Overview & Current Events

Amphenol is an American electronics company primarily involved in the production of fiber optic connectors, coaxial cables, and other such systems. The company was founded in 1932 as American Phenolic Corp; the name was subsequently shortened to Amphenol. Its primary end markets are for IT and data services, industrial, and automotive uses. The company had a highly successful run, with its share price rising 800% over the past 10 years. This, in turn, lifted Amphenol's market cap to more than \$150 billion today.

Historically, Amphenol was a growth investment with a minimal dividend. However, the company started to put a focus on increasing its dividend. In fact, it has grown its annual payout at a 16.9% annualized rate since 2015.

On October 22nd, 2025, Amphenol released its Q3 2025 earnings. The company earned 93 cents per share. That greatly exceeded expectations and soared from last year's 50 cent figure. The company's revenue came in at \$6.2 billion, which amounted to a 53% increase from the same period last year and exceeded expectations by more than \$0.6 billion.

Amphenol continues to produce sizzling hot results, with the top line coming in way above the high end of prior guidance. While Amphenol historically has had a diversified business serving verticals such as autos and consumer electronics, right now, it is posting scorching growth thanks to the insatiable demand for data centers and AI-related computing infrastructure. The company's pending \$10.5 billion acquisition of CommScope's (COMM) connectivity and cable unit will provide a big boost to Amphenol's revenues and earnings over the next year. With tech companies investing heavily in new AI infrastructure, we expect Amphenol's sterling performance to continue. We have raised our 2025 EPS outlook once again following this excellent quarter.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$0.61	\$0.68	\$0.78	\$0.97	\$0.94	\$0.98	\$1.24	\$1.50	\$1.56	\$1.89	\$2.93	\$4.83
DPS	\$0.14	\$0.15	\$0.18	\$0.22	\$0.24	\$0.26	\$0.32	\$0.41	\$0.43	\$0.55	\$1.00	\$1.54
Shares	1,232	1,230	1,222	1,194	1,192	1,198	1,198	1,198	1,194	1,208	1,209	1,200

Since 2015, Amphenol has grown its earnings at a 13.5% average compounded rate. Earnings growth has been quite consistent, and 2024 returned the company to its strong long-term trajectory following a weaker 2023. Amphenol has boosted its earnings both through organic growth and a series of acquisitions.

Up until 2012, Amphenol paid a minimal dividend. Since then, Amphenol has become a tremendous dividend growth story. As a result of this change in capital allocation, Amphenol has managed tremendous dividend growth rates of 20.5% and 16.9% over the past five and nine years, respectively. On October 22nd, 2025, the company announced a tremendous 51% dividend increase, raising its quarterly payment from 16.5 cents to 25 cents per share.

As for earnings, we estimate that Amphenol will generate 10.5% annualized earnings growth over the next five years. Investments in AI and data centers should power strong demand for Amphenol products in coming years. Electric vehicles are another large addressable market for electronics components makers. Amphenol's defense sector exposure is also a plus as governments are increasing spending in this category.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	22.8	21.7	24.7	23.1	25.4	26.4	29.0	26.0	28.2	37.5	44.0	28.0
Avg. Yld.	1.0%	1.0%	0.9%	1.0%	1.0%	1.0%	0.9%	1.0%	1.0%	0.7%	0.8%	1.1%

A significant portion of Amphenol’s exemplary returns over the past decade came due to expansion of its P/E ratio. Amphenol’s P/E rose from 22.8 in 2015 to 44x estimated 2025 earnings at present. We are skeptical that Amphenol’s business will be able to support the loftier P/E ratios that the stock has obtained recently. Rather, we see Amphenol’s P/E ratio settling closer to 28 over the long term.

Amphenol’s dividend yield of 0.8% is slightly below its long-term average. We expect the yield to remain below 1%.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	22%	21%	22%	23%	26%	27%	26%	27%	27%	29%	34%	32%

Amphenol operates in highly competitive markets with tons of rival firms. However, its broad product line and superior cost management have given the firm a persistent advantage over its peers. For example, the firm had a surprisingly strong 2022, and its results didn’t cede much ground in 2023 despite broad weakness in much of the tech industry.

On paper, Amphenol might seem to face significant risk during economic downturns. But the company has developed durable relationships with key customers, insulating it from the technology industry’s boom and bust cycle. Even with the company’s large dividend increases recently, the firm’s payout ratio remains at a healthy level of about 34%. Amphenol’s balance sheet is in reasonable shape; while the firm carries a fair chunk of debt, its interest obligations should be manageable compared to its consistent cash flows.

Final Thoughts & Recommendation

Amphenol shares are trading above their long-term historical P/E average. However, the company’s growth in 2024 was tremendous, and increasing AI spend is leading to outstanding 2025 results as well. Shares have jumped more than 80% year-to-date in 2025. Even after Amphenol’s stellar Q3 earnings, shares are trading well over fair value and have an anticipated 1.9% annualized total return forecast. Amphenol stock earns a hold rating today.
