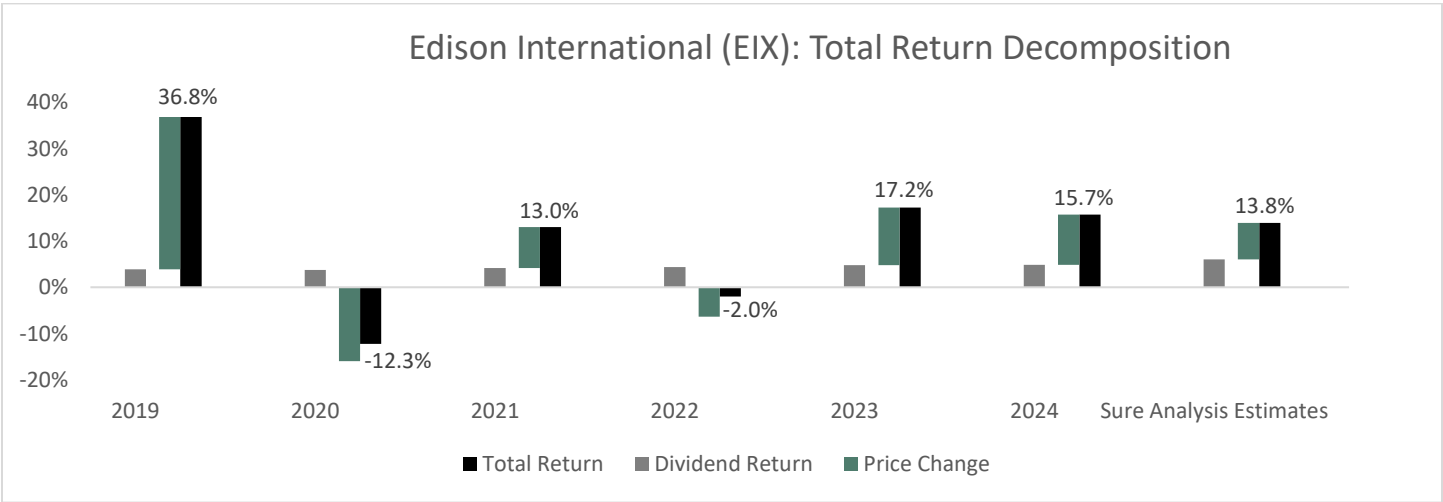

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	42%	51%	50%	59%	53%	57%	59%	62%	62%	64%	55%	57%

Despite the fact that earnings have seen some ups and downs, Edison International grew its dividend very consistently throughout the last decade. This was only possible due to an increase in the company’s dividend payout ratio, as its earnings-per-share did not grow as consistently. The dividend still looks relatively safe, though, as Edison International’s operations are not overly cyclical. Its dividend growth rate will likely slow down moving forward. Edison International belongs to California’s largest utilities, as the company serves about 13 million customers in the state. Due to the regulated nature of the utilities business, Edison International does not have to worry about significant competitive pressures. The company’s operations have been very recession-resilient in the past, and this will likely remain the case going forward, as consumers need electricity no matter how well the economy is doing.

Final Thoughts & Recommendation

Edison International is one of the larger publicly traded utilities. Earnings should continue to grow over the long term with population and economic growth, but fire risks and regulatory overhang from California’s government will drag on total returns. That said, the company offers a low-risk 6.4% yield. We expected total annualized returns over the next half-decade to be 13.8%, but the mediocre dividend growth makes it a Hold.
