Overview & Current Events

Seagate Technologies is a provides data storage products and data storage solutions to its customers. The company's portfolio of products offers a variety of products that meet the needs of its customers, such as hard disk drives, solid state hybrid drives, solid state drives, storage subsystems and computing solutions. Seagate Technologies was founded in 1978 and is headquartered in Dublin, Ireland. The company generated \$6.6 billion of revenue last fiscal year and trades with a market capitalization more than \$55 billion.

On October 22th, 2025, Seagate Technologies announced results for the first quarter of FY 2026 for the period ending October 3rd, 2025. For the quarter, revenue grew 21.2% to \$2.64 billion, which beat estimates by \$80 million. Adjusted earnings-per-share of \$2.61 compared very favorably to \$1.58 in the prior fiscal year and was \$0.21 more than expected.

Top- and bottom-line gains was powered by strength in Data Center markets, demand for AI products, and growth among global cloud customers. Revenue was up almost 8% sequentially, marking nine out of 10 quarters of quarter-over-quarter growth. Gross margin expanded 220 basis points to a record 40.1% on a sequential basis and was up 680 basis points year-over-year. The operating margin of 29.0% represented a 30 basis points improvement from Q4 2025 and was up 860 basis points year-over-year. Adjusted EBITDA totaled \$831 million. The company's free cash flow of \$427 million was up slightly on a quarter-over-quarter basis.

We expect that Seagate Technologies will earn \$10.99 per share in fiscal year 2026, up from \$10.42 previously. This would represent a marking a nearly 36% improvement from the prior fiscal year. We have updated our forecast accordingly.

On October 29th, 2025, Seagate Technologies announced that it was increasing its quarterly dividend 3.0% to \$0.74 per share.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$2.26	\$4.12	\$5.52	\$4.82	\$4.95	\$5.64	\$8.18	\$0.19	\$1.58	\$8.10	\$10.99	\$22.10
DPS	\$2.43	\$2.52	\$2.52	\$2.52	\$2.60	\$2.68	\$2.80	\$2.80	\$2.80	\$2.86	\$2.96	\$3.43
Shares¹	299	292	287	278	260	233	217	207	210	218	213	200

Seagate Technologies' profitability varied widely over the last decade, from a small net loss during the last financial crisis up to record profits in 2012. The company's overall performance has been quite inconsistent in the past. Seagate Technologies' earnings-per-share have increased by 15.2% over the last decade. Expectations for this year and beyond call for a high rate of growth as well. We now believe that Seagate Technologies can grow earnings-per-share at a rate of 15% per year over the next five fiscal year even as EPS starts from a very high base.

Following Seagate Technologies' strong earnings growth in calendar year 2018, 2019 was a down year for the company, due to generally weaker chip and memory markets. Things started to improve during the last couple of quarters, though, and 2020 was a more profitable year. The past few years have been weaker, but the company has guided towards

growth for the current fiscal year. In the past, Seagate Technologies has lowered its operating expenses in order to grow its profits. It is, however, unclear whether the company can continue to lower its R&D and sales expenses without hurting revenue growth in the long run. We believe that it is prudent to assume that more expense cutting will be harder to achieve moving forward, margins will thus not grow much in the future. Over the coming years, Seagate Technologies should benefit from demand growth for storage products. This demand was seen in the most recent quarter. Over the last five years, demand for Nearline HDDs, an intermediate type of data storage that makes up a sizable portion Seagate Technologies' HDD sales, has risen by a significant amount. Tailwinds such as the IoT result in a positive long-term sales growth outlook.

Dividend growth has been low over the past two years and we predict 3% raises annually through FY2031.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	15.8	9.6	10.1	10.0	9.7	15.6	8.7	326	65.4	17.5	23.8	15.0
Avg. Yld.	6.8%	6.4%	4.4%	5.3%	5.4%	3.0%	3.9%	4.5%	2.7%	2.0%	1.1%	1.0%

Shares of Seagate Technologies have gained \$105, or 67%, since our August 14th, 2025 update. Seagate Technologies has been valued at a price-to-earnings multiple that has moved in a very wide range. Excluding FY 2023 and 2024, the stock has an average P/E of 12.1. Today, shares are trading at 23.8 times earnings estimates, which is above our new target P/E of 15. Reaching our target valuation by 2031 would reduce annual returns by 8.8% over this period. Shares yield 1.1%, one of the stock's lowest of the last decade.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	108%	61%	46%	52%	53%	48%	34%	NMF	177%	35%	27%	16%

While Seagate Technologies has paid growing or stable dividends since 2011, the dividend payout ratio has ballooned towards unsustainable levels. This is especially true for FY 2023 and 2024. The fact that Seagate Technologies has managed to at least maintain its dividend over the last 10 years is impressive, but those looking for aggressive dividend growth will likely be disappointed by the company.

Seagate Technologies is one of the largest data storage companies in the world. It therefore is a major player in this relatively narrow, focused industry. Due to consolidation over the last few years, the industry has turned into an oligopoly, which has been beneficial for margins, and which limits competitive threats. Demand for storage products, and especially the prices for Seagate's products can be cyclical, which is why profits have been quite volatile in the past.

Final Thoughts & Recommendation

After first quarter results, Seagate Technologies is projected to return 5.8% per year through fiscal year 2031, which is up from -0.3% previously. This estimate stems from earnings growth of 15% and a starting dividend yield of 1.1% that are offset by multiple compression. Shares earn a hold recommendation as the stock has had a massive rally this year.
