Overview & Current Events

GATX Corporation (GATX) is a railcar leasing company that leases tank cars, freight cars and locomotives to companies in the petroleum, chemical, food/agriculture, and transportation industries. The company also offers services related to the assets that they lease, including routine maintenance, interior cleaning, repairs, and regulatory compliance work. The business operates through its 3 segments: Rail North America (64% of 2025 sales), Rail International (22% of 2025 sales), and Engine Leasing (5% of 2025 sales). GATX made the remaining 9% of 2025's revenue from other sources. GATX has a portfolio of about 156,500 railcars, 480 aircraft spare engines, and 25,000 tank containers.

On January 1st, 2026, GATX completed the acquisition of Wells Fargo's rail operating lease portfolio, adding about 101,000 railcars in its largest acquisition to date.

On February 19th, 2026, GATX raised its dividend by 8.2% to a quarterly rate of \$0.66.

On the same day, GATX reported its Q4 and full-year 2025 results for the period ending December 31st, 2025. EPS came in at \$2.66 for the quarter, compared to \$2.10 last year, and included a \$0.22 per-share net positive impact from tax adjustments and other items. Revenues increased 8.6% year-over-year to \$449.0 million. Fleet utilization remained strong across segments, with Rail North America at 99.0%, GATX Rail Europe at 94.7%, and Rail India at 100.0%.

Management highlighted solid demand for existing railcars in North America, reflected in a 99.0% utilization rate and a 91.4% renewal success rate in the quarter, as well as continued strength in Engine Leasing driven by global demand for aircraft spare engines. For the year, adjusted EPS was a record \$8.75. Looking ahead, GATX initiated 2026 earnings guidance in the range of \$9.50 to \$10.10 per diluted share. We have utilized the midpoint of this range in our estimates.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$5.75	\$4.72	\$5.20	\$5.51	\$3.54	\$5.07	\$6.07	\$7.07	\$7.89	\$8.75	\$9.80	\$13.75
DPS	\$1.60	\$1.68	\$1.76	\$1.84	\$1.92	\$2.00	\$2.08	\$2.20	\$2.32	\$2.44	\$2.64	\$3.70
Shares	39.0	38.0	37.0	35.0	35.0	35.0	35.0	35.8	35.8	35.8	35.8	33.0

Over the past decade, GATX has seen notable fluctuations in its EPS, reflecting shifts in the railcar leasing industry and macroeconomic conditions. Strong performance in 2016 (\$5.75) was driven by high railcar demand and favorable lease renewals, particularly in North America. Yet, a cyclical downturn in the rail market led to a decline in EPS to \$4.72 in 2017. Recovery came in 2018 (\$5.20) and 2019 (\$5.51) as GATX capitalized on improved fleet utilization and rising lease rates.

The pandemic in 2020 hit the company hard, reducing EPS to \$3.54, as global economic activity slowed and railcar demand weakened. GATX rebounded in 2021 (\$5.07) with increased railcar deliveries and better market conditions. In 2022 (\$6.07) and 2023 (\$7.07), GATX achieved record highs, benefiting from strong lease rate escalations, higher fleet utilization, and effective capital allocation, positioning itself well in a recovering economy. Momentum continued in 2024 (\$7.89 adjusted EPS) and 2025 (\$8.75 adjusted EPS), due to sustained pricing strength and continued growth across its rail and engine leasing platforms. We conservatively forecast that earnings-per-share will grow at ~7% annually over the next five years, to be fueled by steadily increasing demand for rail transport.

GATX Corporation (GATX)

Updated February 20th, 2026, by Nikolaos Sismanis

While rail-related businesses might seem like a relic of the past, the global railcar leasing market is actually accelerating, with growth projections ranging from 6% to 9.5% annually through 2029 as shippers shift away from trucking to more sustainable, rail-based logistics.

Over the past decade, the business has also grown dividends at 4.8% annually, and over the past five years, dividends have grown at 5.7% annually. Over the next 5 years, we forecast dividend growth of about 7% annually, and we expect the business to see a modest acceleration in growth while the payout ratio remains at prudent levels.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	8.0	12.8	14.4	14.0	19.3	18.7	17.3	14.1	16.4	19.0	19.9	18.0
Avg. Yld.	3.5%	2.8%	2.4%	2.4%	2.8%	2.1%	2.0%	2.0%	1.8%	1.5%	1.4%	1.5%

Over the past decade, GATX has averaged a P/E ratio of 15.4, and over the past five years, the stock has averaged a P/E ratio of 17.1. We estimate that over the intermediate term, the stock will trade for a P/E ratio of around 18.0. We view shares as modestly overvalued at their current levels. Today, the stock offers a low 1.4% dividend yield, which likely isn't substantial for investors seeking high dividend income, especially during the current interest rate environment.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	28%	36%	34%	33%	54%	39%	34%	31%	29%	28%	27%	27%

The business has averaged a payout ratio of 35% over the past decade. With a low expected payout ratio of just 27%, we believe that the dividend is safe for now and over the intermediate term from any cuts or decreases. GATX does have a large amount of long term debt on the balance sheet, but it has ample liquidity to pay off current liabilities, so we don't think this is a big concern. The business is susceptible to economic downturns, as seen by 2020's earnings-per-share figures, but GATX does have a competitive advantage as one of the leading railcar leasing companies in the world. Specifically, its extensive and diversified fleet coupled with its deep industry expertise and long term leases positions GATX nicely to navigate market fluctuations and maintain its strong market presence.

Final Thoughts & Recommendation

The GATX Corporation is a company that is a market leader in leasing railcars. This projection is driven by the 1.4% yield and an estimated 7% annual increase in earnings-per-share, offset by a potential valuation headwind. Based on our Dividend Risk score and total expected returns, we rate the stock as a hold. Total return prospects are expected to come in at 6.2% annually over the next five years.
