Overview & Current Events

Independent Bank Corporation (IBCP) was founded in 1864 and is headquartered in Grand Rapids, Michigan. It operates 60 offices across Michigan's Lower Peninsula and provides a full range of financial services, including commercial banking, mortgage lending, consumer banking, investments and insurance. Independent Bank has a market capitalization of \$732 million.

Independent Bank has a somewhat concentrated loan portfolio. Commercial loans, mortgage loans and installment loans comprise 45%, 39% and 16%, respectively, of total loans. In addition, the bank has a striking difference from the vast majority of regional banks. Most regional banks incurred a sharp decline in net interest margin in 2023 due to the surge of interest rates to a 23-year high and the resultant increase in deposit costs. Independent Bank managed to maintain an essentially flat net interest margin and grew its earnings-per-share in 2023 thanks to strong loan growth. On the other hand, the bank has a current net interest margin of 3.62%, which is in line with the average of its peers.

In late January, Independent Bank reported (1/22/26) results for the fourth quarter of 2025. Loans and deposits grew 6% and 3%, respectively, over the prior year's quarter. Net interest margin expanded from 3.45% to 3.62%. As a result, net interest income grew 8%. Earnings-per-share edged up 2%, from \$0.87 to \$0.89, exceeding the analysts' consensus by \$0.05. The bank has exceeded the analysts' estimates for 13 consecutive quarters. In the full year, book value grew 13% and earnings-per-share grew 3.5%, to a new all-time high. The Fed has resumed reducing interest rates and hence we expect Independent Bank to see its net interest margin improve further in the upcoming quarters, albeit at a modest pace. We thus expect Independent Bank to grow its earnings-per-share by approximately 5.5% this year, from \$3.27 to \$3.45.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$1.05	\$0.95	\$1.68	\$2.00	\$2.53	\$2.88	\$2.44	\$2.80	\$3.16	\$3.27	\$3.45	\$4.20
DPS	\$0.34	\$0.42	\$0.60	\$0.72	\$0.80	\$0.84	\$0.88	\$0.92	\$0.96	\$1.04	\$1.12	\$1.36
Shares¹	21.7	21.7	23.8	23.2	22.2	21.5	21.3	21.0	21.1	20.8	20.5	20.0

Independent Bank has grown its earnings-per-share consistently over the last decade. It has grown its bottom line at a 13.5% average annual rate over the last decade and at a 5.3% average annual rate over the last five years. This growth has resulted primarily from organic growth of commercial and mortgage loans, which has been fueled by sustained growth of the deposits of the bank. As there are no signs of fatigue on this front, we expect the bank to continue growing its loans and deposits in the upcoming years. In addition, the Fed has resumed reducing interest rates lately and expects to reduce them further in the upcoming years. As a result, Independent Bank is likely to enjoy an expansion of its net interest margin in the upcoming years. On the other hand, we prefer to be somewhat conservative, given the small market capitalization of this regional bank and the somewhat high comparison base formed by the all-time high expected earnings-per-share this year. Therefore, we have assumed 4.0% average annual growth of earnings-per-share over the next five years.

¹ In millions.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	15.1	22.5	14.2	10.9	6.2	7.6	8.9	7.1	9.3	9.9	10.1	11.2
Avg. Yld.	2.1%	2.0%	2.5%	3.3%	5.1%	3.8%	4.1%	4.6%	3.3%	3.2%	3.2%	2.9%

Excluding the year 2017, in which a decrease in earnings resulted in an abnormally high price-to-earnings ratio, Independent Bank has traded at an average price-to-earnings ratio of 11.2 over the last decade. We assume this valuation level as fair for this stock. Independent Bank is currently trading at a price-to-earnings ratio of 10.1, which is lower than the historical average of the bank. If the stock trades at its fair valuation level in five years, it will enjoy a 2.0% annualized valuation gain.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	32%	44%	36%	36%	32%	29%	36%	33%	30%	32%	32%	32%

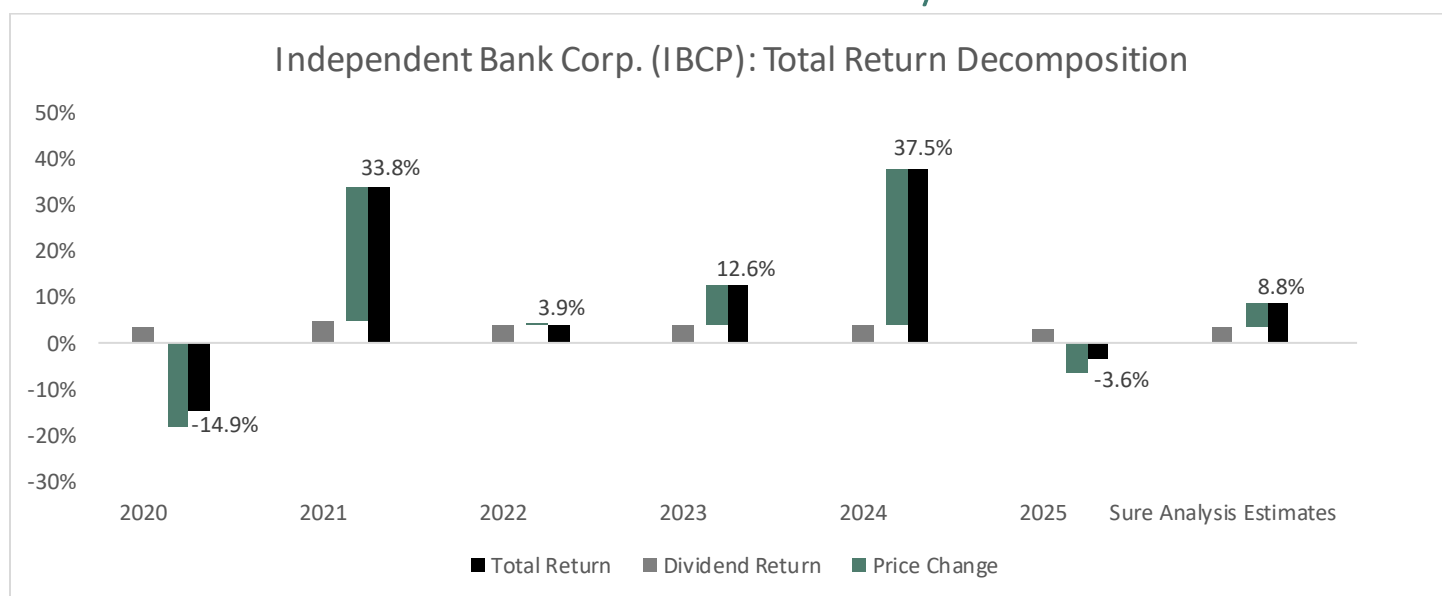

Independent Bank just raised its dividend by 8% and thus it has raised its dividend for 12 consecutive years. However, it is currently offering a low dividend yield of 3.2%, as the stock has more than doubled off its bottom in 2023. The yield of the stock is slightly higher than the 2.9% median dividend yield of the financial sector. On the bright side, the bank has a healthy payout ratio of 32% and hence it can keep raising its dividend meaningfully for years.

Independent Bank has a healthy tier 1 capital ratio of 11.2%. It also proved resilient to the pandemic, as it grew its earnings-per-share in 2020. However, the stock ignored the fundamentals and plunged -50% within a few weeks during that downturn. Therefore, the stock is suitable only for investors who can stomach high stock price volatility and remain patient during recessions and downturns of the financial sector.

Final Thoughts & Recommendation

Thanks to an improved economic outlook, which includes lower interest rates, the stock of Independent Bank has more than doubled off its bottom in 2023. As a result, it has become less attractive but it could still offer an 8.8% average annual return over the next five years thanks to 4.0% growth of earnings-per-share, its 3.2% dividend and a 2.0% valuation tailwind. It thus maintains its hold rating.
