Overview & Current Events

Founded in 1897 and headquartered in Chicago, IL, CNA Financial is one of the largest U.S. Commercial Property and Casualty insurance companies. The company operates under five segments: Specialty, Commercial, International, Life & Group and Corporate & Other – offering property and casualty coverage, life, accident and health insurance and retirement products and annuities. Loews Corporation (L) owns approximately 89% of CNA's shares. Last year the \$13.0 billion market cap company served over 1 million businesses and professionals and generated \$959 million in profit.

On November 3rd, 2025, CNA reported its Q3 results for the period ending September 30th, 2025. For the quarter, CNA posted record core income, which excludes investment gains or losses, of \$409 million, or \$1.50 per share, compared to \$293 million, or \$1.08 per share, last year.

The Property & Casualty segments reported core income of \$456 million, up \$110 million from the prior year, driven by lower catastrophe losses, improved underlying underwriting results, and higher net investment income. Gross written premiums, excluding third-party captives, grew 2%, and net written premiums increased 3%. The Life & Group segment posted a core loss of \$22 million, widening from a loss of \$9 million last year, primarily due to lower investment income from limited partnerships. The Corporate & Other segment reported a core loss of \$25 million, improving from a loss of

The underlying combined ratio improved to 91.3% from 91.6% in the prior-year quarter, while the all-in combined ratio was 92.8%, reflecting significantly lower catastrophe losses of \$41 million compared to \$143 million a year ago. Book value per share excluding AOCI was \$46.30, up 8% from year-end 2024, adjusting for \$3.38 of total dividends per share. For FY2025, we continue to expect core earnings per share of about \$4.40.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$1.90	\$3.05	\$3.38	\$3.11	\$3.59	\$2.70	\$4.06	\$3.84	\$4.71	\$4.83	\$4.40	\$5.10
DPS	\$1.00	\$1.00	\$1.10	\$1.30	\$1.40	\$1.48	\$1.52	\$1.60	\$1.68	\$1.76	\$1.84	\$2.13
Shares³	270	271	271	272	271	271	271	271	271	271	271	271

Note that we are using core earnings, as we believe this better reflects the long-term earnings power of the company. CNA has put together a volatile but positive business record over the last decade. This is to be expected from an insurer, as premiums tend to be consistent, but claims will vary dramatically. Over the past decade, CNA has modestly grown its core earnings-per-share, although there are notable fluctuations. We believe that EPS will dip this year, but will continue to growth thereafter.

Note that insurers do not know their liabilities for many years, and it can be easy to underprice policies to chase growth. This was especially relevant during the past couple of years, given the COVID-19 pandemic and the uncertainties (still) surrounding future equity gyrations and insurance-related losses, especially those pertaining to weather. Therefore, we are of the opinion that CNA's slow and steady approach is attractive.

¹ Estimated dates based on past dividend dates.

² Refers to the base dividend, excluding special dividends.

CNA Financial Corp. (CNA)

Updated November 3rd, 2025, by Nikolaos Sismanis

We believe CNA could generate growth over the intermediate term via ongoing policy price increases, a combined ratio that continues to improve, and higher interest rates over the long term, which would help the fixed maturity holdings. We are estimating earnings-per-share to reach \$4.40 in 2025, and we are assuming a 3% intermediate-term growth rate.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	20.2	11	14.1	15.4	12.7	12.9	10.7	11.7	8.2	9.2	10.0	10.0
Avg. Yld.	2.6%	3.0%	2.3%	2.7%	3.1%	4.2%	3.5%	3.6%	4.3%	3.9%	4.2%	4.2%

Over the past decade, shares of CNA have traded hands with an average multiple of 12.6 times earnings. We believe 10 times earnings is a reasonable starting place, given the volatile results of the business and fairly humble growth forecast compared to other companies in the industry. With shares currently trading at 10.0 times our EPS estimate, we view CNA as somewhat overvalued. Note that while CNA has paid a notable special dividend every year since 2014, we have not included this in our forecasts. With respect to 2024, the special dividend amounted to \$2.00. As such, this component could very well be understated in our dividend and total return estimates.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	53%	33%	33%	42%	39%	55%	37%	42%	36%	36%	42%	42%

While CNA's business results have been markedly positive during the last decade, we do not believe the firm has a material competitive advantage given that insurance products are commodity-like in nature.

CNA is not necessarily beholden to economic conditions as much as it is to the timing of insurance related losses. That being said, many of the company's customers are sensitive to recessions, which will put pressure on the company in lesser times. During the Great Recession, CNA posted earnings-per-share of \$3.90, \$1.91, \$3.42, \$2.20, and \$2.28 during the 2007 through 2011 stretch. Moreover, the dividend was cut from \$0.45 to zero during 2009 and 2010, before being reinstated at \$0.40 in 2011. Core earnings declined during 2020 amid the pandemic, but rebounded quickly as well.

Today the company appears to be in reasonable financial shape, with A+ and A2 ratings from S&P and Moody's. Moreover, we are encouraged by the annual special dividend as this shows both a penchant for returning capital to shareholders and flexibility if the firm needs it in the future.

Final Thoughts & Recommendation

CNA Financial has put up a volatile record over the past decade. We are projecting a 6.8% annual total return potential, stemming from 3% growth and a 4.2% dividend yield. Our projection doesn't include the annual special dividends, which could boost total returns meaningfully. Shares earn a hold rating.
