Overview & Current Events

Snap-On Inc. was founded in the early 1920's and since that time, has grown from a fledgling direct sales distributor of sockets to a full-service, global distributor of a wide array of common and specialty tools, diagnostics equipment, repair information and system solutions instruments. Snap-On also operates a financial services business that finances its customers' purchases in-house. The company's market capitalization is \$17.7 billion, and it should generate around \$4.7 billion in revenue this year.

Snap-On posted third quarter earnings on October 16th, 2025, and results were better than expected on both the top and bottom lines. Adjusted earnings-per-share came to \$4.71, which was a nickel ahead of estimates. Revenue was up 3.5% year-on-year to \$1.19 billion, beating expectations by \$30 million. Organic sales were up 3%, and revenue included a favorable forex translation gain of \$9 million.

Gross margin was 50.9% of revenue during the quarter, up from 50.5% in Q2, but lower from 51.2% in the year-ago period. The decline year-over-year was primarily from unfavorable forex rates. Operating expenses were 27.5% of revenue, an improvement from 29.2% a year ago.

Operating earnings before financial services rose to \$279 million, or 23.4% of sales, up from 22% a year ago. Consolidated operating earnings, including financial services, were \$347 million, up from \$324 million in last year's Q3. Financial services revenue was \$101 million, with operating earnings of \$69 million, the latter of which was down from \$72 million a year ago. Total loan originations declined by 5% year-over-year.

We now see \$19.10 in adjusted earnings-per-share for this year.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$8.10	\$9.20	\$10.12	\$11.81	\$12.41	\$11.63	\$14.92	\$16.82	\$18.76	\$19.19	\$19.10	\$25.56
DPS	\$2.20	\$2.54	\$2.95	\$3.41	\$3.93	\$4.47	\$5.11	\$5.88	\$6.72	\$7.72	\$8.56	\$13.17
Shares²	58	58	57	57	55	54	54	53	53	53	52	50

Except for 2020, Snap-On has produced materially higher earnings every year in the past decade. The company's constant focus on acquisitions, as well as its own organic revenue growth in concert with a rapidly growing financial services business, has created a growth profile that is tough to rival. The company continues to buy back its stock as well, albeit in small amounts, providing another tailwind for earnings-per-share. Indeed, it has managed to compound earnings at an average rate of about 10% annually in the past decade.

However, we are forecasting a 6% annual growth rate going forward as Snap-On grapples with its already-sizable scale, making further revenue and margin growth more difficult. We note that the company returned to growth from the pandemic slowdown more quickly than anticipated, however, and it appears Snap-On may be back on its prior trajectory from before the pandemic. Financial services fundamentals are starting to wane a bit as of Q3 2025, which would introduce a big headwind to earnings.

Snap-On Inc. (SNA)

Updated October 20th, 2025, by Josh Arnold

The dividend should keep increasing at high rates as the payout ratio is still low. Snap-On produces more cash than it can use to profitably invest in the business, so shareholders should see the benefit. We see the dividend rising to potentially more than \$13 per share annually by 2030.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	19.1	17.1	16.3	13.7	12.9	12.7	14.6	13.6	15.4	17.7	17.8	15.0
Avg. Yld.	1.4%	1.6%	1.8%	2.1%	2.5%	3.0%	2.3%	2.6%	2.3%	2.3%	2.5%	3.4%

Snap-On’s price-to-earnings multiple spent several years in the mid-teens, but in recent years, has been more like 13. Today, shares trade for 17.8 times 2025 earnings, and we reiterate our fair value estimate of 15 times earnings. This implies a modest negative impact from the valuation in the coming years.

We see the yield rising from 2.5% to 3.4% in the coming years, which is dependent upon the valuation declining back to our estimate of fair value. When coupled with its decent current yield, Snap-On is a nice choice for dividend growth investors, as well as income investors. We think the double-digit growth in the payout of recent years may moderate given the elevated payout ratio, and lower earnings growth.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	27%	27%	28%	29%	32%	38%	34%	35%	36%	40%	45%	52%

The payout ratio is still manageable and should remain that way unless management decides to ramp up its dividend growth strategy, which we view as unlikely at this point given already-strong growth rates. We see the recent pace of dividend increases likely moderating, and keeping the payout ratio near 50% of earnings. However, we see no risk of Snap-On being able to afford its dividend at any time, even with high rates of dividend increases.

Snap-On’s main competitive advantage is in its very broad and deep assortment of all kinds of specialty tools. In addition, its global reach and in-house financing is a unique combination not found elsewhere. The financing business could pose a problem during a recession as customers may become past due on their accounts, so this would be the principal risk for Snap-On during the next economic downturn. Earnings suffered during the Great Recession.

Final Thoughts & Recommendation

Snap-On’s recent price action has it overvalued still. We now forecast total annual return potential of 5.3% going forward, consisting of the 2.5% current yield, 6% earnings growth, and a modest headwind from the valuation. We remain at a hold rating on Snap-On.
