Overview & Current Events

Best Buy Co. Inc. is one the largest consumer electronics retailers in North America with operations in the U.S. and Canada. Best Buy sells consumer electronics, personal computers, software, mobile devices, and appliances and provides services. At end of Q2 FY2026, Best Buy operated 885 Best Buy stores and 23 Best Buy Outlet Centers in the U.S., 20 Pacific Sales Stores, 21 Yardbird Stores, 128 Best Buy stores in Canada, and 28 Best Buy Mobile Stand-Alone Stores in Canada. Best Buy exited its Mexico operations in fiscal 2021. The company continues to lower total store count, continuing a long-term trend. The company's annual sales exceeded \$13.5B in fiscal 2025.

Best Buy reported Q2 FY2026 results on August 28th, 2025. Enterprise revenue increased to \$9,438M from \$9,288M and non-GAAP diluted earnings per share decreased to \$1.28 from \$1.34 on a year-over-year basis. GAAP diluted EPS declined to \$0.87 from \$1.34. Comparable enterprise revenue increased 1.6%.

Domestic revenue gained 0.9% to \$8,698M from \$8,623M on higher comparable sales, especially in gaming. Sales were lower for 3 out of 5 categories: Computing and Mobile Phones (+3.8%), Consumer Electronics (-4.9%), Appliances (-8.5%), Entertainment (+37.5%), and Services (-1.0%). Comparable domestic online sales increased +5.1% to \$2.86B compared to the prior year. Domestic online sales comprised about 32.8% of total domestic revenue.

International segment revenue grew 11.3% to \$740M from \$665M year-over-year due to a comparable sales increase in Canada and store openings. Sales were higher in 4 out of 5 categories: Computing and Mobile Phones (+9.5%), Consumer Electronics (+1.3%), Appliances (-5.7%), Entertainment (+57.3%) and Services (+2.2%).

Best Buy kept FY 2026 guidance at revenue of \$41.1B to \$41.9B and non-GAAP diluted EPS at \$6.15 to \$6.30.

Growth on a Per-Share Basis

Year ¹	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS²	\$2.78	\$3.56	\$4.42	\$5.32	\$6.07	\$7.91	\$10.01	\$7.08	\$6.37	\$6.37	\$6.23	\$7.58
DPS	\$0.92	\$1.12	\$1.36	\$1.80	\$2.00	\$2.20	\$2.80	\$3.52	\$3.68	\$3.76	\$3.80	\$4.62
Shares³	324	311	283	266	256	257	227	218	217	215	211	191

Best Buy's diluted non-GAAP EPS growth has been volatile because of the Great Recession and the transition to online shopping. In fact, sales growth was flat-to-negative from fiscal 2012 to 2017. However, the company's efforts to prioritize online sales growth, optimize store count and extract cost efficiencies led to organic sales growth and higher earnings accelerated by the COVID-19 pandemic. However, sales declined as consumers returned to more normal buying habits and federal stimulus dollars expired. Additionally, inflation and supply chain disruptions impacted margins. We expect tariffs to affect demand and sales of electronics and appliances. The company is attempting to add incremental revenue by offering Health Services remote monitoring, vendor-sponsored retail ads, and it acquired Yardbird.

We are forecasting on average 4% EPS and DPS growth out to fiscal 2031, but it will be uneven.

¹ Best Buy's fiscal year ends at the beginning of February and the company reports one year ahead. All tables are in fiscal year.

² Diluted non-GAAP EPS including restructuring charges, intangible asset amortization, and acquisition-related transaction costs.

³ Share count in millions.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
P/E	12.5	10.1	12.7	13.3	11.9	11.3	8.2	11.6	12.5	12.4	11.8	11.0
Yld.	2.7%	3.1%	2.4%	2.6%	2.8%	2.5%	3.4%	4.5%	4.7%	4.8%	5.2%	5.5%

Best Buy's stock price is up since our last report on beating estimates. Comparable sales were positive on new product launches, but tariffs are of great concern because most electronics goods are made overseas. We maintained our FY 2026 earnings estimate at the mid-point of updated guidance. Our fair value estimate is 11X, slightly lower than the trailing 5-year average. Our fair value is now \$69. Our 5-year price target is now \$83.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	33%	31%	31%	34%	33%	28%	28%	50%	58%	59%	61%	61%

Although BestBuy is one of the largest electronics retailers by revenue, it has no significant advantage. Both Walmart and Costco sell electronics and have scale and cost advantages. Best Buy is also not the clear market leader for online electronics retailing. However, Best Buy's Geek Squad and My Best Buy services offer advantages relative to traditional retailers providing a level of expertise and service not typically found at other retailers. Also, the firm has about eight million paid membership customers, providing another advantage for installation and services.

Best Buy has a solid balance sheet with no short-term debt, \$10M in current long-term debt, and \$1,164M in long-term debt that is offset by \$1,456M in cash, equivalents, and short-term investments. The leverage ratio is 0.73X.

Final Thoughts & Recommendation

At present we are forecasting 7.3% annualized total return over the next five years from a dividend yield of 5.2%, 4% EPS growth, and -1.4% P/E multiple contraction. Best Buy's comparable sales have been negative for 13 of the last 15 quarters. The firm is leveraging its store base for online order fulfillment and offering services. However, tariffs and inflation remain a downside risk. The dividend yield may interest those seeking income, but we now expect a slower dividend growth rate because of the higher payout ratio. We have maintained our hold rating.
