Overview & Current Events

The York Water Company is a special one in the industry since it is the oldest investor-owned water utility in the United States, having functioned continuously since 1816. York Water has a unique record of over 200 years of uninterrupted dividend payments to shareholders. It operates entirely within its franchised territory, which covers 57 municipalities within York, Adams, and Franklin Counties, Pennsylvania, with an estimated population of 212,000. The York Water sees an average daily consumption of 23.6 million gallons, generating around \$71 million in annual revenues. The company is based in York, Pennsylvania.

On November 6th, 2025, The York Water Company reported its Q3 results for the period ending September 30th, 2025. Quarterly revenues were \$20.4 million, up 3.3% year-over-year, driven by growth in the customer base and the Distribution System Improvement Charge (DSIC), which allows York Water to add a charge to customers' water bills for qualifying infrastructure replacement costs without filing for a rate change.

EPS for the quarter came in at \$0.43, up \$0.02 from the prior year. Earnings benefited from increased revenues and lower income taxes due to higher deductions from IRS tangible property regulations, partially offset by higher operation and maintenance expenses, depreciation, and interest on debt, as well as a lower allowance for funds used during construction. We expect FY2025 EPS of \$1.35.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	\$0.92	\$1.01	\$1.04	\$1.11	\$1.27	\$1.30	\$1.30	\$1.40	\$1.66	\$1.42	\$1.35	\$1.72
DPS	\$0.63	\$0.65	\$0.67	\$0.70	\$0.73	\$0.76	\$0.76	\$0.79	\$0.82	\$0.85	\$0.88	\$1.07
Shares²	12.8	12.8	12.9	13.0	13.0	13.0	13.0	14.0	14.3	14.3	14.4	15.0

York Water is enjoying very stable and predictable cash flows due to water being a vital commodity for households. As a result, the company has seen very steady and gradual growth in its EPS, which features a 10-year CAGR of 4.9%. Future growth catalysts include a growing number of customers and distribution facilities, as well as acquisitions of wastewater systems. For context, during 2024, customers grew by 1.4% to 72,415 (population served of more than 212,000.) Besides organic growth and acquisitions, the company is able to achieve higher revenues over time as a result of increases in water and wastewater rates, which are usually capped at 5% annually and reset to zero when new base rates that reflect the costs of those additions become effective or when a utility's earnings exceed a regulatory benchmark. We expect EPS growth of around 5% in the medium-term, in line with the company's historical average. Due to such a predictable business model and financials, the company has been able to deliver one of the most impressive dividend records in the world, numbering more than 200 years of uninterrupted dividend payments. We expect DPS growth of around 4% in the medium-term, in line with its latest increase and the current trend of an improving payout ratio. Dividends have grown annually for 28 consecutive years.

¹ Estimated dates based on past dividend dates.

² Share count is in millions.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	21.7	32.2	34.7	29.8	41.5	35.4	36.1	31.2	24.8	26.3	23.7	18.0
Avg. Yld.	2.9%	2.1%	1.9%	2.2%	1.5%	1.6%	1.5%	1.8%	2.0%	2.3%	2.7%	3.4%

The York Water's valuation multiple was hovering at a steep premium between 2016 and 2022, as was the case with its industry peers. We believe that the stock should be priced significantly lower, but recognize the high likelihood of investors continuing to price shares at current levels due to their unique and sought-after qualities. Still, the valuation did indeed start to normalize from 2023 onwards, with rising rates likely reminding investors of the wide mispricing. At the current P/E of 23.7, we still think the stock is expensive despite its notable qualities as its growth potential seems soft. We expect the stock's yield to become more attractive.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	68%	64%	64%	63%	57%	58%	58%	56%	49%	60%	65%	62%

As mentioned, the York Water Company's revenues should remain ultimately resilient in the future, powered by a very predictable business model and slow but gradual growth catalysts. The company's cash flows are unlikely to be affected by any potential recession, as was the case during the Great Financial Crisis and the COVID-19 pandemic. York should soon declare its 620th consecutive dividend, which is a testament to its ability to produce solid financials under any potential economic scenario. Finally, the company operates within an exclusive franchised territory that is substantially free from direct competition with other public utilities, municipalities, and other entities, adding another layer of safety to its business model. We believe York's dividend is extremely safe and certainly trustworthy.

Final Thoughts & Recommendation

The York Water company displays one of the longest and most impressive shareholder value creation stories in history. Few companies can boast such an extended record of success and dividend payments. Despite its predictable growth catalysts and a great moat, however, the stock remains expensive. The company's mature operations should deliver relatively modest growth metrics. However, we believe that valuation pressures may offset any benefits from growth and dividends. Still, very conservative income investors may appreciate its robust qualities. Shares earn a hold rating.
