Overview & Current Events

Cummins, headquartered in Indiana and founded in 1919, designs, manufactures, distributes and services engines for heavy, medium, and light-duty trucks. The company's products include diesel and natural gas engines, as well as hybrid and electric platforms. Cummins operates five segments: Engines, Distribution, Components, Power Systems, and Accelera, formerly named New Power. Roughly 60% of its business is done in the U.S. and Canada. The company employs about 60,000 people and serves customers in about 190 countries. Cummins generates ~\$33 billion in annual revenues.

On July 15th, 2024, Cummins raised its quarterly dividend 9.9% to \$2.00, extending the company's dividend growth streak to 20 consecutive years.

On November 6th, 2025, Cummins reported third quarter results for the period ending September 30th, 2025. For the quarter, revenue decreased 1.7% to \$8.32 billion, but this was \$330 million above estimates. Earnings-per-share of \$5.03 compared unfavorably to \$5.86 in the prior year, but this was \$0.20 more than expected.

For the quarter, North America sales declined 4%. International was up by 2% due to higher demand in Europe and China. Revenue for the Engine segment was lower by 11% to \$2.6 billion due to weaker results for lower medium- and heavy-duty trucks. Revenue for Components declined 15% to \$2.3 billion, primarily due to a 24% decrease in North America as demand in the U.S. was weaker. Distribution grew 7% to \$3.2 billion as sales for power generation was up double-digits in North America. Power Systems surged 18% to \$2.0 billion due to strength in data center demand in North America, India, and China. Accelera was higher by 10% to \$121 million as eMobility demand was up for the period.

Cummins reiterated that it will not be issuing revenue or profitability guidance for 2025 given uncertainty in the economy. That said, the company is now projected to earn \$22.82 per share for the year, compared to \$22.06, \$21.31, and \$22.45 previously. We have updated our forecast accordingly.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$8.92	\$8.23	\$10.63	\$13.15	\$14.48	\$12.01	\$14.61	\$15.67	\$5.19	\$28.37	\$22.82	\$33.53
DPS	\$3.51	\$4.00	\$4.21	\$4.44	\$4.90	\$5.28	\$5.60	\$6.04	\$6.50	\$7.00	\$8.00	\$11.75
Shares¹	175	168	166	163	152	149	144	142	143	138	138	135

Looking at the 2015 to 2024 period, Cummins grew earnings-per-share by an average compound rate of 13.7%. The growth rate has deaccelerated somewhat 12.9% over the last five year. We reaffirm our earnings-per-share growth rate of 8% through 2030 as we feel this is a good starting point considering the high base from which EPS starts. 2020 was a difficult one for the company, but Cummins saw a rebound in recent years. Cummins has also benefited from an increase in worldwide emission regulations and fuel efficiency standards. When paired with the company's reliable and superior quality engines, this has afforded the company growth opportunities. This trend is likely to continue, but we believe there is a tipping point whereby the increase in standards starts to be addressed via alternative technologies, such as batteries.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	14.0	14.1	15.0	11.4	11.0	16.0	14.9	15.5	12.2	12.3	21.0	13.0
Avg. Yld.	2.8%	3.5%	2.6%	2.9%	3.0%	2.9%	2.6%	2.5%	2.7%	2.0%	1.7%	2.7%

Shares of Cummins have gained \$81, or 20.3%, since our August 15th, 2025 report. Shares of Cummins have traded with an average price-to-earnings ratio of 13.6 since 2015. We believe that a target P/E of 13 is a reasonable multiple given the company's growth prospects and a fair amount of cyclicality in earnings. Using the current share price and expected earnings-per-share for the year, Cummins trades with a price-to-earnings ratio of 21.0. If shares were to trade at our target multiple by 2030, then valuation would reduce annual returns by 9.2% over this period.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	39%	49%	40%	34%	33%	44%	38%	39%	33%	25%	35%	35%

During the last recession Cummins posted earnings-per-share of \$4.08, \$2.47, \$5.17, and \$9.07 during the 2008 through 2011 stretch. Meanwhile, the dividend kept increasing during this time. We view this a microcosm of the business at large. That is, in lesser economic times earnings are likely to falter, but the company has the ability to recover quickly, and the dividend payout ratio is low enough to keep the payment steady. Cummins maintains a competitive advantage in its strong brand name, stemming from reliability and superior quality. In turn, the company maintains a large share of the heavy-duty engine market. Two main risks stick out: a high reliance on a few customers, namely PACCAR, Daimler, Chrysler, and Navistar, which could turn to manufacturing in-house, and the potential for new technologies to disrupt or require increased investment.

Final Thoughts & Recommendation

Cummins is now projected to return a total of 0.3% annually through 2030, down from our prior estimate of 3.4%. Our projected return consists of an 8% earnings growth rate and a starting yield of 1.7%, offset by a high-single-digit headwind from multiple contraction. Cummins' most recent quarter showed a continued mixed business results with power generation products continuing to perform well while truck demand remains weak. Shares are up significantly over our last two reports, driving the valuation to levels rarely seen for the company. We have raised our 2030 price target \$15 to \$436 due to earnings estimates for the year, but we continue to rate shares of Cummins as a hold due to projected returns.
