Overview & Current Events

Shutterstock sells high-quality creative content for brands, digital media and marketing companies through its global creative platform. Shutterstock's platform hosts the most extensive and diverse collection of high-quality 3D models, videos, music, photographs, vectors and illustrations for licensing. The \$662 million company reported \$935 million in revenues last year and is headquartered in New York, New York.

On January 7th, 2025, Shutterstock announced it entered a merger agreement with Getty Images through a merger of equals. The combined company will retain the name Getty Images Holdings, Inc and trade on the NYSE under ticker GETY. Getty Images shareholders will own roughly 54.6% of the entity and Shutterstock shareholders will own the remaining 45.3%. Shareholders of SSTK will receive \$28.84870 of cash, or 9.17 shares of Getty Images plus \$9.50 in cash per share. The combined company would have revenue between \$1,979 million and \$1,993 million, 46% of it being subscription revenue. About \$175 million of annual cost savings is forecast by the third year, with most of this expected after 1 to 2 years. The deal has received shareholder approval, and is expected to close in H2 2025.

On January 27th, 2025, Shutterstock announced a \$0.33 quarterly dividend, a 10% increase over the prior year.

On July 29th, 2025, Shutterstock published its second quarter results for the period ending June 30, 2025. Quarterly revenue grew by a solid 21% year-on-year, and beat analyst estimates by nearly \$19 million. Adjusted EPS of \$1.19 increased by 19%, surpassing analyst estimates by \$0.06.

Due to the pending merger with Getty Images, Shutterstock is not providing guidance for 2025.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$0.54	\$0.93	\$0.48	\$1.57	\$1.23	\$2.62	\$3.48	\$3.87	\$4.35	\$3.89	\$4.55	\$5.81
DPS	-	-	-	-	-	\$0.68	\$0.84	\$0.96	\$1.08	\$1.20	\$1.32	\$1.68
Shares¹	35.9	35.1	34.6	34.9	35.3	35.8	36.5	36.0	35.9	35.1	35.0	35.0

Shutterstock has grown at astonishing rates over the past decade. Since 2015, the company's adjusted EPS has increased at a 24.5% CAGR. And in the last five years, Shutterstock's EPS has soared 25.9% annually.

It has achieved this level of earnings growth from its many acquisitions that have expanded its product portfolio.

Shutterstock has acquired many companies in recent years, such as Envato (May 2024), Backgrid (Feb 2024), GIPHY (May 2023), as well as Pond5 (2022), PicMonkey, TurboSquid, and Amper Music in recent years. Furthermore, Shutterstock has long-term goals it expects to achieve in 2027, such as \$1.2 billion in revenue and \$350 million in adjusted EBITDA.

Near-term growth is likely to materialize from further M&A, such as through the merger of equals with Getty Images.

Barring the Getty Images merger, Shutterstock could be reasonably expected to generate 5% adjusted EPS growth through 2030.

¹ Share count is in millions.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	91.9	49.8	87.3	25.5	32.6	18.2	28.5	17.3	12.3	10.0	4.4	8.0
Avg. Yld.	-	-	-	-	-	0.6%	0.8%	1.4%	2.0%	3.0%	6.6%	3.6%

The stock currently trades at a deep discount with a P/E ratio of just 4.4. We believe a fair P/E multiple for Shutterstock given its current situation is 8.0 times earnings. Given the 48% decline in the company's share price in the last one year, the stock now offers a nearly all-time high dividend yield of 6.6%. However, once Shutterstock and Getty merge, the dividend is likely to change materially. For instance, Getty Images does not currently pay a dividend.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	-	-	-	-	-	26%	24%	25%	25%	31%	29%	29%

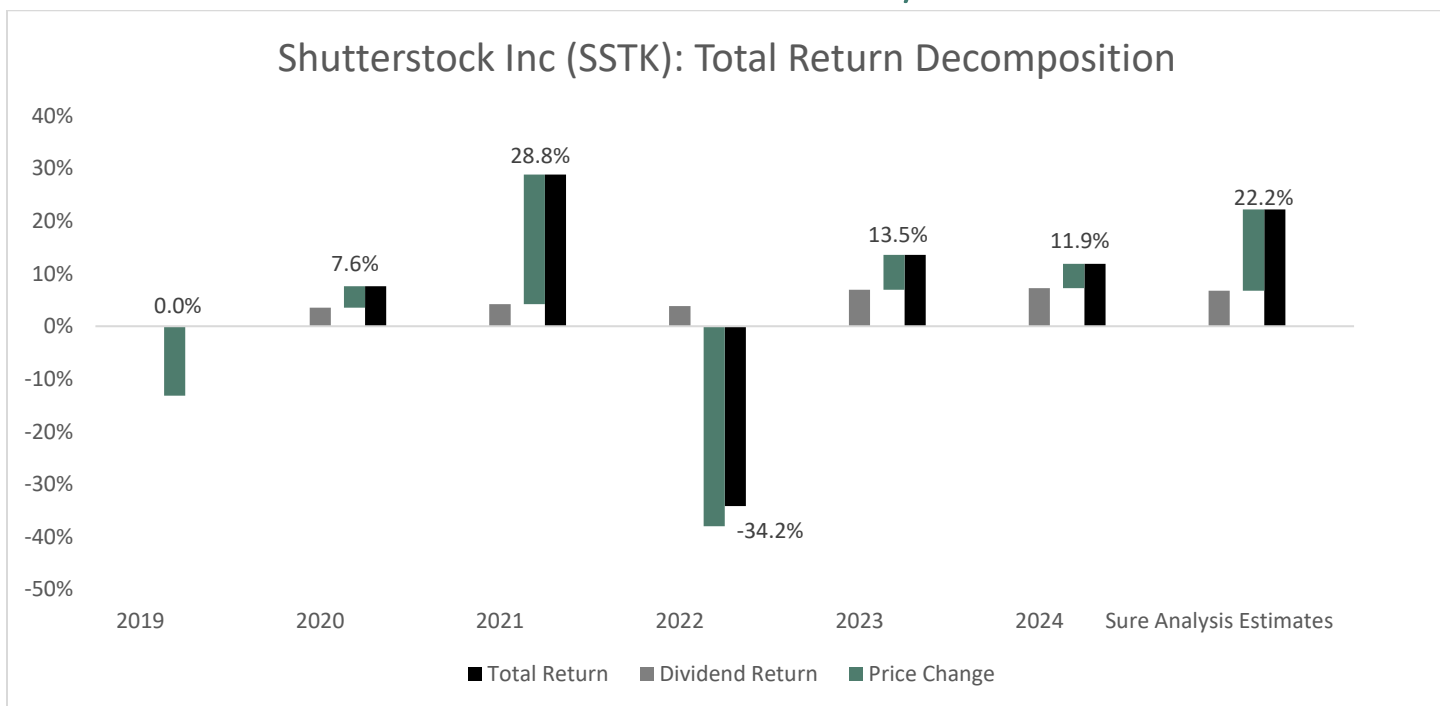

Shutterstock performed well during the pandemic, as its earnings nearly doubled and it initiated a dividend. However, this was a unique downturn where online sales soared phenomenally due to stay-at-home orders. In a prolonged downturn such as the great financial crisis, Shutterstock would likely face declining sales. Still, its dividend is currently well covered, with a 2025 payout ratio forecast for just 29% of adjusted net income.

Advances in AI imagery and video creation is a real risk factor for Shutterstock in the long term, as potential Shutterstock customers could opt for free or low-cost products off its platform.

Final Thoughts & Recommendation

Shutterstock has generated tremendous earnings growth rates over the past decade, largely due to its constant acquisitions. The company has agreed to a merger of equals with Getty Images, which will create the premier visual content company, but AI is a threat to their business model. We forecast annualized returns of around 22.2% through 2030, driven by 5.0% EPS growth, the 6.6% yield, and 12.9% P/E multiple expansion. Shutterstock earns a hold rating.
