Overview & Current Events

Carlisle Companies is a diversified company that is active in a wide array of niche markets. The segments in which the company produces and sells products include construction materials (roofing, waterproofing, etc.), interconnecting technologies (wires, cables, etc.), fluid technologies, and brake & friction. Carlisle Companies was founded in 1917.

Carlisle Companies reported its fourth quarter earnings results on February 3. The company reported revenues of \$1.12 billion for the quarter, which was up 2% relative to the revenues that Carlisle Companies generated during the previous year's quarter. Carlisle's revenues were slightly higher than the analyst consensus estimate. Carlisle's revenue performance was better compared to the previous quarter, when the year-over-year growth rate was 1%, but growth wasn't strong -- growth is hindered by a not very strong housing market right now.

Carlisle Companies generated earnings-per-share of \$3.90 during the fourth quarter, beating the consensus analyst estimate by \$0.32. Carlisle Companies' earnings-per-share were down by 13% from the previous year's level, as the company suffered from an increase in interest expenses compared to one year earlier. In 2024, earnings-per-share totaled \$20.20, which was a record, but earnings-per-share pulled back to \$19.40 in fiscal 2025, as a small business growth rate was not enough to fully offset headwinds from higher interest expenses. For the current year, fiscal 2026, Carlisle Companies is forecasted to earn \$20.80 per share, which would be a very solid improvement versus 2025 and which would represent a new record high as well.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$5.86	\$5.53	\$6.04	\$8.21	\$6.41	\$8.89	\$20.01	\$16.60	\$20.20	\$19.40	\$20.80	\$29.17
DPS	\$1.30	\$1.44	\$1.54	\$1.80	\$2.05	\$2.16	\$3.00	\$3.40	\$3.70	\$4.20	\$4.40	\$6.47
Shares¹	64	62	59	57	54	53	52	49	47	43	41	35

From 2016 to 2025, Carlisle recorded an average annual earnings-per-share growth rate of 14%, which is a very strong result. Before that, Carlisle had also delivered compelling business growth, and the company managed to remain resilient during past crises, including the Great Recession, when profits dipped only slightly.

Despite its small size, Carlisle is a company that is highly active when it comes to M&A. Carlisle has been divesting lower-growth business units from time to time in order to focus on its higher-growth markets. Optimizing the portfolio via tuck-in acquisitions to bolster these segments further is an opportune move that should be beneficial for Carlisle's growth in the future, too. Without any acquisitions Carlisle would not have been able to grow this quickly, but its organic sales growth has historically been solid as well. Thanks to a strong balance sheet and low leverage levels, Carlisle can engage in M&A easily and will most likely continue to do so in the coming years.

Carlisle returns a lot of cash to its owners via share repurchases, which is beneficial for its earnings-per-share growth. Buybacks will remain an important earnings-per-share growth driver in the future, we believe. Since Carlisle is now a much larger company than a decade ago, its relative growth rate will be a lot lower compared to the past, however.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	17.2	18.7	16.7	19.7	24.3	27.7	11.8	18.8	18.1	16.5	20.1	18.0
Avg. Yld.	1.3%	1.4%	1.5%	1.1%	1.3%	0.9%	1.3%	1.1%	1.0%	1.3%	1.1%	1.2%

Carlisle Companies trades at around 20 times this year's expected earnings-per-share right now. This is slightly above our fair value estimate, as Carlisle has usually been less expensive in the past. Shareholders get a relatively small dividend yield from Carlisle at current prices, at just above 1%.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	22%	26%	25%	22%	32%	24%	15%	20%	18%	22%	21%	22%

Carlisle Companies has grown its dividend every year for more than four decades, and the dividend growth rate has been attractive over the last couple of years. The company nevertheless has a relatively low dividend payout ratio, as earnings-per-share growth has been quite strong as well during that time frame. The dividend looks safe, as Carlisle Companies was able to easily cover its dividend payments during every year in the past.

As an industrial company, demand for Carlisle's products can be somewhat cyclical, but the company still managed to remain highly profitable during the Great Recession, when profits dropped by just ten percent from 2008 to 2010. Carlisle is active in niche markets where it has a strong market position, despite its rather small size. The company's approach of growing its presence organically as well as via acquisitions allows for improving scale as the company gets bigger, which brings benefits such as operating leverage and more efficient purchasing.

Final Thoughts & Recommendation

Carlisle Companies is a not-overly-large industrial company that combines many positives, including a strong earnings and dividend growth track record and a solid long-term growth outlook. Carlisle's approach of consolidating its industry through M&A will likely deliver meaningful growth going forward. While 2025 was a weaker year compared to 2024, the company should be able to deliver record results in 2026. Carlisle's shares trade above fair value right now and promise solid total returns going forward, which is why we rate the stock a hold right here.
