Overview & Current Events

Ingredion Inc (INGR) is a multinational ingredient solutions company headquartered in Westchester, Illinois. Founded in 1906, INGR was incorporated as a Delaware corporation in 1997, operates in over 44 countries, and employs more than 11,000 people. The company is principally engaged in producing and selling starches and sweeteners for various industries. Essentially, Ingredion turns grains, fruits, vegetables, and other plant-based materials into value-added ingredient solutions for the food, beverage, animal nutrition, brewing, and industrial markets. Ingredion operates in three business segments: Texture & Healthful Solutions, Food & Industrial Ingredients-LATAM and Food & Industrial Ingredients - U.S./Canada.

Ingredion released its Q3 2025 results on November 4th, 2025, reporting softer year-over-year performance as strength in specialty ingredients was offset by challenges in its core industrial operations. Net sales declined 3% to \$1.82 billion, primarily due to lower volumes and a price mix shift from reduced raw material costs. Reported operating income fell 7% to \$249 million, while adjusted operating income decreased 10% to \$254 million. Reported and adjusted EPS came in at \$2.61 and \$2.75, down from \$2.83 and \$3.05, respectively, in Q3 2024. Texture & Healthful Solutions continued to perform well, with operating income up 9% to \$105 million. Growth was driven by 4% volume growth and lower input costs, particularly in clean label and specialty starches across North America and Asia-Pacific. In contrast, Food & Industrial Ingredients-U.S./Canada operating income declined 18% to \$81 million due to ongoing production challenges at its Chicago facility following a June fire and weaker beverage and food demand. LATAM's operating income fell 11% to \$116 million amid softer brewing industry volumes and consumer weakness across the region.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$5.51	\$6.55	\$7.06	\$6.17	\$6.13	\$5.15	\$6.67	\$7.34	\$9.60	\$9.71	\$11.10	\$12.87
DPS	\$1.71	\$1.85	\$2.10	\$2.43	\$2.51	\$2.53	\$2.57	\$2.66	\$2.91	\$3.14	\$3.28	\$4.19
Shares²	71.6	72.3	72.0	70.9	66.9	67.2	67.1	66.7	66.7	66.7	65.7	65.7

Ingredion's earnings-per-share have grown at a CAGR of 6.5% since 2015. While the company saw a slight decline in 2019 and 2020 due to lower sweetener demand, commodity margin pressures, and higher production and supply chain costs, its cost-smart initiative enabled it to save ~\$170 million.

Following the strong start to the year, management raised full-year adjusted EPS guidance to \$11.10–\$11.30, which includes the gain on the sale of South Korean operations. Given management's strong performance over the last couple of years and volume likely to increase in 2026 with solid demand and breakthrough product innovation in the specialties segment, we have no reason to doubt expectations. However, we have estimated EPS at the low end of the guidance due to the effects of the peso and current volume, which, at \$11.10, represents ~13% growth year-over-year. In August 2025, the company announced a 2.48% dividend increase. This was the company's 15th consecutive annual dividend increase.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	17.4	19.1	19.8	14.8	15.2	15.3	14.6	13.3	11.3	12.7	9.6	15.0
Avg. Yld.	1.8%	1.5%	1.5%	2.7%	2.7%	3.2%	2.6%	2.7%	2.7%	2.6%	3.1%	2.1%

Ingredion expects single-digit sales growth in 2025 as the global market share in clean and simple ingredients, global alternative protein ingredients, and reduced sugar ingredients will increase to over \$70 billion within the next four years. The company has positioned itself to capitalize on this growth by expanding its specialty ingredient portfolio in 2019. This will enable rapid, efficient customer co-creation to develop new food and beverages. The company is starting to see the benefits of this expansion as Sioux City has doubled its production of pea protein isolate, helping to increase sales by three figures worldwide. Ingredion is trading at a price-to-earnings ratio of 9.6, which is below its average P/E ratio of 15.3 since 2015. The stock is trading at 64% of our fair value estimate of \$167, and we currently have a five-year price target of \$193.

Safety, Quality, Competitive Advantage, & Recession Resiliency

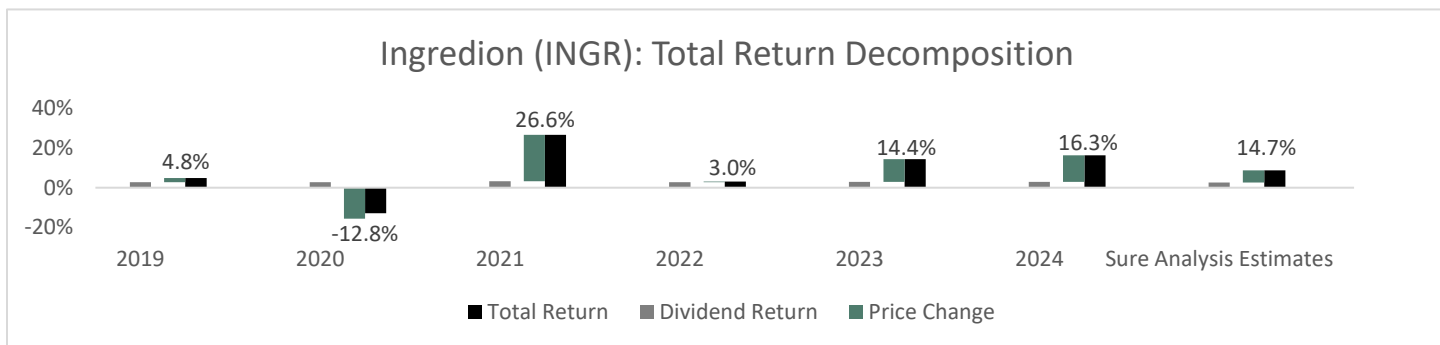

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	31%	28%	30%	39%	41%	49%	39%	36%	30%	32%	30%	33%

Ingredion is a leading provider of ingredients to industries that show growth potential, including the food and beverage industry. The company has a simple business model and nicely positioned itself in the global food supply chain. During the Great Recession, the company performed relatively better than the broader market, with a slight drop in sales and earnings in 2009 before quickly returning to growth in 2010. We have seen a similar trend during the COVID pandemic, with the company quickly returning to growth last year. However, as we have seen, supply chain issues and a higher inflationary environment can impact on the company's bottom line. The starch and sweetener industry is highly competitive, particularly in North America. Many companies' products are considered essential ingredients that compete with virtually identical products manufactured by other companies in the industry, such as Archer-Daniels-Midland (ADM). The company tries to gain a competitive advantage by investing heavily in R&D with a team of over 500 scientists who work on plant science, food formulations, and the development of non-food applications such as starch-based biopolymers.

Final Thoughts & Recommendation

INGR is a solid and straightforward business that will likely grow its dividend in future years. However, some risks should be considered, such as regulation, competition, and the price of raw materials, especially corn. Volumes have also softened, though management expects growth to continue this year. Despite these challenges, we are confident the company can meet its expectations. With a 5-year CAGR estimate of 14.7% and a moderate dividend risk score, Ingredion receives a hold recommendation from Sure Dividend.
