Overview & Current Events

Howmet Aerospace (HWM) is a leading provider of advanced engineered solution for the aerospace and transportation industries. Its main products are jet engine components, aerospace fastening systems, airframe structural components, and forged aluminum wheels. It is a massive manufacturer, with a market cap of \$100 billion.

Through its four segments, including Engine Products (which accounted for 52% of 2025 revenue), Fastening Systems (21%), Engineered Structures (14%), and Forged Wheels (13%), Howmet generated \$8.3 billion in revenue in 2025.

Howmet was previously known as Arconic, but it changed its name and ticker (which was previously ARNC) to Howmet (HWM) on April 1, 2020, as a result of its separation into two companies. Even before that, Arconic only became a standalone company on November 1, 2016, after being spun off from Alcoa.

On July 29th, 2025, Howmet increased its dividend by 20% to \$0.12 per share quarterly.

On December 22nd, 2025, Howmet agreed to acquire Consolidated Aerospace Manufacturing, LLC (CAM) from Stanley Black & Decker for \$1.8 billion cash. The deal is expected to close in H1 2026.

On February 12th, 2026, Howmet Aerospace published its fourth quarter earnings report for the period ended December 31st. The company's revenue rose by 15% over the year-ago period to \$2.2 billion in the quarter. Adjusted EPS increased 42% to \$1.05 from \$0.74 in fourth quarter 2024.

Howmet also repurchased \$200 million of its common stock during the quarter for an average share price of \$194.61.

Management updated its guidance, which includes the impact of tariffs on its business that it expects to be able to pass onto its customers. It now expects \$9.0B to \$9.2B of revenue, and adjusted EPS of \$4.35 to \$4.55, for a \$4.45 midpoint. Adjusted EBITDA and free cash flow are expected to be \$1.55B and \$1.65B at the midpoint of guidance.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
AFFOPS	---	\$1.22	\$1.36	\$1.29	\$0.80	\$1.01	\$1.40	\$1.84	\$2.69	\$3.77	\$4.45	\$9.76
DPS	---	\$0.24	\$0.24	\$0.12	\$0.02	\$0.04	\$0.10	\$0.17	\$0.26	\$0.44	\$0.48	\$1.10
Shares¹	---	451	503	463	439	435	421	416	408	404	403	375

Howmet, as it's known today, only began with the year 2020, when it spun off its Global Rolled Products business as Arconic, and itself became Howmet. Therefore, earnings should be looked at from 2020 and beyond. However, in the table above, we have also elected to display Arconic's results prior to 2020.

From 2020 through 2025, Howmet's EPS grew at a stunning average annual rate of 36% per year. Furthermore, in the last three years, it has kept up this pace, with a 39% EPS CAGR.

Howmet is banking on continued solid demand in engine spares, defense aerospace, and industrial end markets. However, this is offset by current weakness in commercial transportation.

Howmet Aerospace Inc (HWM)

Updated February 15th, 2026 by Quinn Mohammed

We believe the company will continue to deliver impressive growth rates, generating annual EPS growth of 17% over the next five years from the 2026 base of \$4.45.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/AFFO	---	17.1	13.0	15.1	23.2	31.0	25.0	25.0	31.4	44.1	56.2	30.0
Avg. Yld.	---	0.2%	1.4%	1.1%	0.5%	0.1%	0.2%	0.3%	0.3%	0.2%	0.2%	0.4%

Howmet's shares have traded at a wide valuation over its history, but following its transformation in 2020, the company has traded at a premium valuation. We peg fair value at 30.0 times earnings, its five-year average valuation, implying a meaningful valuation headwind from here. While we forecast 18% dividend growth, the yield is unlikely to move sharply higher as the share price keeps up.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	---	20%	18%	9%	3%	4%	7%	9%	10%	12%	11%	11%

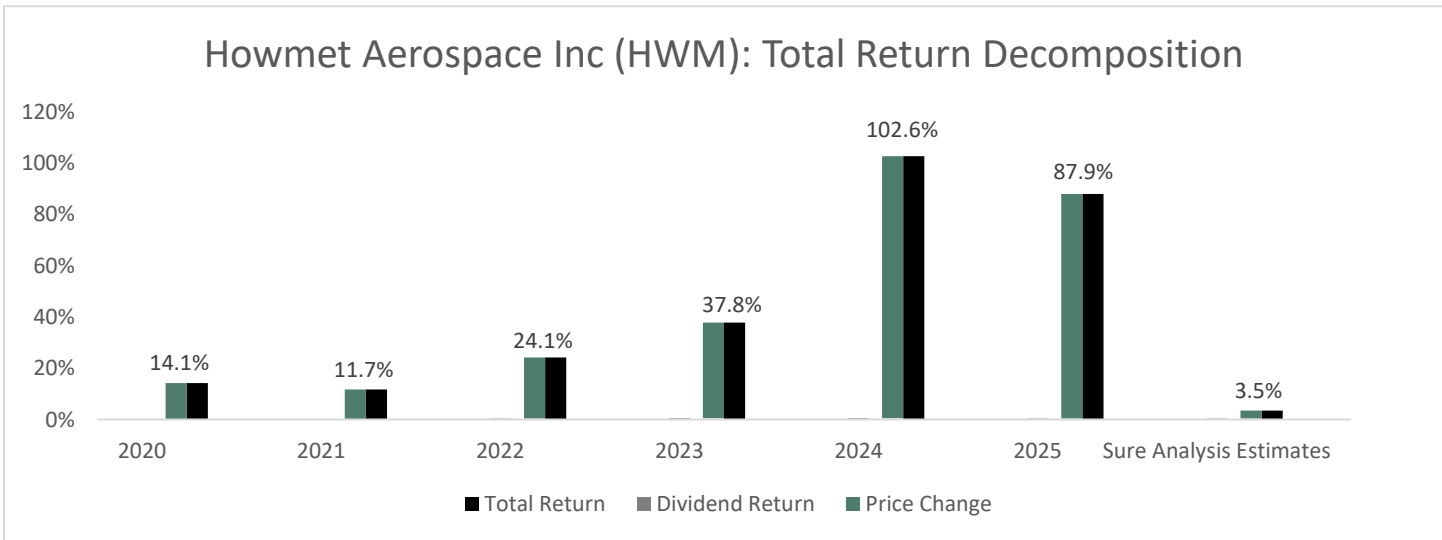

Howmet's patent portfolio, comprised of about 1,200 granted and pending patents, offers a significant competitive advantage to the company. And its revenue by markets, including Commercial Aerospace (which accounted for 53% of Q4 2025 revenue), Defense Aerospace (17%), Commercial Transportation (14%), Gas Turbines (12%), and Other (16%) offer some diversification in its sales.

At the end of Q4 2025, Howmet had \$2.9 billion of long-term debt, partly offset by \$743 million of cash and cash equivalents. It is actively paying down debt, having paid \$365 million in 2024 and \$265 million in 2025. As a result, its leverage ratio hit a record low 1.0X, and its annualized interest expense is now roughly \$22 million lower than in 2024

Final Thoughts & Recommendation

Howmet's annual EPS growth potential of 17% and its 0.2% yield are likely to be partly offset by -11.8% P/E multiple contraction, leading to 3.5% annual total returns over the next five years. The company trades at a very high premium, making it expensive, but it also possesses impressive growth potential. Its dividend is growing at an incredible rate, but the growing share price has kept a lid on the yield. Shares of Howmet have already increased 22% year-to-date. HWM maintains its hold rating.
