Overview & Current Events

Otter Tail Corporation goes back to 1907 with its electric utility, which was founded in Fergus Falls, MN. The company eventually expanded into metal fabrication and plastics manufacturing and today, it generates over \$1 billion in annual revenue split between utility, manufacturing and plastics operations. Otter Tail has a \$3.5 billion market capitalization.

On August 5, 2025, Otter Tail Corporation reported results for the second quarter ended June 30, 2025, highlighting continued strength in its diversified operations across electric utility, manufacturing, and plastics businesses. The company posted consolidated net income of \$96.2 million, or \$2.30 per diluted share, compared with \$92.4 million, or \$2.21 per diluted share, in the same quarter of 2024. Operating revenue was \$401.7 million, down from \$423.6 million a year earlier, as lower plastics pricing partially offset growth in utility and manufacturing segments. The electric utility delivered net income of \$28.9 million, up from \$25.4 million, supported by customer growth, favorable rate recovery, and increased demand. The manufacturing segment earned \$16.7 million, up from \$13.5 million, driven by strong demand in metal fabrication and equipment sales. The plastics segment, which had experienced record profitability in prior years, contributed \$50.6 million of net income, slightly below the \$53.5 million reported a year earlier due to moderating resin pricing but still at historically elevated levels. Operating expenses decreased modestly, supporting margin stability. For the first half of 2025, consolidated net income totaled \$168.7 million, or \$4.05 per diluted share, compared with \$159.1 million, or \$3.81 per share, in the prior year. Cash provided by operating activities was \$221.5 million in the first half, while capital expenditures reached \$133.6 million, primarily for utility investments in transmission and renewable generation. The company ended the quarter with a strong balance sheet and manageable debt levels. A quarterly dividend of \$0.468 per share was declared, marking the 85th consecutive year of dividend payments. Overall, the quarter demonstrated Otter Tail's balanced business model, with strong earnings contributions from all three segments and ongoing investment in long-term growth.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$1.56	\$1.60	\$1.86	\$2.06	\$2.15	\$2.34	\$4.23	\$6.78	\$7.00	\$7.17	\$6.55	\$7.50
DPS	\$1.23	\$1.25	\$1.28	\$1.34	\$1.40	\$1.48	\$1.56	\$1.65	\$1.75	\$1.87	\$2.10	\$2.65
Shares³	38.0	39.4	39.6	39.7	40.2	41.5	41.6	41.6	41.7	41.8	41.9	42.0

Otter Tail's earnings-per-share history has been fairly strong in the last decade, as earnings bottomed in 2010 and have grown every year since. We see earnings per share increasing at a 2.7% annualized pace going forward. The company's manufacturing and plastics businesses have benefited from higher order rates as well as a lower income tax rate, while seeing gross margins tick higher over time. The higher operating expenses seen in prior quarters are uncharacteristic for Otter Tail, so we don't see any long-term impairment just yet. We see all of these factors as continuing until further notice and as a result, earnings should decline steadily in the coming years. Otter Tail's full rate case in South Dakota is

still pending, but the company has a favorable relationship with its regulators, so we are optimistic that Otter Tail will continue to receive the rate increases it needs to grow revenue.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	18.2	20.2	22.1	22.2	24.2	17.4	17.5	8.1	13.4	13.0	12.9	15.0
Avg. Yld.	4.2%	4.3%	3.9%	3.1%	2.9%	2.7%	3.6%	2.5%	2.8%	2.8%	2.5%	2.4%

The stock’s price-to-earnings multiple has moved significantly lower in recent years after being artificially inflated due to low earnings-per-share from 2008 to 2011. However, today’s multiple of 12.9 is below its recent historical norm of 20 and below our fair value estimate of 15. We think shares will return to a multiple of roughly 15 over time, producing a tailwind to total returns moving forward.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	79%	78%	69%	65%	65%	63%	37%	24%	25%	26%	32%	35%

Otter Tail’s payout ratio is generally around one-third of earnings and we don’t expect that will change longer-term. The company continues to boost its payout at roughly the same rate as earnings, so the dividend is quite safe and should continue to move higher over time.

Otter Tail’s competitive advantage of having a diversified business model is also its disadvantage during recessions. The non-utility businesses are providing strong growth today but during the last recession, earnings fell much more than expected for a pure utility. That will likely happen next time there is a downturn, so investors should keep this in mind.

Final Thoughts & Recommendation

We see Otter Tail as a stock that offers a 8.1% annualized total return potential moving forward along with a safe 2.5% dividend yield that will grow slowly but steadily over time. As a result, it looks like a decent investment at the moment, making it a Hold.
