Overview & Current Events

Genuine Parts Company was founded in 1928 and since that time, it has grown into a sprawling conglomerate that sells automotive and industrial parts, electrical materials, and general business products. Its global span reaches throughout North America, Australia, New Zealand, and Europe and is comprised of more than 3,000 locations. It has about 63,000 employees and trades with a market capitalization of \$18.4 billion, with about \$24 billion in annual revenue. Genuine Parts is also a Dividend King, having raised its dividend for an incredible 69 consecutive years.

Genuine Parts posted second quarter earnings on July 22nd, 2025, and results were much better than expected. Adjusted earnings-per-share came to \$2.10, which was four cents ahead of estimates. Revenue was \$6.2 billion, up 3.3% year-over-year, and beating estimates by \$90 million. However, the company noted that tariffs are going to be a potentially sizable impact on its operations this year, driving concerns over margins.

The company's Automotive Parts Group saw sales up 5%, while Industrial Parts rose by 0.7%. Comparable sales in Automotive rose 0.4%, while comparable sales for Industrials was down 0.1%.

Genuine Parts now expects sales growth of 1% to 3% for this year, down from 2% to 4%. In addition, earnings were reduced by 25 cents per share on both ends of the range, which is now \$7.50 to \$8.00. Free cash flow guidance was cut from ~\$900 million to ~\$800 million.

Management noted that given it's a major supplier to General Motors, it's highly vulnerable to tariff exposure. With these factors in mind, we've reduced our estimate of earnings to \$7.70 per share for this year.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$4.63	\$4.59	\$4.71	\$5.68	\$5.69	\$5.27	\$6.91	\$8.34	\$9.33	\$8.16	\$7.70	\$10.80
DPS	\$2.46	\$2.63	\$2.70	\$2.88	\$3.05	\$3.16	\$3.28	\$3.58	\$3.80	\$4.00	\$4.12	\$5.26
Shares²	150	148	147	147	146	144	142	142	139	139	139	137

Earnings-per-share growth has seen stops and starts but over the long-term, Genuine Parts delivers. The company's businesses are all what could be considered staples as it serves businesses and consumers in areas where there is likely to be demand for the long run. The company's acquisitions have led the way in terms of growth and will continue to do so moving forward. We are forecasting 7% annualized earnings-per-share growth for the next five years in a normalization from what should be fairly low earnings in 2025. The company's nearly constant acquisitions should help keep the top line moving, but we note significant margin deterioration of late in both of its primary segments. We note margins improved late in 2024, but were virtually flat in 2025.

Genuine Parts' pipeline of new acquisitions should keep the trend of higher revenue in place for the foreseeable future, with sales growth being the primary driver of earnings-per-share growth moving forward, in concert with a small amount of share repurchases. The major risk now is sales growth as OEMs see less demand on tariff-related pricing increases, and the margin impacts that could hit GPC as a result.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	19.5	20.8	19.2	17.0	17.8	17.1	17.7	20.8	14.8	14.3	16.8	15.0
Avg. Yld.	2.7%	2.8%	3.0%	3.0%	3.0%	3.5%	2.7%	2.0%	2.7%	3.4%	3.2%	3.2%

The price-to-earnings ratio has been fairly steady in recent years under 15. The stock now trades for 16.8 times our earnings estimate for this year after the guidance cut with Q2 earnings. With the price-to-earnings ratio above our long-term fair value estimate at 15, we see a small annual headwind to total returns from the valuation. We note we've reduced the fair value estimate multiple on heavily revised guidance on the assumption investors will pay less for GPC for the foreseeable future. Q2 results reinforce that.

Genuine Parts is famous for its dividend, as its 69 consecutive years of increases makes it a Dividend King. The current yield of 3.2% is elevated relative to historical norms.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	52%	56%	57%	51%	54%	60%	47%	43%	41%	49%	54%	49%

Genuine Parts' payout ratio had been quite steady between 50% and 60% of earnings for many years, and is there again today. We see the dividend rising at roughly the pace of earnings growth, keeping the payout ratio at around half of earnings in the years to come, consistent with the past decade.

Genuine Parts' competitive advantages include its wide array of industries and customers served, geographic reach and the fact that it sells what amount to industrial staples. Genuine Parts is still prone to earnings declines during recessions but performs relatively well; this is a defensive stock for a retailer/wholesaler.

Final Thoughts & Recommendation

Overall, Genuine Parts Company looks overvalued based upon its current valuation. Given this, we are expecting total annual returns of 7.6% for the next five years. Returns could accrue from the current 3.2% yield and 7% earnings growth, as well as a small headwind from the valuation. Given this total return outlook, we are reiterating our hold rating, but note there is significant uncertainty ahead given 2025 guidance, including the impact of tariffs.
