Overview & Current Events

CMS Energy Corp. (CMS) is an energy company operating primarily in Michigan, serving approximately 6.8 million of the state's 10 million residents. It's the parent holding company of several subsidiaries, including Consumers, an electric and gas utility; and NorthStar Clean Energy, a domestic power producer and marketer, including the development and operation of renewable generation. The CMS we know today was formed in 1987. However, the company can trace its corporate history back to 1886 via its Consumers subsidiary. CMS has raised its dividend every year for the past 19 years. On October 30th, CMS shared its earnings report for the third quarter ended September 30th, 2025. The company's total operating revenue climbed 15.9% over the year-ago period to \$2.02 billion during the quarter. Favorable regulatory outcomes and greater purchased power/gas costs allowed revenue to beat the analyst consensus in the quarter by \$210 million. The utility's adjusted diluted EPS rose by 10.7% year-over-year to \$0.93 for the quarter. For more color, this topped the analyst consensus during the quarter by \$0.07. Earlier in the month, CMS declared a quarterly dividend per share of \$0.5425, with an ex-dividend date of November 7th, and a pay date of November 26th.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$1.89	\$2.02	\$2.17	\$2.33	\$2.49	\$2.67	\$2.65	\$2.89	\$3.11	\$3.34	\$3.59	\$5.04
DPS	\$1.16	\$1.24	\$1.33	\$1.43	\$1.53	\$1.63	\$1.74	\$1.84	\$1.95	\$2.06	\$2.17	\$2.97
Shares¹	277.2	279.2	281.6	283.4	283.9	288.9	289.8	291.3	294.4	298.8	304.3	315.2

Since 2015, CMS has generated 6.5% annual adjusted EPS growth. Looking ahead, we believe the company guidance of 6% to 8% annual adjusted EPS growth remains realistic. That's because the company has plenty of economic development on the horizon.

CMS still plans to invest \$20 billion in capital spending for 2025 through 2029 to meet this surge in electricity demand. That figure is up dramatically over its prior five-year plan. This is expected to help the utility grow its rate base by 8.5% annually from \$26.2 billion in 2024 to \$39.4 billion by 2029. CMS also unveiled another \$5 billion of expansion opportunities from the ramp-up of new data centers. Since most of CMS' capital spending is going to be funded through operating cash flow, we expect slight growth in the share count over the next several years. Overall, we believe that annual adjusted EPS growth will be around the midpoint of 7% through 2030, off an anticipated 2025 base of \$3.59.

¹ Share count is in millions.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Avg. P/E	19.1	20.6	21.8	21.3	25.2	22.9	24.6	21.9	18.7	19.9	20.2	20.0
Avg. Yld.	3.2%	3.0%	2.8%	2.9%	2.4%	2.7%	2.7%	2.9%	3.4%	3.1%	3.0%	3.0%

Over the past decade, CMS' shares have been valued at a multiple as little as the high-teens to as much as the mid-20s. The average P/E ratio over that time was just below 22x. It's worth noting that the 10-year U.S. Treasury yielded an average of 2.5% over that time. This means there was an approximately 200 basis point spread between CMS' average earnings yield over that time and the 10-year U.S. Treasury yield. Looking ahead, we believe that the investment spread will be between 100 and 150 basis points. That's because CMS' fundamentals appear to be stronger now than in recent years. Operating off our assumption of an average 10-year Treasury yield in the high-3% range in the years ahead, that would produce a fair value multiple of 20x. The current P/E ratio of right around 20 suggests the stock is still fully valued.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	61%	61%	61%	61%	61%	61%	66%	64%	63%	62%	60%	59%

CMS' core competitive advantage is that it's a regulated utility. These businesses operate as government-backed monopolies, and as such, they don't have to worry about any new competition coming in and disrupting their business. Simultaneously, however, the stringent regulations they operate under make it difficult to grow the business and operate it efficiently, as any price increases are subject to political pressures.

Financially, CMS is doing well for a regulated utility. The company's interest coverage ratio in the first nine months of 2025 was 2.9x. As a result, CMS enjoys an investment-grade, BBB credit rating from S&P on a stable outlook. The utility's dividend is also quite secure, with the payout ratio expected to be in the low-60% range in 2025. That's right around the 60% payout ratio that it targets, which should give CMS the ability to grow the dividend almost as fast as adjusted EPS over the medium term.

Final Thoughts & Recommendation

CMS' 3.0% dividend yield, 7.0% annual adjusted EPS growth prospects, and 0.2% annual valuation multiple downside could lead to 9.5% annual total returns through 2030. In closing, that's why we're reiterating our hold rating.

Total Return Breakdown by Year
