Overview & Current Events

Formed in 1994, CSG Systems International, Inc. is a software-as-a-service (SaaS) platform company. The company provides revenue management and digital monetization, customer experience, and payment solutions across a variety of industries. These software products include a variety of formats, including business-to-business, business-to-consumer, and business-to-business-to-consumer. Simply put, CSGS' products make it easier for a company's customers to do business with them in their preferred channel of choice.

In recent years, CSGS has done an excellent job diversifying its revenue base. A majority of CSGS' revenue in 2025 (51%) was derived from the cable/pay-TV industry. Another 18% consisted of telecom industry customers. The remaining portion of CSGS' revenue was spread across other industries. That may seem like a relatively concentrated revenue base. However, it's a major step forward from the 70% of 2017 revenue that came from cable/pay TV customers and 23% of revenue from telecom industry customers, respectively. The company's other vertical categories, which include retail, healthcare, and financial services, have more than quadrupled in this time from just 7% to 31%.

On February 4th, CSGS shared its financial results for the fourth quarter ended December 31st, 2025. The company's revenue grew by 2.0% over the year-ago period to \$323.1 million during the quarter. Once again, this growth in the quarter was mostly driven by SaaS business growth. CSGS' non-GAAP EPS fell by 7.3% year-over-year to \$1.53 for the quarter. This topped the analyst consensus during the quarter by \$0.20. Last October, NEC Corporation announced it will be acquiring CSG Systems for \$80.70 per share in cash. The deal looks to be moving forward. Last month, CSGS' shareholders overwhelmingly approved the merger agreement. Now, all that's left are certain international clearances to finalize the deal. The deal is expected to close by the end of 2026. If the deal fails to close, NEC agrees to pay \$135 million to CSGS. In a much less likely scenario, CSGS would pay \$82 million to NEC if it accepts a superior proposal in the meantime. On the same day as its Q4 earnings report, CSGS also upped its quarterly dividend per share by 6% to \$0.34. This represents its 13th consecutive year of dividend growth.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$2.79	\$2.51	\$3.06	\$3.53	\$3.12	\$3.35	\$3.61	\$3.69	\$4.72	\$5.14	\$5.30	\$7.61
DPS	\$0.74	\$0.79	\$0.84	\$0.89	\$0.94	\$1.00	\$1.06	\$1.12	\$1.20	\$1.28	\$1.36	\$1.82
Shares²	32.3	33.5	33.2	32.9	32.7	32.5	31.3	29.5	28.9	28.4	28.4	25.0

CSGS' focus on diversifying its revenue stream into higher-growth verticals continues to pay off. Beyond 2025, CSGS is targeting 3% to 6% annual organic revenue growth over the long term. That would be better than the pace of 1.8% logged from 2016 to 2020. We also think that as CSGS becomes an asset-light SaaS company, it could further expand its non-GAAP adjusted operating margin further into the low-20% range (it was 20.3% in 2025). Topline growth, the potential for incremental margin expansion, and share buybacks are why we believe CSGS can deliver 7.5% annual non-GAAP EPS growth through 2031, off a projected 2026 base of \$5.30.

¹Share count is in millions.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Avg. P/E	17.4	17.5	10.3	14.8	14.8	17.2	15.9	14.4	10.8	16.1	15.1	16.0
Avg. Yld.	1.5%	1.8%	2.7%	1.7%	2.1%	1.7%	1.9%	2.1%	2.3%	1.7%	1.7%	1.5%

Since 2016, CSGS' P/E ratio has ranged from as low as the low double-digits to as much as the high teens. This correlates to an average P/E ratio of 14.9. CSGS' annual non-GAAP EPS growth prospects are about the same as in recent years. The company's successful diversification and margin expansion efforts could support a slight re-rating in the multiple to 16. CSGS' current P/E ratio of 15.1 comes in just below our updated fair value multiple. In the event NEC's acquisition doesn't ultimately go through, CSGS looks to offer additional value here.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	27%	31%	27%	25%	30%	30%	29%	30%	25%	25%	26%	24%

CSGS' competitive advantage lies in its solutions. These solutions help companies to harness customer data more cost-effectively. That allows these companies to launch new services and bill and collect revenue more efficiently. This leads to high retention rates for CSGS.

CSGS is dependent on its two biggest customers for a significant portion of its business. Charter Communications and Comcast accounted for 36% of revenue (19% and 17%), respectively. The company compensates for this concentrated revenue via decent financial positioning. CSGS' interest coverage ratio was 5.0x in 2025. This suggests that the company could withstand a downturn in its business and remain solvent.

CSGS' dividend also looks to be sustainable for its industry. The payout is still expected to be in the mid-20% range for 2026. This is about where it has been for the past decade. That is arguably a sufficient cushion for the dividend to be maintained or slightly grown in a year of earnings decline.

Final Thoughts & Recommendation

CSGS' 1.7% dividend yield, 7.5% annual non-GAAP EPS growth potential, and 1.2% annual valuation multiple upside could generate 10.2% annual total returns through 2031. As a result, we're upgrading shares back to a Buy rating.
